23 (4) RULES OF CONSTRUCTION.—Nothing in
24 this section shall—

1 (A) enlarge, impair, or otherwise affect any
2 right or claim of the Tribe to any land or inter-
3 est in land that is in existence before the date
4 of the enactment of this Act;

5 (B) affect any water right of the Tribe in
6 existence before the date of the enactment of
7 this Act; or

8 (C) terminate or limit any access in any
9 way to any right-of-way or right-of-use issued,
10 granted, or permitted before the date of the en-
11 actment of this Act.

12 (5) RESTRICTED USE OF TRANSFERRED
13 LANDS.—The Tribe may not conduct, on the land
14 described in paragraph (3) taken into trust for the
15 Tribe pursuant to this section, gaming activities—

16 (A) as a matter of claimed inherent au-
17 thority; or

18 (B) under any Federal law, including the
19 Indian Gaming Regulatory Act (25 U.S.C.
20 2701 et seq.) and regulations promulgated by
21 the Secretary or the National Indian Gaming
22 Commission under that Act.

23 (6) DEFINITIONS.—For the purposes of this
24 subsection:

1 (A) SECRETARY.—The term “Secretary”
2 means the Secretary of the Interior.

3 (B) TRIBE.—The term “Tribe” means the
4 Santa Ynez Band of Chumash Mission Indians.

5 **SEC. 2869. LANDS TO BE TAKEN INTO TRUST AS PART OF**
6 **THE RESERVATION OF THE LYTTON**
7 **RANCHERIA.**

8 (a) FINDINGS.—Congress finds the following:

9 (1) The Lytton Rancheria of California is a fed-
10 erally recognized Indian tribe that lost its homeland
11 after its relationship to the United States was un-
12 justly and unlawfully terminated in 1958. The Tribe
13 was restored to Federal recognition in 1991, but the
14 conditions of its restoration have prevented it from
15 regaining a homeland on its original lands.

16 (2) Congress needs to take action to reverse
17 historic injustices that befell the Tribe and that have
18 prevented it from regaining a viable homeland for its
19 people.

20 (3) Prior to European contact there were as
21 many as 350,000 Indians living in what is now the
22 State of California. By the turn of the 19th century,
23 that number had been reduced to approximately
24 15,000 individuals, many of them homeless and liv-
25 ing in scattered bands and communities.

1 (4) The Lytton Rancheria's original homeland
2 was purchased by the United States in 1926 pursu-
3 ant to congressional authority designed to remedy
4 the unique tragedy that befell the Indians of Cali-
5 fornia and provide them with reservations called
6 Rancherias to be held in trust by the United States.

7 (5) After the Lytton Rancheria lands were pur-
8 chased by the United States, the Tribe settled on
9 the land and sustained itself for several decades by
10 farming and ranching.

11 (6) By the mid-1950s, Federal Indian policy
12 had shifted back towards a policy of terminating the
13 Federal relationship with Indian tribes. In 1958,
14 Congress enacted the Rancheria Act of 1958 (72
15 Stat. 619), which slated 41 Rancherias in California,
16 including the Lytton Rancheria, for termination
17 after certain conditions were met.

18 (7) On August 1, 1961, the Federal Govern-
19 ment terminated its relationship with the Lytton
20 Rancheria. This termination was illegal because the
21 conditions for termination under the Rancheria Act
22 had never been met. After termination was imple-
23 mented, the Tribe lost its lands and was left without
24 any means of supporting itself.

1 (8) In 1987, the Tribe joined three other tribes
2 in a lawsuit against the United States challenging
3 the illegal termination of their Rancherias. A Stipu-
4 lated Judgment in the case, *Scotts Valley Band of*
5 *Pomo Indians of the Sugar Bowl Rancheria v. United*
6 *States*, No. C-86-3660 (N.D.Cal. March 22, 1991),
7 restored the Lytton Rancheria to its status as a fed-
8 erally recognized Indian tribe.

9 (9) The Stipulated Judgment provides that the
10 Lytton Rancheria would have the “individual and
11 collective status and rights” which it had prior to its
12 termination and expressly contemplated the acquisi-
13 tion of trust lands for the Lytton Rancheria.

14 (10) The Stipulated Judgment contains provi-
15 sions, included at the request of the local county
16 governments and neighboring landowners, that pro-
17 hibit the Lytton Rancheria from exercising its full
18 Federal rights on its original homeland in the Alex-
19 ander Valley.

20 (11) In 2000, approximately 9.5 acres of land
21 in San Pablo, California, was placed in trust status
22 for the Lytton Rancheria for economic development
23 purposes.

24 (12) The Tribe has since acquired, from willing
25 sellers at fair market value, property in Sonoma

1 County near the Tribe's historic Rancheria. This
2 property, which the Tribe holds in fee status, is suit-
3 able for a new homeland for the Tribe.

4 (13) On a portion of the land to be taken into
5 trust, which portion totals approximately 124.12
6 acres, the Tribe plans to build housing for its mem-
7 bers and governmental and community facilities.

8 (14) A portion of the land to be taken into
9 trust is being used for viticulture, and the Tribe in-
10 tends to develop more of the lands to be taken into
11 trust for viticulture. The Tribe's investment in the
12 ongoing viticulture operation has reinvigorated the
13 vineyards, which are producing high-quality wines.
14 The Tribe is operating its vineyards on a sustainable
15 basis and is working toward certification of sustain-
16 ability.

17 (15) No gaming shall be conducted on the lands
18 to be taken into trust by this section.

19 (16) No gaming shall be conducted on any
20 lands taken into trust on behalf of the Tribe in
21 Sonoma County after the date of the enactment of
22 this Act.

23 (17) By directing that these lands be taken into
24 trust, the United States will ensure that the Lytton
25 Rancheria will finally have a permanently protected

1 homeland on which the Tribe can once again live
2 communally and plan for future generations. This
3 action is necessary to fully restore the Tribe to the
4 status it had before it was wrongfully terminated in
5 1961.

6 (18) The Tribe and County of Sonoma have en-
7 tered into a Memorandum of Agreement as amended
8 in 2018 in which the County agrees to the lands in
9 the County being taken into trust for the benefit of
10 the Tribe in consideration for commitments made by
11 the Tribe.

12 (b) DEFINITIONS.—For the purpose of this section,
13 the following definitions apply:

14 (1) COUNTY.—The term “County” means
15 Sonoma County, California.

16 (2) SECRETARY.—The term “Secretary” means
17 the Secretary of the Interior.

18 (3) TRIBE.—The term “Tribe” means the
19 Lytton Rancheria of California.

