

Making Home Affordable Program

Servicer Performance Report Through September 2010

Report Highlights

This Month: Performance of Permanent Modifications

- Early data indicate that HAMP permanent modifications are performing well over time.
- At nine months, nearly 90% of homeowners remain in a permanent modification, with 11% defaulted. Fewer than 16% of permanent modifications are 60+ days delinquent.
- At six months, fewer than 10% of permanent modifications are 60+ days delinquent, and fewer than 6% have defaulted from the program after missing three consecutive payments.

Nearly 500,000 Permanent Modifications Granted to Homeowners

- Nearly 28,000 permanent modifications reported in September.
- Homeowners in active permanent modifications realize a median monthly payment reduction of 36%, or more than \$500 per month.
- For homeowners in permanent modifications, their median first-lien housing expense falls from 45% of their monthly income to 31%.
- Homeowners who do not complete the trial modification phase of HAMP are likely to find an alternative solution such as a proprietary modification or a short sale. Fewer than 16% have gone to foreclosure.

Making Home Affordable Program

Servicer Performance Report Through September 2010

HAMP Activity: All Servicers

		Total
HAMP Eligibility (As of Aug.31, 2010)	Eligible Delinquent Loans ¹	2,959,510
	Eligible Delinquent Borrowers ²	1,304,572
Trial Modifications	Trial Plan Offers Extended (Cumulative) ³	1,604,036
	All Trials Started	1,369,414
	Trials Reported Since August 2010 Report ⁴	35,297
	Trial Modifications Canceled (Cumulative)	699,924
	Active Trials	173,592
Permanent Modifications	All Permanent Modifications Started	495,898
	Permanent Modifications Begun Since August 2010 Report	27,840
	Permanent Modifications Canceled (Cumulative) ⁵	29,190
	Active Permanent Modifications	466,708

¹ Estimated eligible 60+ day delinquent loans as reported by servicers as of Aug. 31, 2010, include conventional loans:

- in foreclosure and bankruptcy.
- with a current unpaid principal balance less than \$729,750 on a one-unit property, \$934,200 on a two-unit property, \$1,129,250 on a three-unit property and \$1,403,400 on a four-unit property.
- on a property that was owner-occupied at origination.
- originated on or before January 1, 2009.

Estimated eligible 60+ day delinquent loans exclude:

- FHA and VA loans.
- loans that are current or less than 60 days delinquent, which may be eligible for HAMP if a borrower is in imminent default.

For servicers enrolling after July 1, 2010 that did not participate in the 60+ day delinquency survey, the delinquency count is from the servicer registration form.

² The estimated eligible 60+ day delinquent borrowers are those in HAMP-eligible loans, minus estimated exclusions of loans on vacant properties, loans with borrower debt-to-income ratio below 31%, loans that fail the NPV test, properties no longer owner-occupied, manufactured housing loans with title/chatel issues that exclude them from HAMP, and loans where the investor pooling and servicing agreements preclude modification. Exclusions for DTI and NPV results are estimated using market analytics.

³ As reported in the weekly servicer survey of large SPA servicers through September 30, 2010.

⁴ Servicers may enter new trial modifications into the HAMP system of record anytime before the loan converts to a permanent modification.

⁵ A permanent modification is canceled when the borrower has missed three or more consecutive monthly payments. Includes 428 loans paid off.

HAMP Trials Started (Cumulative)

Source: HAMP system of record. Servicers may enter new trial modifications into the HAMP system of record anytime before the loan converts to a permanent modification. For example, 35,297 trials have entered the HAMP system of record since the prior report; of those, 25,042 were trials with a first payment recorded in September.

Permanent Modifications Started (Cumulative)

Source: HAMP system of record.

Making Home Affordable Program

Servicer Performance Report Through September 2010

Modification Characteristics

- Aggregate reductions in monthly mortgage payments for borrowers in active trial and permanent modifications total more than \$3.4 billion.
- The median savings for borrowers in active permanent modifications is \$520.68, or 36% of the median payment before modification.

