### Average Consumer Outstanding Balance Key

Includes loans for personal, family, and household uses including residential mortgages, home equity loans and lines of credit, auto, boat, lot, and other consumer loans.

### Average Consumer Outstanding Balance Comment

Consumer loans fell off sharply in September but picked up a little in October, and are trending quite positively in November to date. Largest activity is in lot loans, although the bank recently started a home equity loan campaign, which is starting to produce results.

Average Commercial Outstanding Balance (Thousands\$)

### Average Commercial Outstanding Balance Key

Includes loans for commercial and industrial purposes to sole proprietorships, partnerships, and corporations, and other business enterprises, whether secured or unsecured, single-payment or installment. Also includes construction and land loans for commercial and residential development by builders and developers.

### Average Commercial Outstanding Balance Comment

Commercial demand was weak throughout most of the first half, but picked up in September and is trending a little higher in the fourth quarter. Increase in commercial loan outstandings is more than offset by construction loan payoffs and paydowns. Although there are very few housing starts in Juneau and Ketchikan, there is moderate construction loan demand in Sitka.

## General Market Commentary

The opening of the Kensington gold mine will bring some much-needed growth into the Juneau economy, but tourism is still a concern, with 2009 off somewhat from 2008, especially in destination travellers (non-cruise ship). Mortgage activity was brisk through the second quarter, but has abated somewhat, and the bank is still selling almost all of its mortgages.

## General Market Commentary

A. - Loans in this classification include home equity, installment, and residential mortgage loans. With mortgage rates declining and refinancing applications rising, balance sheet outstandings are declining as customers select secondary market mortgage products. In the first 10 months of 2009, \$3.3 billion of secondary market loans were closed. B. - The make up of commercial loans presented are approximately as follows: commercial, financial, and agricultural 40%, commercial real estate 43%, and real estate construction 17%. Real estate related loans are not attractive in this market and C&I loan demand is weak in this economic environment.

Regulatory pressure and market forces are such that we are now in a mode to reduce commercial loan balances if possible. We recognize an original intent of the CPP program was to increase availability of credit, but the program's desire it increase availability of credit is currently being overwhelmed by contrary influences.

Uncertain Upper Midwest economic conditions have resulted in reduced demand for credit as commercial borrowers attempt to reduce expenses, pay down debt, and delay capital expenditures and inventory build. Consumer loan demand also continues to be constrained as households look to pay down existing debt and curtail spending while facing a weak labor market and further declines in their wealth.

## General Market Commentary

Comment 1 : The information and averages utilized for the average outstanding in each category was derived from our system generated general ledger report, which provides average outstanding balances for consumer and commercial loans. This report will be utilized going forward to ensure consistent reporting.

Comment 2 : Average consumer loans remained relatively stable during this period. However, payments and payoffs received during the month attributed to a lower outstanding average balance for the month.

Loan demand remains healthy, although only a small percentage of applicants were quantified. In addition, the Small Dollar Loan Program which was a consumer product was discontinued due to the high delinquency rate. Comment 3 : Commercial loans increased for the month. Loan demand has been steady during the period; however, the applicants or a substantial portion of the applicants, are not qualified. slower than

previous months. Although the bank is adding additional commercial loans to the portfolio, due to the payoffs and non-renewals (borrower electing not to renew), and the charge off of nonperforming loans, the overall portfolio still increased during the reporting period. The bank continues to market its \$75 million to lend program to solicit additional production to qualified borrowers. ¶¶General Comments : The general economy for the Southeast is experiencing continued decline in employment rates construction permits, and qualified business loan applicants. The Georgia unemployment rate (CTB trade market includes Atlanta MSA, Columbus, and Birmingham, AL) in October 2009 was approximately 10.7%. The outlook is for continued increase in the unemployment rate for the next two months. CTB has launched a loan promotion which will be available until year end 2009,which should provide a continued increase in commercial applications. ¶

DL Evans Bank has a significant portfolio of Agriculture loans. Typically these Agriculture loans are paid down \$20 to \$25 Million during September 30th and December 31st each year. The loan balances generally will increase again from March to August, of the following year, as Agriculture customers perform their operations and utilize funds again. As shown this 10-31-09 Total loan balance is less than the previous month and due to these Agriculture factors there may be additional pay downs for the next few months.