20 (c) LANDS TO BE TAKEN INTO TRUST.—

21 (1) IN GENERAL.—The land owned by the
22 Tribe and generally depicted on the map titled
23 “Lytton Fee Owned Property to be Taken into
24 Trust” and dated May 1, 2015, is hereby taken into
25 trust for the benefit of the Tribe, subject to valid ex-

1 isting rights, contracts, and management agreements
2 related to easements and rights-of-way.

3 (2) LANDS TO BE MADE PART OF THE RES-
4 ERVATION.—Lands taken into trust under para-
5 graph (1) shall be part of the Tribe’s reservation
6 and shall be administered in accordance with the
7 laws and regulations generally applicable to property
8 held in trust by the United States for an Indian
9 tribe.

10 (d) GAMING.—

11 (1) LANDS TAKEN INTO TRUST UNDER THIS
12 SECTION.—Lands taken into trust for the benefit of
13 the Tribe under subsection (c) shall not be eligible
14 for gaming under the Indian Gaming Regulatory Act
15 (25 U.S.C. 2701 et seq.).

16 (2) OTHER LANDS TAKEN INTO TRUST.—Lands
17 taken into trust for the benefit of the Tribe in
18 Sonoma County after the date of the enactment of
19 this Act shall not be eligible for gaming under the
20 Indian Gaming Regulatory Act (25 U.S.C. 2701 et
21 seq.).

22 (e) APPLICABILITY OF CERTAIN LAW.—Notwith-
23 standing any other provision of law, the Memorandum of
24 Agreement entered into by the Tribe and the County con-
25 cerning taking land in the County into trust for the benefit

1 of the Tribe, which was approved by the County Board
2 of Supervisors on March 10, 2015, and any addenda and
3 supplement or amendment thereto, is not subject to review
4 or approval of the Secretary in order to be effective, in-
5 cluding review or approval under section 2103 of the Re-
6 vised Statutes (25 U.S.C. 81).

7 **SEC. 2870. LITTLE SHELL TRIBE OF CHIPPEWA INDIANS OF**
8 **MONTANA.**

9 (a) FINDINGS.—Congress finds that—

10 (1) the Little Shell Tribe of Chippewa Indians
11 is a political successor to signatories of the Pembina
12 Treaty of 1863, under which a large area of land in
13 the State of North Dakota was ceded to the United
14 States;

15 (2) the Turtle Mountain Band of Chippewa of
16 North Dakota and the Chippewa-Cree Tribe of the
17 Rocky Boy's Reservation of Montana, which also are
18 political successors to the signatories of the Pembina
19 Treaty of 1863, have been recognized by the Federal
20 Government as distinct Indian tribes;

21 (3) the members of the Little Shell Tribe con-
22 tinue to live in the State of Montana, as their ances-
23 tors have for more than 100 years since ceding land
24 in the State of North Dakota as described in para-
25 graph (1);

1 (4) in the 1930s and 1940s, the Tribe repeat-
2 edly petitioned the Federal Government for reorga-
3 nization under the Act of June 18, 1934 (25 U.S.C.
4 5101 et seq.) (commonly known as the “Indian Re-
5 organization Act”);

6 (5) Federal agents who visited the Tribe and
7 Commissioner of Indian Affairs John Collier at-
8 tested to the responsibility of the Federal Govern-
9 ment for the Tribe and members of the Tribe, con-
10 cluding that members of the Tribe are eligible for,
11 and should be provided with, trust land, making the
12 Tribe eligible for reorganization under the Act of
13 June 18, 1934 (25 U.S.C. 5101 et seq.) (commonly
14 known as the “Indian Reorganization Act”);

15 (6) due to a lack of Federal appropriations dur-
16 ing the Depression, the Bureau of Indian Affairs
17 lacked adequate financial resources to purchase land
18 for the Tribe, and the members of the Tribe were
19 denied the opportunity to reorganize;

20 (7) in spite of the failure of the Federal Gov-
21 ernment to appropriate adequate funding to secure
22 land for the Tribe as required for reorganization
23 under the Act of June 18, 1934 (25 U.S.C. 5101 et
24 seq.) (commonly known as the “Indian Reorganiza-
25 tion Act”), the Tribe continued to exist as a sepa-

1 rate community, with leaders exhibiting clear polit-
2 ical authority;

3 (8) the Tribe, together with the Turtle Moun-
4 tain Band of Chippewa of North Dakota and the

3 that is not a citizen of the United States,
4 or involving any other person that is not a

22 States; and

23 “(C) the Secretary and the Operating
24 Agency notify the Committee on Armed Serv-
25 ices and the Committee on Commerce, Science

2014

1 and Transportation of the Senate, and the
2 Committee on Armed Services of the House of
3 Representatives that they concur, and have re-
4 viewed the certification required under subpara-
5 graph (A)(ii)(III) and determined that there are

7 Defense notify the Committee on Armed Serv-
8 ices and Committee on Commerce, Science, and
9 Transportation of the Senate and the Com-
10 mittee on Armed Services of the House of Rep-
11 resentatives that they have reviewed the certifi-
12 cation required by subparagraph (A)(iv) and de-
13 termined that there are no other legal, oper-
14 ational, or other impediments that would pro-
15 hibit the Contractor for the vessel from per-
16 forming its obligations under an Operating
17 Agreement under this chapter.

18 “(4) VESSEL OWNED BY A DOCUMENTATION
19 CITIZEN AND CHARTERED TO A SECTION 50501 CIT-

11 meets the criteria of subsection (b) of this section
12 but which, on the date of enactment of the Act, is
13 not documented under chapter 121 of this title, shall
14 be eligible for a certificate of inspection if that Sec-
15 retary determines that—

16 “(A) the vessel is classed by, and designed
17 in accordance with the rules of, the American
18 Bureau of Shipping, or another classification
19 society accepted by that Secretary;

20 “(B) the vessel complies with applicable
21 international agreements and associated guide-

1 “(C) that country has not been identified
2 by that Secretary as inadequately enforcing
3 international vessel regulations as to that ves-
4 sel.

5 “(2) CONTINUED ELIGIBILITY FOR CERTIFI-
6 CATE.—Paragraph (1) does not apply to a vessel
7 after any date on which the vessel fails to comply
8 with the applicable international agreements and as-
9 sociated guidelines referred to in paragraph (1)(B).

10 “(3) RELIANCE ON CLASSIFICATION SOCIETY.—

11 “(A) IN GENERAL.—The Secretary of the
12 Department in which the Coast Guard is oper-
13 ating may rely on a certification from the
14 American Bureau of Shipping or, subject to
15 subparagraph (B), another classification society
16 accepted by that Secretary to establish that a
17 vessel is in compliance with the requirements of
18 paragraphs (1) and (2).

19 “(B) FOREIGN CLASSIFICATION SOCI-
20 ETY.—The Secretary of the Department in
21 which the Coast Guard is operating may accept
22 certification from a foreign classification society
23 under subparagraph (A) only—

24 “(i) to the extent that the government
25 of the foreign country in which the society

1 is headquartered provides access on a re-
2 ciprocal basis to the American Bureau of
3 Shipping; and

4 “(ii) if the foreign classification soci-
5 ety has offices and maintains records in
6 the United States.