Active Permanent Modifications by Modification Step

Interest Rate Reduction	100%
Term Extension	57.1%
Principal Forbearance	29.8%

Select Median Characteristics of Active Permanent Modifications

Loan Characteristic	Before Modification	After Modification	Median Decrease
Front-End Debt-to-Income Ratio ¹	45.0%	31.0%	-14.0 pct pts
Back-End Debt-to-Income Ratio ²	79.7%	63.3%	-14.5 pct pts
Median Monthly Housing Payment ³	\$1,432.55	\$838.59	-\$520.68

¹ Ratio of housing expenses (principal, interest, taxes, insurance and homeowners association and/or condo fees) to monthly gross income.

² Ratio of total monthly debt payments (including mortgage principal and interest, taxes, insurance, homeowners association and/or condo fees, plus payments on installment debts, junior liens, alimony, car lease payments and investment property payments) to monthly gross income. Borrowers who have a back-end debt-to-income ratio of greater than 55% are required to seek housing counseling under program guidelines.

³ Principal and interest payment.

Predominant Hardship Reasons for Active Permanent Modifications

¹ Includes borrowers who are employed but have faced a reduction in hours and/or wages as well as those who have lost their jobs.

Note: Does not include 17.5% of permanent modifications reported as Other.

Loan Status Upon Entering Trial

Note: For all trial modifications started.

"At Risk of Default" includes borrowers up to 59 days delinquent at trial entry as well as those in imminent default. "In Default" refers to borrowers 60 or more days late at trial entry.

Making Home Affordable Program

Servicer Performance Report Through September 2010

Performance of Permanent Modifications (As of August 31, 2010)

This table shows the performance of permanent HAMP modifications at 3, 6, 9, and 12 months of age and includes modifications that have aged at least 3, 6, 9, or 12 months, as applicable. For example:

Of loans that became permanent in the 1st quarter of 2010, 9.8% were 60+ days delinquent at six months' seasoning.

Modification Became Permanent in:	Delinquency: Months After Conversion to Permanent											
	3			6			9			12		
	#	60+ Days	90+ Days	#	60+ Days	90+ Days	#	60+ Days	90+ Days	#	60+ Days	90+ Days
Q3 2009	3,589	9.8%	3.5%	4,470	14.9%	9.8%	4,730	19.6%	14.9%	4,722	25.4%	20.6%
Q4 2009	44,473	5.3%	1.4%	48,347	9.6%	5.7%	51,227	15.3%	10.6%	--	--	--
Q1 2010	125,937	3.8%	1.0%	152,802	9.8%	5.4%	--	--	--	--	--	--
Q2 2010	150,731	5.0%	1.4%	--	--	--	--	--	--	--	--	--
ALL	324,730	4.6%	1.3%	205,619	9.8%	5.5%	55,957	15.6%	11.0%	4,722	25.4%	20.6%

Note: For permanent loans aged at least 3 months as of August 31, as reported by servicers through September 17.

- The table stratifies the data by the quarter in which the permanent modification became effective and provides two separate performance metrics:
 - 60+ days delinquent:** All loans that have missed two or more consecutive monthly payments, including 90+ days delinquent loans.
 - 90+ days delinquent:** All loans that have missed three or more consecutive monthly payments.
- The table reflects the fact that loan payment status is not reported by servicers after program disqualification (90+ days delinquent). Therefore, 90+ days delinquent loans are included in each of the 60+ days delinquent and 90+ days delinquent metrics for all future reporting periods, even though some loans may have cured or paid off following program disqualification.
- This table reflects a total of 16,697 disqualified loans that have aged 3, 6, 9 or 12 months through the August activity period as reported by servicers through September 17.
- Servicers are required to report monthly payment information on HAMP modifications in the form of an Official Monthly Report (OMR). If a servicer does not report an OMR for a loan in a given month, the performance of that loan is not included in the table for that month. This table reflects improved servicer OMR reporting as the modification ages, causing the total loan count for each quarter in months 6 and 9 to be higher than the count in month 3. Reported loan counts may shift from prior reports due to servicer data corrections.
- Once a loan is paid off, it is no longer reflected in future periods.
- This table will be published quarterly.