Farmers National Bank is a \$466 Million community bank with 13 branches located throughout western Pennsylvania, north of Pittsburgh. Effective August 31, 2009, Farmers National Bank acquired assets of National City Bank's Titusville, PA office. Our markets are largely rural and small communities. Our local economies tend to lag the national trends to some extent and our housing markets, while certainly impacted by the current recession, do not generally experience the large swings in property values some of the more metropolitan areas have seen. Our product mix is traditional, with conventional residential mortgage and home equity lending, commercial mortgages that are concentrated primarily in residential investment properties, and commercial loans generally for working capital lines of credit or equipment purchases. We

have held to our core business principles and prudent credit practices, avoiding speculative lending and the pursuit of growth at the expense of credit quality. We are experiencing some slowing of loan growth in 2009 as local consumers and businesses are typically more conservative in terms of their appetite for debt. ? ?

Average consumer loans decreased \$27.3 million during October 2009 (as compared to September 2009). The decrease was primarily attributable to a decrease in average 1-4 family residential mortgage loans held for portfolio of \$19.3 million resulting from loan prepayments in the current refinance environment and loan charge-offs, and a decrease in average loans held for sale of \$7.4 million resulting from sales of 1-4 family

residential mortgage loans into the secondary market, partially offset by an increase in home equity loans of \$1.8 million. First Bank sold \$17.4 million of 1-4 family residential mortgage loans into the secondary market during the month of October 2009. During the ten months ended October 31, 2009, First Bank originated and closed \$472.4 million of 1-4 family residential mortgage loans. In addition, First Bank sold \$451.2 million of 1-4 family residential mortgage loans into the secondary market during the ten months ended October 31, 2009. The average balance of commercial loans decreased \$96.5 million during October 2009 (as compared to September 2009). The primary reason for the decrease in the overall average balance of commercial loans was a decline in the average balance of First Bank's Real Estate Construction and Land Acquisition and Development loan portfolio of \$19.2 million that primarily resulted from loan payments, lack of customer demand and loan charge-offs on nonperforming credit relationships, a decrease in the average balance of C&I loans of \$45.6 million that primarily resulted from loan payments, lack of consumer demand and charge-offs on nonperforming credit relationships and a decrease in the average balance of CRE loans of \$21.9 million that primarily resulted from loan payments, lack of consumer demand and charge-offs on nonperforming credit relationships. ? ? ? ? ?

As overall loan amounts decreased, the main decrease was in real estate construction loans which accounted for \$600k of the \$1.4mm decrease due to the slow down in the construction industry. Real Estate consumer notes increased roughly \$300k for the month. Commercial loans saw a net decrease due to payoffs. Every other category saw no significant decrease.

## General Market Commentary

We continue to generate new loans, which totaled \$13.6 million for the month of October as well as \$66.1 million in renewals for the month of October. While lending volumes remain stable we have experienced a small increase in our loan pipeline. SBA loan requests remain steady. We are beginning to see loan requests from customers of banks whose financial strength and FDIC sanctions are public knowledge. Interest rate competition continues to increase.

There was no significant change from the prior month. There has been no change to the general market conditions since our last report. Unemployment rates are above the national average, personal bankruptcies, in our consumer portfolios, have already exceeded the total number of bankruptcies that we experienced in all of 2008. The purchase housing market is very slow,

and the refinance activity has decreased due to increased interest rates.

Since May 31, 2009, the bank has made \$401.8 million in total loans consisting of \$55.8 million of new loans and \$346.0 million in renewals of existing loans. In Many cases, the CPP funds have allowed the company to pursue loan modifications and restructure debt in lieu of foreclosure/collateral liquidation.

General Market Commentary

The demand for CRE loans in support of new projects is very light. There is a ready market to refinance CRE projects, however, these projects do not have desirable credit characteristics. Demand for working capital financing has continues to decline modestly compared to last month. Demand for equipment debt has been virtually nonexistent as capacity exists in the vast majority of industries served in this market.

Merchants and Manufacturers Bank is a small commercial bank in the metropolitan area of Chicago, Illinois. The bank specializes in financing privately held manufacturers, distributors and certain service companies with revenues from \$5 million to \$50 million. Loan demand remains strong, but for the most part, it is a shifting of banking relationships and not necessarily companies extending new capital expenditures.