7 “(e) WAIVER OF AGE REGISTRATION.—The Sec-
8 retary, in conjunction with the Operating Agency, may
9 waive the application of the age restriction under sub-
10 section (b)(3) if they jointly determine that the waiver—

11 “(1) is in the national interest;

12 “(2) the subject cable vessel and any associated
13 operating network is and will continue to be eco-
14 nomically viable; and

15 “(3) is necessary due to the lack of availability
16 of other vessels and operators that comply with the
17 requirements of this chapter.

18 **“§ 53203. Award of operating agreements**

19 “(a) IN GENERAL.—The Secretary shall require, as
20 a condition of including any vessel in the Cable Fleet, that
21 the person that is the owner or operator of the vessel for
22 purposes of section 53202(c) enter into an Operating
23 Agreement with the Secretary under this section.

24 “(b) PROCEDURE FOR APPLICATIONS.—

1 “(1) ACCEPTANCE OF APPLICATIONS.—Begin-
2 ning no later than 60 days after the effective date
3 of this chapter, the Secretary shall accept applica-
4 tions for enrollment of vessels in the Cable Fleet.

5 “(2) ACTION ON APPLICATIONS.—Within 120
6 days after receipt of an application for enrollment of
7 a vessel in the Cable Fleet, the Secretary shall ap-
8 prove the application in conjunction with the Oper-
9 ating Agency, and shall enter into an Operating
10 Agreement with the applicant, or provide in writing
11 the reason for denial of that application.

12 “(c) PRIORITY FOR AWARDING AGREEMENTS.—Sub-
13 ject to the availability of appropriations, the Secretary
14 shall enter into Operating Agreements with those vessels
15 determined by the Operating Agency, in its sole discretion,
16 to best meet the national security requirements of the
17 United States. After consideration of national security re-
18 quirements, priority shall be given to an applicant that
19 is a United States citizen under section 50501 of this title.

20 **“§ 53204. Effectiveness of operating agreements**

21 “(a) EFFECTIVENESS GENERALLY.—The Secretary
22 may enter into an Operating Agreement under this chap-
23 ter for fiscal year 2021. Except as provided in subsection

4 STATES.—Vessels under charter to the United States are
5 eligible to receive payments pursuant to their Operating

7 “(c) TERMINATION.—

8 “(1) TERMINATION BY THE SECRETARY.—If
9 the Contractor with respect to an Operating Agree-
10 ment materially fails to comply with the terms of the
11 Agreement—

12 “(A) the Secretary shall notify the Con-
13 tractor and provide a reasonable opportunity
14 for it to comply with the Operating Agreement;

15 “(B) the Secretary shall terminate the Op-
16 erating Agreement if the Contractor fails to
17 achieve such compliance; and

18 “(C) upon such termination, any funds ob-
19 ligated by the Agreement shall be available to
20 the Secretary to carry out this chapter.

21 “(2) EARLY TERMINATION BY A CON-
22 TRACTOR.—An Operating Agreement under this
23 chapter shall terminate on a date specified by the
24 Contractor if the Contractor notifies the Secretary,
25 not fewer than 60 days prior to the effective date of

2021

1 the termination, that the Contractor intends to ter-
2 minate the Agreement.

3 “(d) NONRENEWAL FOR LACK OF FUNDS.—If, by the
4 first day of a fiscal year, sufficient funds have not been
5 appropriated under the authority provided by this chapter
6 for that fiscal year for all Operating Agreements, then the
7 Secretary shall notify the Committee on Armed Services
8 and the Committee on Commerce, Science, and Transpor-
9 tation of the Senate and the Committee on Armed Services
10 of the House of Representatives that Operating Agree-
11 ments authorized under this chapter for which sufficient
12 funds are not available will not be renewed for that fiscal
13 year if sufficient funds are not appropriated by the 60th
14 day of that fiscal year. If only partial funding is appro-
15 priated by the 60th day of such fiscal year, then the Sec-
16 retary, in consultation with the Operating Agency, shall
17 select the vessels to retain under Operating Agreements,
18 based on their determinations of which vessels are most
19 useful for national security. In the event that no funds
20 are appropriated, then no Operating Agreements shall be
21 renewed and each Contractor shall be released from its
22 obligations under the Operating Agreement. Final pay-
23 ments under an Operating Agreement that is not renewed
24 shall be made in accordance with section 53206. To the
25 extent that sufficient funds are appropriated in a subse-

2022

1 quent fiscal year, an Operating Agreement that has not
2 been renewed pursuant to this subsection may be rein-
3 stated if mutually acceptable to the Secretary, in consulta-
4 tion with the Operating Agency, and the Contractor, pro-
5 vided the vessel remains eligible for participation pursuant
6 to section 53202, without regard to subsection 53202
7 (b)(3).

8 “(e) RELEASE OF VESSELS FROM OBLIGATIONS.—
9 If funds are not appropriated for payments under an Op-
10 erating Agreement under this chapter for any fiscal year
11 by the 60th day of a fiscal year, and the Secretary, in
12 consultation with the Operating Agency determines to not
13 renew a Contractor’s Operating Agreement for a vessel,
14 then—

15 “(1) each vessel covered by the Operating
16 Agreement that is not renewed is thereby released
17 from any further obligation under the Operating
18 Agreement;

19 “(2) the owner or operator of the vessel whose
20 Operating Agreement was not renewed may transfer
21 and register such vessel under a foreign registry that
22 is acceptable to the Secretary and the Operating
23 Agency, notwithstanding section 56101 of this title;
24 and

1 “(3) if chapter 563 of this title is applicable to
2 such vessel after registration, then the vessel is
3 available to be requisitioned by the Secretary pursu-

22 terms, except that the terms of such Contingency
23 Agreement may be modified by the mutual consent
24 of the Contractor, and the Operating Agency.

1 “(e) TRANSFER OF OPERATING AGREEMENTS.—Op-
2 erating Agreements shall not be transferrable by the Con-
3 tractor.

4 “(f) REPLACEMENT VESSEL.—A Contractor may re-
5 place a vessel under an Operating Agreement with another
6 vessel that is eligible to be included in the Fleet under
7 section 53202(b), if the Secretary and the Operating
8 Agency jointly determine that the replacement vessel
9 meets national security requirements and approve the re-
10 placement.

11 **“§ 53206. Payments**

12 “(a) ANNUAL PAYMENT.—

13 “(1) IN GENERAL.—The Secretary, subject to
14 availability of appropriations and other provisions of
15 this section, shall pay to the Contractor for an oper-
16 ating agreement, for each vessel that is covered by
17 the operating agreement, an amount equal to
18 \$5,000,000 for each fiscal year 2021 through 2035.