Wells Fargo Bank, NA ⁹	136,768	257,903	182,748	11,027	50,815
Other SPA servicers ¹⁰	22,716	27,528	26,751	5,283	14,745
Other GSE Servicers ¹¹	151,254	NA	86,727	20,007	38,881
Total	1,304,572	1,604,036	1,369,414	173,592	466,708

¹ Estimated eligible 60+ day delinquent borrowers as reported by servicers as of August 31, 2010, include those in conventional loans:

- in foreclosure and bankruptcy.
- with a current unpaid principal balance less than \$729,750 on a one-unit property, \$934,200 on a two-unit property, \$1,129,250 on a three-unit property and \$1,403,400 on a four-unit property.
- on a property that was owner-occupied at origination.
- originated prior to January 1, 2009.

Estimated eligible 60+ day delinquent borrowers excludes:

- Those in FHA and VA loans.
 - Those in loans that are current or less than 60 days delinquent, which may be eligible for HAMP if a borrower is in imminent default.
 - Those borrowers with debt-to-income ratios less than 31% or a negative NPV test.
 - Owners of vacant properties or properties otherwise excluded.
- Exclusions for DTI and NPV are estimated using market analytics.

For servicers enrolling after July 1, 2010 that did not participate in the 60-day delinquency survey, the delinquency count is from the servicer registration form.

² As reported in the weekly servicer survey of large SPA servicers through September 30, 2010.

³ Active trial and permanent modifications as reported into the HAMP system of record by servicers. Subject to adjustment based on servicer reconciliation of historic loan files.

⁴ Bank of America, NA includes Bank of America, NA, BAC Home Loans Servicing LP, Home Loan Services and Wilshire Credit Corporation.

⁵ HomEq's reporting for eligible borrowers and trial plan offers extended is unchanged from last month.

⁶ J.P. Morgan Chase Bank, NA includes EMC Mortgage Corporation.

⁷ Formerly National City Bank.

⁸ Wachovia Mortgage, FSB consists of Pick-a-Payment loans.

⁹ Wells Fargo Bank, NA includes a portion of the loans previously included in Wachovia Mortgage, FSB.

¹⁰ Other SPA servicers are entities with less than 5,000 estimated eligible 60+ day delinquent borrowers as of August 31, 2010, that have signed participation agreements with Treasury and Fannie Mae. A full list of participating servicers is in Appendix A.

¹¹ Includes servicers of loans owned or guaranteed by Fannie Mae and Freddie Mac. Includes GSE loans transferred from SPA servicers.

Conversion Rate¹

Note: Per program guidelines, effective June 1, 2010 all trials must be started using verified income. Prior to June 1, some servicers initiated trials using stated income information.

¹ As measured against trials eligible to convert – those three months in trial, or four months if the borrower was at risk of default. Permanent modifications transferred among servicers are credited to the originating servicer.

Aged Trials¹

¹ As of September 30, 2010. Active trials initiated at least six months ago.

Making Home Affordable Program

Servicer Performance Report Through September 2010

Disposition Path Homeowners in Canceled HAMP Trial Modifications Through August 2010 (8 Largest Servicers)¹

Homeowners Whose HAMP Trial Modification Was Canceled Who Are in the Process of:

Servicer	Action Pending ²	Action Not Allowed – Bankruptcy in Process	Borrower Current	Alternative Modification	Payment Plan ³	Loan Payoff	Short Sale/ Deed in Lieu	Foreclosure Starts	Foreclosure Completions	Total (As of August 2010)
American Home Mortgage Servicing Inc.	147	17	104	710	5	39	48	79	5	1,154
Bank of America, NA ⁴	58,424	4,102	7,400	41,397	11,274	1,595	20,656	12,499	1,663	159,010