## General Market Commentary

Through the first ten months of 2009, NewBridge Bank has continued to extend credit to facilitate economic activity in support of communities, businesses and consumers in our footprint. As such, the Bank's total 2009 loan originations of \$241.5 million have far surpassed the \$52.4 million of funding received under the Capital Purchase Program. As of October 31, 2009, NewBridge Bank ("Bank") held outstanding loans of \$1.49 billion, which is a decrease of \$111.0 million, or 6.9%, from \$1.60 billion at December 31, 2008, and a decrease of \$2.5 million in loans from the prior month. The decrease in outstanding loans from December 2008 is primarily the result of loan payoffs and pay downs of existing loans in the normal course of business. NewBridge Bank continues to make credit available to consumers and businesses in its market areas. During the month of October 2009, NewBridge Bank originated \$10.5 million in commercial and small

business purpose loans, \$2.6 million in home equity lines of credit, and \$1.1 million in consumer installment credit. For the first ten months of 2009, NewBridge Bank originated \$104.2 million in commercial and small business purpose loans, \$27.8 million in home equity lines of credit, and \$10.6 million in consumer installment credit. During the month of October 2009, NewBridge Bank originated \$3.3 million in residential loans to be sold in the secondary market. On a year to date basis, mortgage originations total \$98.8 million. In addition, the Bank has restructured 25 mortgage loans totaling \$8.2 million to lower interest rates and monthly payments. The Bank has launched a new residential mortgage lending program. All residential builders who are customers of NewBridge Bank have been contacted and provided information regarding specialized financing (rate of 4% fixed for 5 years; up to 95% financing; ¼% fee, no private mortgage insurance required) for consumers that are purchasing new construction homes which the builder has financed with NewBridge Bank. Seven loans totaling \$2.2 million have been closed under this program, and more loans should close in the next 60 days. NewBridge Bank has also taken steps to expand its capacity to partner with the Small Business Administration ("SBA"). The Bank has been recently approved as a SBA Express Lender. In addition, NewBridge Bank has trained lenders in each market to accept loan applications under the SBA's \$35,000 ARC program. The Bank has been able to achieve these results although its state and local economies continue to exhibit substantial stress. Specifically, the October 2009 North Carolina unemployment rate of 10.7% exceeds the national rate of 10.2%. As of September 2009, unemployment rates in several of the Bank's significant operating markets exceed the national unemployment rate. This includes Davidson County with 12.5%, Guilford County with 11.0%, Pender County with 10.8% and Rockingham County with 11.7%.

A. Average consumer loans increased \$928 thousand from September to October. Through the ten months ended October 31, 2009, residential mortgage originations (which include \$39.7 million in loans sold to FHLMC and \$3.6 million in loans sold to others) and all other consumer loan originations totaled \$74.1 million and \$29.9 million, respectively. Included in the ten month residential mortgage originations noted above, were 134 "no cash-out" refinances totaling \$23.1 million; the primary purpose of these refinances resulted from customers desire to lower their monthly payments. The monthly payments for these 134 customers in total were reduced by \$505,000 on an annualized basis or approximately \$3,800 per customer. B. Average commercial loans increased \$6.7 million from September to October 2009. This was primarily due to an

increase in commercial real estate loans of \$7.3 million. For the ten months ended October 31, 2009 commercial originations, including municipal loans, totaled \$141.5 million.

General Market Commentary

As a bankers' bank, we are focused on providing services to the community banking industry, which in turn provides loans to millions of consumers and small businesses throughout the country. PCBB provides our customer banks with products and services that allow these banks to offer competitive products and services to their end customers that they would otherwise not be able to offer. PCBB provides community banks the ability to make larger loans through its loan participation program, enhance liquidity management through our overnight cash investment and increase borrowing by providing facilities for community banks. PCBB also provides other products and services to support community banking activities. As a result of our focus on the

community banking industry, the TARP capital investment in PCBB has a multiplicative impact in that it facilitates lending activities through hundreds of community banks, indirectly or directly to the community bank's customers, as well. In addition, PCBB extended credit in the form of overnight lending facilities to Community Banks totaling \$224 million during October.

YTD payoffs and paydowns through on commercial and consumer loans are running higher than projected. In addition, commercial loan demand has been much softer than anticipated. The Bank currently has approximately \$30 million in cash that it would like to use for new loan originations as quickly as demand will allow in the Bank's market. Our strategic plan is to fully leverage the additional capital from TARP through originations of new commercial and consumer loans in the Bank's market.

Consumer lending activities in the residential mortgage area have slowed and are primarily driven by opportunities for customer refinancings, which led to the close of \$23 million in residential mortgage loans, of which \$14.9 million were subsequently sold into the secondary market. On a year-to-date basis, \$343 million in residential mortgage loans have been originated with \$303 million sold into the secondary market. This level of activity is 1.6(x) the level in 2008

### General Market Commentary

Unemployment has increased dramatically in all markets year-over-year (Sep. 2008 - Sep. 2009). Residential real estate values have declined and are now below levels generally indicated by natural long-term growth rates (1994-2008). Residential sales activity continues to be driven by sales of foreclosed properties within all markets. New commercial loan requests have been minimal. Commercial real estate continues to be under stress in all markets. There is concern that CRE fundamentals - occupancy, rental rates, cap rates - will continue to deteriorate throughout 2009 and well into 2010.