19 “(2) TIMING.—This amount shall be paid in
20 equal monthly installments at the end of each
21 month. The amount shall not be reduced except as
22 provided by this section.

23 “(b) CERTIFICATION REQUIRED FOR PAYMENT.—As
24 a condition of receiving payment under this section for a
25 fiscal year for a vessel, the Contractor for the vessel shall

1 certify that the vessel has been and will be operated in
2 accordance with section 53205(a)(1) for 365 days in each
3 fiscal year. Up to thirty (30) days during which the vessel

16 the vessel is not operated in accordance with section
17 53205(a)(1), with days during which the vessel is

23 Secretary shall include in each Operating Agreement
24 under this chapter a requirement that the Contractor
25 enter into a Contingency Agreement with the Operating

1 Agency. The Operating Agency shall negotiate and enter
2 into a Contingency Agreement with each Contractor as
3 promptly as practicable after the Contractor has entered
4 into an Operating Agreement under this chapter.

5 “(b) TERMS OF CONTINGENCY AGREEMENT.—

6 “(1) IN GENERAL.—A Contingency Agreement
7 under this section shall require that a Contractor for
8 a vessel covered by an Operating Agreement under
9 this chapter make the vessel, including all necessary
10 resources to engage in Cable Services required by
11 the Operating Agency, available upon request by the
12 Operating Agency.

13 “(2) TERMS.—

12 **“§ 53208. Regulatory relief**

2 such Act (50 U.S.C. 3106) is amended by adding at the
3 end the following new paragraph:

4 “(6) An annual report submitted under section
5 119C(d)(1).”.

6 **SEC. 5323. ENCOURAGEMENT OF COOPERATIVE ACTIONS**
7 **TO DETECT AND COUNTER FOREIGN INFLU-**
8 **ENCE OPERATIONS.**

9 (a) FINDINGS.—Congress makes the following find-
10 ings:

11 (1) The Russian Federation, through military
12 intelligence units, also known as the “GRU”, and
13 Kremlin-linked troll organizations often referred to
14 as the “Internet Research Agency”, deploy informa-
15 tion warfare operations against the United States,
16 its allies and partners, with the goal of advancing
17 the strategic interests of the Russian Federation.

18 (2) One line of effort deployed as part of these
19 information warfare operations is the weaponization
20 of social media platforms with the goals of inten-
21 sifying societal tensions, undermining trust in gov-
22 ernmental institutions within the United States, its
23 allies and partners in the West, and generally sow-
24 ing division, fear, and confusion.

1 (3) These information warfare operations are a
2 threat to the national security of the United States
3 and that of the allies and partners of the United
4 States. As former Director of National Intelligence
5 Dan Coats stated, “These actions are persistent,
6 they are pervasive and they are meant to undermine
7 America’s democracy.”.

8 (4) These information warfare operations con-
9 tinue to evolve and increase in sophistication.

10 (5) Other foreign adversaries and hostile non-
11 state actors are increasingly adopting similar tactics
12 of deploying information warfare operations against
13 the West, such as recent state-backed operations
14 from China around the Hong Kong protests identi-
15 fied by social media companies.

16 (6) Technological advances, including artificial
17 intelligence, will only make it more difficult in the
18 future to detect fraudulent accounts, deceptive mate-
19 rial posted on social media, and malign behavior on
20 social media platforms.

21 (7) Because these information warfare oper-
22 ations are deployed within and across private social
23 media platforms, the companies that own these plat-
24 forms have a responsibility to detect and facilitate

1 the removal or neutralization of foreign adversary
2 networks operating clandestinely on their platforms.

3 (8) The social media companies are inherently
4 technologically sophisticated and adept at rapidly
5 analyzing large amounts of data and developing soft-
6 ware-based solutions to diverse and ever-changing
7 challenges on their platforms, which makes them
8 well-equipped to address the threat occurring on
9 their platforms.

10 (9) Independent analyses confirmed Kremlin-
11 linked threat networks, based on data provided by
12 several social media companies to the Select Com-
13 mittee on Intelligence of the Senate, thereby dem-
14 onstrating that it is possible to discern both broad
15 patterns of cross-platform information warfare oper-
16 ations and specific fraudulent behavior on social
17 media platforms.

18 (10) General Paul Nakasone, Director of the
19 National Security Agency, emphasized the impor-
20 tance of these independent analyses to the planning
21 and conducting of military cyber operations to frus-
22 trate Kremlin-linked information warfare operations
23 against the 2018 mid-term elections. General
24 Nakasone stated that the reports “were very, very
25 helpful in terms of being able to understand exactly

1 what our adversary was trying to do to build dissent
2 within our nation.”.

3 (11) Institutionalizing ongoing robust, inde-
4 pendent, and vigorous analysis of data related to
5 foreign threat networks within and across social
6 media platforms will help counter ongoing informa-
7 tion warfare operations against the United States,
8 its allies, and its partners.

9 (12) Archiving and disclosing to the public the
10 results of these analyses by the social media compa-
11 nies and trusted third-party experts in a transparent
12 manner will serve to demonstrate that the social
13 media companies are detecting and removing foreign
14 malign activities from their platforms while pro-
15 tecting the privacy of the people of the United
16 States and will build public understanding of the
17 scale and scope of these foreign threats to our de-
18 mocracy, since exposure is one of the most effective
19 means to build resilience.

20 (b) SENSE OF CONGRESS.—It is the sense of Con-
21 gress that—

22 (1) the social media companies should cooperate
23 among themselves and with independent organiza-
24 tions and researchers on a sustained and regular
25 basis to share and analyze data and indicators rel-

1 evant to foreign information warfare operations
2 within and across their platforms in order to detect
3 and counter foreign information warfare operations
4 that threaten the national security of the United
5 States and its allies and partners;

6 (2) information from law enforcement and the
7 intelligence community is also important in assisting
8 efforts by these social media companies to identify
9 foreign information warfare operations;

10 (3) these analytic efforts should be organized in
11 such a fashion as to meet the highest standards of
12 ethics, confidentiality, and privacy protection of the
13 people of the United States, while still allowing time-
14 ly research access to relevant data;

15 (4) these analytic efforts should be undertaken
16 as soon as possible to facilitate countering ongoing
17 state or state-backed foreign information warfare op-
18 erations and to aid in preparations for the United
19 States Presidential and congressional elections in
20 2020 and beyond;

21 (5) the structure and operations of social media
22 companies make them well positioned to work with
23 independent organizations and researchers to ad-
24 dress foreign adversary threat networks within and
25 across their platforms, and these efforts could be

1 conducted without direct Government involvement,
2 direction, or regulation; and

3 (6) if the social media industry fails to take
4 sufficient action to address foreign adversary threat
5 networks operating within or across their platforms,
6 Congress would have to consider additional safe-
7 guards for ensuring that this threat is effectively
8 mitigated.