OneWest Bank	3,376	439	330	6,762	99	14	768	1,613	1,231	14,632
Wells Fargo Bank NA ⁶	8,312	621	10,495	63,056	1084	2,933	4,911	19,094	5,657	116,163
TOTAL (These 8 Servicers)	111,614 21.3%	10,504 2.0%	31,957 6.1%	232,004 44.2%	13,922 2.7%	8,363 1.6%	33,259 6.3%	67,441 12.9%	15,631 3.0%	524,695 100%

The most common causes of trial cancellations are:

- Insufficient documentation
- Trial plan payment default
- Ineligible borrower: first-lien housing expense is already below 31% of household income

Note: Data is as reported by servicers for actions completed through August 31, 2010.

¹ As defined by cap amount.

² Trial loans that have been canceled, but no further action has yet been taken.

³ An arrangement with the borrower and servicer that does not involve a formal loan modification.

⁴ Bank of America, NA includes Bank of America, NA, BAC Home Loans Servicing LP, Home Loan Services and Wilshire Credit Corporation.

⁵ J.P. Morgan Chase Bank, NA includes EMC Mortgage Corporation.

⁶ Wells Fargo Bank, NA includes a portion of the loans previously included in Wachovia Mortgage, FSB. Excludes Wachovia Mortgage FSB Pick-a-Payment Loans.

Note: Excludes cancellations pending data corrections and loans otherwise removed from servicing portfolios.

Making Home Affordable Program

Servicer Performance Report Through September 2010

Disposition Path Homeowners Not Accepted for HAMP Trial Modifications Through August 2010 (8 Largest Servicers)¹

Homeowners Not Accepted for a HAMP Trial Modification Who Are in the Process of:

Making Home Affordable Program

Servicer Performance Report Through September 2010

Appendix B1: Description of Compliance Activities

Note: Areas of compliance emphasis and servicer-specific compliance data will be updated quarterly.

Description of Compliance Activities

Freddie Mac, serving as Compliance Agent for Treasury's Home Affordable Modification Program (HAMP), has created a separate division known as Making Home Affordable - Compliance (MHA-C). Using a risk-based approach, MHA-C conducts a number of different types of compliance activities to assess servicer compliance with HAMP guidelines for those servicers that have signed a servicer participation agreement with Treasury and for those loans for which Treasury pays incentives (non-GSE loans), as described below.

On Site Reviews: Readiness & Governance –

Reviews performed by MHA-C to assess the servicer's preparedness for complying with new/future HAMP requirements, or to research a trend or potential implementation risk. Reviews are performed as needed, determined by frequency of new program additions.

NPV Reviews – Reviews conducted by MHA-C to determine the servicer's adherence to the HAMP NPV guidelines. For those servicers that have elected to recode the NPV model into their own systems (recoders), the testing process is designed

to ensure the servicer's NPV model is accurately calculating NPV and that the model usage is consistent with directives. At a minimum, recoders are subject to quarterly off-site testing and semi-annual for on-site reviews. For servicers using the Treasury NPV Web Portal, reviews of data submissions are performed on a monthly basis.

On Site Reviews: Implementation – Review conducted by MHA-C covering the servicer's overall execution of the HAMP program. Areas covered include, among other things, solicitation, eligibility, underwriting, document management, payment processing, reporting, and governance. Reviews are performed at a minimum for larger servicers on a semi-annual schedule and for smaller servicers on an annual schedule.

Loan File Review – A review performed by MHA-C of a servicer's non-performing loan portfolio primarily to assess completeness of relevant documentation and appropriate loan modification decisioning. This includes reviews of loans which have successfully converted to a permanent modification to ensure they meet the HAMP guidelines, as well as loans that have not been offered HAMP modifications to ensure that the exclusion was appropriate ("Second Look"). Larger servicers are on an alternating permanent

modifications and Second Look monthly loan file review cycle. These Loan File reviews consist of a statistical sample (typically 100- 150 loan files per larger servicer). Smaller servicers are also statistically sampled on a quarterly or semi-annual cycle.