## General Market Commentary

So far in 2009, Commercial and Consumer lending have been a challenge for community banks. There have been few opportunities to lend to businesses looking to expand or invest in capital expenditures. Much of the recent commercial demand comes in the form of struggling businesses unable to renew or refinance loans at their current banking institution. On the consumer side, credit unions have a tremendous advantage due to their income tax exemption. Syringa bank has managed to increase consumer loan totals, which requires generating a fair amount of business just to offset principal pay-down, maturity, and refinance activity. Much of this growth has been in residential mortgage lending to qualified home buyers. Much of the commercial loan decrease has come in the construction and development portfolio, which has

experienced very little demand to replace maturing and non-performing loan reductions<sup>2</sup>

The Company serves its business customers and the communities in its defined market. The Bank's resources are focused on all aspects of banking closely held, small and mid size companies. Given the relatively small number of branches (9), we are not competitive in the mass retail banking market. It is expected that this will continue to negatively impact our ability to fund substantial amounts of new consumer credit.

## General Market Commentary

The Company continues to actively originate new loans and develop new customer relationships. During the first ten months of 2009, total loan production was over \$1.0 billion, with \$569 million representing actual loan fundings and a resulting increase in loan balances outstanding, and the remaining \$455 million representing unfunded or unused loan commitments. For the month of October 2009, total loan production

was approximately \$121 million, with \$61 million representing actual loan fundings and the remaining \$60 million representing unfunded or unused loan commitments. At the same time, the Company continues to strategically reposition its portfolio and reduce the amount of criticized loans, and has exited certain customer relationships and has reduced exposures to certain types of business. The Company has also experienced a decline in the usage of available lines of credit and commitments. These portfolio management activities have offset the impact on the Company's loan balances from the new origination activity.

Average Consumer Outstanding Balance (Thousands \$) 1,598,174

### Average Consumer Outstanding Balance Key

Consumer loans include indirect and direct lending, lot loans, home equity lines and loans as well as 1-4 family mortgage loans.

### Average Consumer Outstanding Balance Comment

The decline in average consumer loans from September to October was primarily driven by reduction in Non-Core lot loans, mortgages and indirect auto loans, in addition to lower home equity outstandings in the Core portfolio.

Average Commercial Outstanding Balance (Thousands\$) 7,238,293

### Average Commercial Outstanding Balance Key

Commercial loans include real estate construction, acquisition & development, corporate lending (including shared national credit facilities) and C&I lending.

### Average Commercial Outstanding Balance Comment

Decline in average commercial loans represents continued strategic reduction of non-core loans through loan sales and through the problem loan resolution process, as well as lower loan originations within the Core portfolio.

### General Market Commentary

The South Financial Group, Inc. and its wholly-owned banking subsidiary, Carolina First, has divided its loan portfolio along its primary strategic focus. The designation of "Core" and "Non Core" is meant to distinguish between those lending products for which little or no customer relationship exists and those that fit within

the Company's primary strategic focus of relationship banking. The Non Core portfolio includes indirect auto loans, shared national credit facilities, lot loans and certain other real estate related products, primarily residential construction related, for which there is little or no customer relationship other than the credit facility itself.

## General Market Commentary

**CONSUMER LOANS:** Consumer loans reflect activity in our residential loan portfolio and mortgage banking operations, our indirect auto financing and direct consumer lending. We originated \$4.1 million of residential mortgages in October and sold \$3.8 million of those loans in the secondary market. We originated \$1.2 million of indirect auto loans and \$1.5 million of direct consumer loans. The decrease in Consumer loans from September to October was due primarily to one large residential loan repayment of \$4.0 million and several other residential loan repayments of \$3.0 combined with the planned paydown of our indirect auto loan portfolio. **COMMERCIAL LOANS:** We originated 18 commercial loans totalling \$3.6 million of commitments and funded \$3.2 million of these commitments. The decrease in commercial loans

was primarily due to several significant loan repayments of \$8.0 million and write-downs of impaired loans of \$2.8 million.

We have seen strengthening home sales at the lower end of the market. Higher-end property sales have been subdued but are showing signs of improvement. Canadians continue to show increased interest in the Coachella Valley. The Utah market continues to outperform the Coachella Valley with the exception being in tract developments, an area that we did not participate, which shows very thin demand. Unemployment in the Coachella Valley remains among the highest regions of the United States while Utah unemployment is at elevated levels but below the national average. Our client based continues to outperform the market due to an emphasis on an older clientele and concentration of clients in the less affected in the Park City, Indian

Wells/Palm Desert markets.