9 (c) AUTHORITY TO FACILITATE ESTABLISHMENT OF
10 SOCIAL MEDIA DATA AND THREAT ANALYSIS CENTER.—

11 (1) AUTHORITY.—The Director of National In-
12 telligence, in coordination with the Secretary of De-
13 fense, may facilitate, by grant or contract or under
14 an existing authority of the Director, the establish-
15 ment of a Social Media Data and Threat Analysis
16 Center with the functions described in paragraph (2)
17 at an independent, nonprofit organization.

18 (2) FUNCTIONS.—The functions described in
19 this paragraph are the following:

20 (A) Acting as a convening and sponsoring
21 authority for cooperative social media data
22 analysis of foreign threat networks involving so-
23 cial media companies and third-party experts,
24 nongovernmental organizations, data journal-
25 ists, Federally funded research and development

1 centers, academic researchers, traditional
2 media, and international counterparts, as ap-
3 propriate.

4 (B) Facilitating analysis of foreign influ-
5 ence operation, within and across the individual
6 social media platforms as well as hacking and
7 leaking campaigns, and other tactics, and re-
8 lated unlawful activities that fund or subsidize
9 such operations.

10 (C) Developing processes to share informa-
11 tion from government entities on foreign influ-
12 ence operations with the individual social media
13 companies to inform threat analysis, and work-
14 ing with the Office of the Director of National
15 Intelligence as appropriate.

16 (D) Determining and making public cri-
17 teria for identifying which companies, organiza-
18 tions, or researchers qualify for inclusion in the
19 activities of the Center, and inviting entities
20 that fit the criteria to join.

21 (E) Determining jointly with the social
22 media companies what data and metadata re-
23 lated to indicators of foreign adversary threat
24 networks from their platforms and business op-

1 erations will be made available for access and
2 analysis.

3 (F) Developing and making public the cri-
4 teria and standards that must be met for com-
5 panies, other organizations, and individual re-
6 searchers to access and analyze data relating to
7 foreign adversary threat networks within and
8 across social media platforms and publish or
9 otherwise use the results.

10 (G) Developing and making public the eth-
11 ical standards for investigation of foreign threat
12 networks and use of analytic results and for
13 protection of the privacy of the customers and
14 users of the social media platforms and of the
15 proprietary information of the social media
16 companies.

17 (H) Developing technical, contractual, and
18 procedural controls to prevent misuse of data,
19 including any necessary auditing procedures,
20 compliance checks, and review mechanisms.

21 (I) Developing and making public criteria
22 and conditions under which the Center shall
23 share information with the appropriate Govern-
24 ment agencies regarding threats to national se-

1 curity from, or violations of the law involving,
2 foreign activities on social media platforms.

3 (J) Hosting a searchable archive aggregating information related to foreign influence
4 and disinformation operations to build a collective understanding of the threats and facilitate
5 future examination consistent with privacy protections.
6
7
8

9 (K) Developing data standards to harmonize the sharing of information pursuant to
10 this paragraph.
11

12 Secretary of Defense, and the appropriate congres-

9 **SEC. 6607. REPORT ON CLEARANCE IN PERSON CONCEPT.**

10 (a) SENSE OF CONGRESS.—It is the sense of Con-
11 gress that to reflect the greater mobility of the modern

14 of positions that require access to classified information,
15 while still preserving security.

17 after the date of the enactment of this Act, the Security
18 Executive Agent shall submit to the appropriate congres-
19 sional committees and make available to appropriate in-
20 dustry partners a report that describes the requirements,
21 feasibility, and advisability of implementing a clearance in
22 person concept described in subsection (c).

23 (c) CLEARANCE IN PERSON CONCEPT.—The clear-
24 ance in person concept—

1 (1) permits an individual who once held a secu-
2 rity clearance to maintain his or her eligibility for
3 access to classified information, networks, and facili-
4 ties for up to 3 years after the individual's eligibility
5 for access to classified information would otherwise
6 lapse; and

7 (2) recognizes, unless otherwise directed by the
8 Security Executive Agent, an individual's security
9 clearance and background investigation as current,
10 regardless of employment status, contingent on en-
11 rollment in a continuous vetting program.

12 (d) CONTENTS.—The report required under sub-
13 section (b) shall address—

14 (1) requirements for an individual to voluntarily

1 (7) fairness to small companies and inde-
2 pendent contractors.

3 **SEC. 6608. REPORTS ON RECIPROCITY FOR SECURITY**
4 **CLEARANCES INSIDE OF DEPARTMENTS AND**
5 **AGENCIES.**

6 (a) **REPORTS TO SECURITY EXECUTIVE AGENT.**—
7 The head of each Federal department or agency shall sub-
8 mit an annual report to the Security Executive Agent that,
9 with respect to the period covered by the report—

10 (1) identifies the number of individuals whose
11 security clearances took more than 2 weeks for reci-

2 **RITY CLEARANCES.**

4 gress that—

8 sists, both within elements of the intelligence com-
9 munity and in other departments of the Federal
10 Government, with some processing times exceeding a
11 year or even more;

12 (2) the protracted clearance timetable threatens
13 the ability of elements of the intelligence community
14 to hire and retain highly qualified individuals, and
15 thus to fulfill the missions of such elements;

16 (3) the prospect of a lengthy clearance process
17 deters some such individuals from seeking employ-
18 ment with the intelligence community in the first
19 place, and, when faced with a long wait time, those
20 with conditional offers of employment may opt to
21 discontinue the security clearance process and pur-
22 sue different opportunities;

23 (4) now more than ever, therefore, the broken
24 security clearance process badly needs fundamental
25 reform; and

1 (5) in the meantime, to ensure the ability of
2 elements of the intelligence community to hire and
3 retain highly qualified personnel, elements should
4 consider, to the extent possible and consistent with
5 national security, permitting new employees to enter
6 on duty immediately or nearly so, and to perform,
7 on a temporary basis pending final adjudication of
8 their security clearances, work that either does not
9 require a security clearance or requires only a low-
10 level interim clearance.

5 under paragraph (1), a recipient of assistance under
6 this chapter shall—

12 “(B) identify hardware and software that
13 the recipient determines should undergo third-
14 party testing and analysis to mitigate cyberse-
15 curity risks, such as hardware or software for
16 rail rolling stock under proposed procurements;
17 and

18 “(C) utilize the approach described in any
19 voluntary standards and best practices for rail
20 fixed guideway public transportation systems
21 developed under the authority of the Secretary
22 of Homeland Security, as applicable.