Incentive Payment Reviews – Reviews performed by MHA-C to determine the accuracy and validity of borrower and investor incentive payments, and to assess whether borrower payments are appropriately allocated to borrowers' loan principal in accordance with HAMP guidelines. They are performed at a minimum annually on the top 21 servicers.

(See next page for Areas of Compliance Emphasis)

Making Home Affordable Program

Servicer Performance Report Through September 2010

Appendix B2: Areas of Compliance Emphasis

In the coming months, following will be areas of emphasis for MHA-C, to ensure ongoing compliance.

Program Changes: HAFA, 2MP, Unemployment and Principal Reduction

Servicers are required to be prepared prior to the implementation of new programs. At the outset of new programs, servicers should focus on making necessary changes to processes, policies, procedures, and controls in order to implement the new requirements effectively. To the extent that systematic controls are not fully implemented, it is important that servicers design and fully communicate to staff any alternative processes (manual or otherwise) that will help ensure eligible borrowers are considered and provided the opportunity to participate in the programs, where appropriate.

With several recently implemented or new programs including HAFA, 2MP, Unemployment, and Principal Reduction, MHA-C will emphasize in the coming quarter both policy design and overall program execution. Specific attention will be given to transitional alternative processes required in advance of full systems integrations of new programs.

NPV Model Management and 4.0 Model Preparation

Proper and consistent use of the Net Present Value model is essential in assuring that potentially eligible borrowers are appropriately evaluated for the HAMP program. Servicers who do not utilize the Treasury NPV Portal model (Recoders) are required to have their recorded model tested and certified by MHA-C before use, establish and maintain documentation of their internal controls and governance processes and periodically test their model and controls to help

ensure that the recoded model produces results consistent with the Portal model.

As of October 1, Servicers will be required to begin using a new version (4.0) through the Portal or in their recoded model. Conversion to 4.0 is expected to add additional control challenges and servicers are expected to review and appropriately enhance their current NPV procedures and controls. As with any NPV model change, Recoders are required to obtain certification from MHA-C prior to utilizing a recoded 4.0 model.

In the coming quarter, MHA-C will remain focused on servicers' NPV Model management practices. Additionally, and in consideration of the conversion to NPV version 4.0, MHA-C will evaluate conversion preparation and contingency planning. Recoding servicers with complex systems may face unusual challenges in returning to Portal use in the event that their recoded version 4.0 NPV model cannot be certified by the required timeframe. Accordingly, MHA-C will expect servicers to prepare to implement contingency plans, including; detailed contingency plans for return to Portal use and revalidation through the Treasury Portal, where necessary.

IR2 Data Integrity

Servicers are required to timely report accurate information to the Program Administrator's IR2 database. The information reported is used for both public reporting and in deriving the incentive payments. Because of the importance of this data, Servicers must maintain controls which assure that information in the database is accurate and consistent with source documentation utilized to process the modification.

In the recent quarter, MHA-C has continued to focus on Servicer governance processes and associated controls over the accuracy and integrity of IR2 data. This focus will continue. Specifically, MHA-C will evaluate controls over data mapping and governance processes designed to assure consistency of data between loan files, servicer systems of record, and the IR2 database.

Governance

Strong governance practices (policies, procedures, training, and internal assessments) are essential to maintaining the integrity of the HAMP program. Such governance helps assure eligible borrowers are considered for the program, ineligible borrowers are excluded, and that accurate information is reported to the Program Administrator.

In coming quarters, MHA-C will focus on governance policies, procedures, and practices, and in particular quality assurance activities. The objective of these assessments will be to ensure that the governance processes include an evaluation of potential areas of HAMP risk (e.g. appropriate exclusion as well as appropriate inclusion of borrowers), adequate testing programs, sufficient documentation of testing results, and appropriate action plans to address identified areas for remediation.