23 “(3) LIMITATIONS ON STATUTORY CONSTRUC-
24 TION.—Nothing in this subsection shall be construed
25 to interfere with the authority of—

1 “(A) the Secretary of Homeland Security
2 to publish or ensure compliance with require-
3 ments or standards concerning cybersecurity for
4 rail fixed guideway public transportation sys-
5 tems; or

6 “(B) the Secretary of Transportation
7 under section 5329 to address cybersecurity

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1790), to authorize appropriations for fiscal year 2020 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment that is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

Compliance with rules of the House of Representatives and Senate regarding earmarks and congressionally directed spending items

Pursuant to clause 9 of rule XXI of the Rules of the House of Representatives and Rule XLIV(3) of the Standing Rules of the Senate, neither this conference report nor the accompanying joint statement of managers contains any congressional earmarks, congressionally directed spending items, limited tax benefits, or limited tariff benefits, as defined in such rules.

Summary of discretionary authorizations and budget authority implication

The budget request for national defense discretionary programs within the jurisdiction of the Committees on Armed Services of the Senate and the House of Representatives for fiscal year 2020 was \$741.9 billion. Of this amount, \$642.5 billion was requested for base Department of Defense programs, \$75.9 billion was requested for overseas contingency operations, \$23.2 billion was requested for national security programs in the Department of Energy and the Defense Nuclear Facilities Safety Board, and \$300.0 million for defense-related activities.

The conference agreement would authorize \$729.9 billion in fiscal year 2020, including \$635.0 billion for base Department of Defense programs, \$71.5 billion for overseas contingency operations, \$23.1 billion for national security programs in the Department of Energy and the Defense Nuclear Facilities Safety Board, and \$300.0 million for defense-related activities.

The two tables preceding the detailed program adjustments in Division D of the accompanying joint statement of managers summarize the discretionary authorizations in the agreement and the equivalent budget authority levels for fiscal year 2020 defense programs.

Budgetary effects of this Act (sec. 4)

The Senate bill contained a provision (sec. 4) that would require that the budgetary effects of this Act be determined in accordance with the procedures established in the Statutory Pay-As-You-Go Act of 2010 (title I of Public Law 111-139).

The House amendment contained a similar provision (sec. 1006).

The House recesses.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

BUDGET ITEMS

Columbia-class submarine advance procurement

The budget request included \$1.7 billion in line item 1 of Shipbuilding and Conversion, Navy for *Columbia*-class submarine advance procurement.

The House amendment would authorize an increase of \$125.0 million above the request.

The Senate bill would authorize an increase of \$125.0 million above the request.

The agreement authorizes an increase of \$123.0 million above the request.

The conferees' intent in authorizing additional funds for submarine industrial base expansion is to ensure second- and third-tier contractors are able to meet increased production requirements.

The conferees direct the Secretary of the Navy to notify the congressional defense committees within 30 days of obligating funds provided for submarine industrial base expansion of the: obligation date, contractor name or names, location, description of the shortfall to be addressed, actions to be undertaken, desired end state, usable end items to be procured, period of performance, dollar amount, projected associated savings including business case analysis if applicable, contract name, and contract number.

The conferees believe that expanding the capabilities of the second- and third-tier contractors in the submarine industrial base should lead to greater cost savings and improved efficiency as production increases to meet the *Columbia*-class schedule and higher requirement for *Virginia*-class attack submarines in the Navy's latest Force Structure Assessment.

Virginia-class submarine procurement and advance procurement

The budget request included \$7.2 billion in line number 3 of Shipbuilding and Conversion, Navy (SCN) for *Virginia*-class submarine procurement and \$2.8 billion in line number 4 of SCN for *Virginia*-class submarine advance procurement.

The House amendment would authorize a decrease of \$550.0 million below the request in line number 3 of SCN and the funding level of the request in line number 4 of SCN.

The Senate bill would authorize a decrease of \$2.5 billion below the request in line number 3 of SCN and an increase of \$1.5 billion above the request in line number 4 of SCN.

The agreement authorizes a decrease of \$1.7 billion below the request in line number 3 of SCN and an increase of \$200.0 million above the request in line number 4 of SCN.

The conferees note that the budget request included a plan to procure 11 *Virginia*-class attack submarines across the future years defense program (FYDP). The conferees supported that plan in both the House of Representatives and Senate National Defense Authorization Acts for Fiscal Year 2020. Unfortunately, the conferees have learned from the Navy that the original request was not financially or technically executable. For example, the Navy's request included procuring one boat in each of fiscal years 2020 and 2021 without the *Virginia* Payload Module (VPM). The conferees only recently learned that shifting the configuration to a non-VPM design would have resulted in considerable delay and disruption in building attack submarines, and could have harmed the *Columbia*-class program as well.

The conferees expect budget requests and associated materials to be complete and accurate, with rigorous supporting justification and analysis that demonstrates such requests are fully executable. The conferees further expect that when the Navy finds discrepancies, the Navy will provide timely, full, and open disclosure of such issues. The conferees are concerned that the *Virginia*-class fiscal year 2020 request lacked both accuracy and timely reporting of discrepancies.

The Navy has recently proposed a revised acquisition strategy with 9 *Virginia*-class submarines procured in fiscal years 2019 through 2023, with options to procure additional ships over that period. The conferees priority is to ensure the Navy fully preserves a plan to procure 10 *Virginia*-class attack submarines, nine of which include the VPM, and expects the Navy to budget accordingly in their fiscal year 2021 budget submission. Therefore, the conferees are providing the necessary additional *Virginia*-class advance procurement (AP) and procurement funds, including the AP funds needed to procure two submarines in fiscal year 2021, as submitted in the fiscal year 2020 budget as well as the 30-year shipbuilding plan.

The conferees recognize that due to recent negotiations the required multi-year certification of a ten submarine contract may not be possible, because it is not fully funded across the FYDP. The conferees note that section 2306b of title 10, United States Code, allows the Secretary of Defense to

certify the contract even if all of the requirements are not met. The conferees encourage the Secretary to consider utilizing this authority in order to expeditiously secure a contract for ten submarines.

The conferees regret that they presently lack sufficient budgetary information to support an eleventh *Virginia*-class submarine in the fiscal year 2019 through 2023 timeframe. The conferees would thoroughly consider an opportunity to increase submarine procurement in the future if it were technically and financially executable.

SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

Authorization of appropriations (sec. 101)

The Senate bill contained a provision (sec. 101) that would authorize appropriations for procurement at the levels identified in section 4101 of division D of this Act.

Modification of annual report on cost targets for certain aircraft carriers (sec. 122)

The House amendment contained a provision (sec. 111) that would amend section 126(c) of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328), that requires an annual report on cost reduction efforts for CVN-79 and CVN-80.

The Senate bill contained no similar provision.

Refueling and complex overhauls of the U.S.S. John C. Stennis and U.S.S. Harry S. Truman (sec. 123)

The Senate bill contained a provision (sec. 128) that would require the Secretary of the Navy to carry out the nuclear refueling and complex overhaul of the USS *John C. Stennis* (CVN-74) and USS *Harry S. Truman* (CVN-75). The provision would also authorize the use of incremental funding for a period not to exceed 6 years after advance procurement funds for each nuclear refueling and complex overhaul effort are first obligated.

The House amendment contained no similar provision.

The House recedes.

Ford class aircraft carrier support for F-35C aircraft (sec. 124)

The House amendment contained a provision (sec. 113) that would require the Secretary of the Navy to ensure that the aircraft carrier to be designated CVN-79 is capable of deploying with the F-35 prior to accepting delivery.

Prohibition on use of funds for reduction of aircraft carrier force structure (sec. 125)

The House amendment contained a provision (sec. 114) that would limit the Secretary of Defense from reducing aircraft carrier force structure below the level required by section 5062 of title 10, United States Code.

The Senate bill contained no similar provision.

The Senate recesses.

Modification of prohibition on availability of funds for Navy waterborne security barriers (sec. 126)

The Senate bill contained a provision (sec. 121) that would amend section 130 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232) to extend the prohibition on availability of funds for Navy port waterborne security barriers through fiscal year 2020 and would require the Secretary of the Navy to notify the congressional defense committees if exigent circumstances, under which an exception is granted, are deemed to exist.

The House amendment contained no similar provision.

The House recesses with an amendment that would limit the sustainment, refurbishment, and replacement to not more than 30 percent of portions of existing waterborne security barriers.

LHA Replacement Amphibious Assault Ship Program (sec. 127)

The Senate bill contained a provision (sec. 125) that would authorize the Secretary of the Navy to enter into and incrementally fund a contract for design and construction of the LHA replacement ship designated LHA-9. The provision would also repeal section 125 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364).

The House amendment contained no similar provision.

The House recesses.

Strategic sealift fleet vessel (sec. 128)

The House amendment contained a provision (sec. 118) that would direct the Secretary of the Navy to enter into a contract for one sealift vessel, subject to certain requirements.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would make entering into a contract or other agreement with a private-sector entity under which the entity would serve as the executive agent permissive.

Design and construction of amphibious transport dock designated LPD-31 (sec. 129)

The House amendment contained a provision (sec. 115) that would authorize the Secretary of the Navy to enter into a contract for the amphibious transport dock ship designated LPD-31. Additionally, the Secretary would be authorized to use incremental funding authority to complete the construction.

The Senate bill contained a similar provision (sec. 124).

The Senate recesses.

The conferees' intent is for the Secretary of the Navy to use the \$350.0 million appropriated in Shipbuilding and Conversion, Navy (SCN) line number 13 in fiscal year 2019 and additional fiscal year 2020 funds in SCN line number 12 to procure LPD-31 long-lead material and start construction as efficiently as possible. Consistent with the budget request, the conferees expect the Navy to request the balance of costs for LPD-31 in fiscal year 2021.

Limitation on availability of funds for the Littoral Combat Ship (sec. 130)

In a June 2018 report, the Government Accountability Office

found that the Navy, in many cases, has not taken steps based upon these shipbuilding best practices.

In order to better understand the key aspects of ship design necessary to provide confidence in a program's cost, schedule, and reliability targets, the conferees direct the Comptroller General to conduct a review of shipbuilding design practices. This review shall include an examination of the Navy's design practices for shipbuilding major defense acquisition programs to assess measures of the lead ship or lead ship of a major ship modification's design maturity and stability sufficient to inform an understanding of the construction costs and the effort needed to execute the design, and any other related matters. The Comptroller General shall provide a briefing and report to the congressional defense committees not later than April 1, 2020 and January 1, 2021, respectively, that describe the findings of the review.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the same information pertinent to a major subprogram in the form of a comprehensive report, which the conferees understand would be less burdensome on the Secretary to generate instead of formal acquisition documents that could delay execution of the program using middle-tier rapid-acquisition authorities for the first two procurement lots of aircraft. The amendment would also authorize procurement of long-lead aircraft materials to be procured for all aircraft authorized.

The conferees expect the Secretary of the Air Force to maintain information transparency with the congressional defense committees, and to sufficiently and promptly keep the

congressional defense committees apprised of issues particularly associated with the planning, cost, schedule, execution, fielding, or risk related to the F-15EX program.

The conferees understand USSOCOM has an operational need and requirement for light attack aircraft for combat mission advisor support and as such expect the Secretary of the Air Force in coordination with the Commander of USSOCOM to consider options to synchronize and leverage Light Attack Aircraft experiments efforts to accelerate the procurement or development of aircraft for supporting the Combat Air Advisor mission requirements.

SUBTITLE E—DEFENSE-WIDE, JOINT, AND MULTISERVICE MATTERS

Economic order quantity contracting and buy-to-budget acquisition for F-35 aircraft program (sec. 161)

The House amendment contained a provision (sec. 131) that would authorize the Secretary of Defense to procure economic order quantities of material and equipment for the F-35 program. This section would also authorize the Secretary to procure F-35 aircraft exceeding the quantity otherwise authorized by this Act

if procurement of additional aircraft would not require additional funds to be authorized or appropriated.

The Senate bill contained a similar provision (sec. 153) that would authorize the Secretary of Defense to enter into multiyear procurement contracts for F-35 aircraft in economic order quantities for fiscal year 2021 (Lot 15) through fiscal year 2023 (Lot 17).

The Senate recedes with an amendment that would remove the requirement for the Secretary to provide the congressional defense committees a separate business-case analysis performed by the Office of the Director, Cost Assessment and Program Evaluation.

The conferees also support procurement, by the Secretary of Defense, of additional F-35A aircraft beyond the quantity of F-35A aircraft authorized in this Bill, if such procurement of additional aircraft would mitigate any negative cost and schedule impacts for current F-35 program participants resulting from the actions or decisions of foreign partners or customers currently involved in the F-35 program.

Limitation on availability of funds for reallocation of Turkish F-35A aircraft to the United States (sec. 163)

The conferees support the removal of the Government of Turkey from the F-35 program due to its purchase of the S-400 Russian air defense system. As such, the conferees would support procurement by the Department of Defense of all F-35A aircraft procured by the Government of Turkey. The conferees also encourage the Secretary of Defense to maximize the procurement quantity of Turkish F-35A aircraft associated with Lots 12, 13, or 14 during fiscal year 2020 using the additional funds authorized in section 4101 of this Act.

Additionally, given the significant impact of the sustainment and spare parts deficit currently within the F-35 program, the conferees emphasize the importance of fully funding

spare parts, ancillary mission equipment, publications, and technical data required to sustain F-35 aircraft. Therefore, the conferees recommend a provision that would require the Secretary of Defense to certify that these necessary support equipment items will be procured prior to taking possession of the Turkish F-35A aircraft, and that any Turkish F-35A aircraft will be delivered to the U.S. Air Force in a configuration that allows for integration into the existing Air Force F-35A fleet.

Finally, the conferees direct the Secretary of the Air Force, in consultation with the Undersecretary of Defense for Acquisition and Sustainment and the F-35 Program Executive Officer, to submit a report to the congressional defense committees not later than March 1, 2020, that describes the strategy and implementation plan associated with the necessary funding and actions required during each phase to produce, modernize, deliver, field, operate and sustain the Turkish F-35A aircraft authorized to be procured by the Department of Defense elsewhere in this Act.

The conferees understand that Department of Defense policy will continue to prioritize commonality, open architecture, and non-proprietary systems for current and emerging platform, sensor, and weapons requirements. Repeal of this provision should not be construed as tacit permission to procure proprietary, unique data links for intelligence, surveillance, and reconnaissance (ISR) systems. The conferees expect the Under Secretary of Defense for Acquisition and Sustainment to update the DoD CDL policy dated May 3, 2018, as necessary to emphasize that program priorities, such as the congressionally-mandated migration off the common data link-To Be Sunset (TBS) waveforms, will proceed as previously planned. Further, the conferees expect a detailed accounting from USD A&S on plans to address data link requirements for emerging ISR systems and concepts.

Requiring defense microelectronics products and services meet trusted supply chain and operational security standards (sec. 224)

The Senate bill contained a provision (sec. 233) that would require the Secretary of Defense to establish, by January 1, 2021, supply chain and operational security standards and requirements for microelectronics and require the Department of Defense to purchase microelectronics and related services to the maximum practicable extent from providers that meet these standards.

The House amendment contained a similar provision (sec. 230C).

The House recedes with an amendment that would: (1) Modify the required purchase implementation date; (2) Clarify the purchase requirement definition and specification; (3) Refine the applicability statement; (4) Clarify that suppliers should maintain the ability to sell commercially; and (5) Clarify that the standards be comprised of best practices.

The conferees intend that by incorporating and standardizing best practices the Department will improve its acquisition of securely manufactured, commercially-available products and ensure that a growing industrial base is more resilient to a variety of risks in the supply chain. Relevant best practices include those relating to: manufacturing location; company ownership; workforce composition and access during manufacturing; suppliers' design, sourcing, manufacturing, packaging, and distribution processes; and reliability of the supply chain. Rather than MIL-SPEC style standards that would inhibit the Department's flexibility, the standardization of best practices is intended to strike a balance between security and the cost-effectiveness of commercial solutions.

Development and acquisition strategy to procure secure, low probability of detection data link network capability (sec. 225)

The Senate bill contained a provision (sec. 211, as amended by sec. 5211) that would require the Chief of Staff of the Air Force (CSAF) and Chief of Naval Operations (CNO) to develop a joint development and acquisition strategy to procure a resilient, low latency, and low probability of detection data link network capability that would enable effective operation in the contested environments highlighted in the National Defense Strategy.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment that includes the Chief of Staff of the Army as part of the requirement.

The conferees are concerned about an absence of coordinated effort by the Department and the military services

on resilient, anti-jam, low probability of intercept/low probability of detection (LPI/LPD) communications. The conferees note that Congress previously directed a similar strategy on LPI/LPD data links in the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115- 91). The Department's response was incomplete and inadequate, recommending no change to current Department policy that designates the F-35's Multifunction Advanced Data Link (MADL) as the solution for 5th to 4th generation air platform networked communications. Both the Navy and Air Force acknowledge that the aircraft modifications needed to install MADL are unaffordable at scale. A January 2019 memorandum signed by all three service secretaries commits the military services to common data standards to ensure interoperability across the joint force. While this is a positive step, the conferees believe progress on the specific LPI/LPD communications issue requires additional leadership and attention from both the Department and the military services. The conferees expect a more comprehensive and executable response to this legislative provision and subsequent investment in the Fiscal Year 2021 budget submission.

The Senate bill contained no similar provision.

The Senate recedes with amendments that would further elaborate the governance process and that would further define the scope of the demonstration and selection of programs to participate, as well as clarifying amendments to the roles and responsibilities of officials and organizations and technical amendments to the reporting requirements.

The conferees believe that establishing a digital engineering capability is critical to accelerating the adoption of best practices in the use of software to model and simulate complex system behavior to assess potential effects of proposed hardware or software engineering changes on system performance. Further, the conferees note the significant potential value of

digital engineering capability for automating developmental and operational test and evaluation, and especially where a weapon or business system is software-defined and is developed using agile or secure continuous development/continuous delivery methods.

The conferees understand this concept, the Advanced Battle Management System family of systems, envisions several existing airborne and ground intelligence, surveillance, and reconnaissance (ISR) and command and control systems connected by resilient, protected communications and data links. Given the intended capability of ABMS, the conferees believes the Air Force should consider prototyping and demonstrating the utility of artificial intelligence and automated sensor fusion as part of the ABMS concept.

The conferees note that there are numerous properties formerly under the jurisdiction of the Department of the Army, such as former Nike missile sites, that have been transferred to units of local governments and may remain polluted due to Department of Defense activity. The House amendment contained no similar provision.

The Senate recesses.

The conferees note that the joint logistics enterprise of the Armed Forces faces high-end threats from strategic competitors - China, Russia, and Iran - all of which have invested in anti-access area denial capabilities and gray zone tactics. As such, the conferees believe that resilient and agile logistics are necessary to implement the 2018 National Defense Strategy because it enables the United States to project power and sustain the fight against its strategic competitors in peacetime and during war.

Additionally, there are significant logistics shortfalls, as outlined in the November 2018 final report of the Defense Science Board Task Force on Survivable Logistics, which, if left unaddressed, would hamper the readiness and ability of the Armed Forces to conduct operations globally. The conferees believe that since the military departments have not shown a strong commitment to funding logistics, the Secretaries of the military departments should review the full list of recommendations in the report and address the chronic underfunding of logistics relative to other priorities.

The House amendment contained a similar provision (sec. 548).

The House recesses.

The conferees request the DAC-IPAD review, as appropriate, whether other justice programs (e.g., restorative justice programs, mediation) could be employed or modified to assist the victim of an alleged sexual assault or the alleged offender, particularly in cases in which the evidence in the victim's case has been determined not to be sufficient to take judicial, non-judicial, or administrative action against the perpetrator of the alleged offense.

Further, the conferees recognize the importance of providing survivors of sexual assault an opportunity to provide a full and complete description of the impact of the assault on the survivor during court-martial sentencing hearings related to the offense. The conferees are concerned by reports that some military judges have interpreted Rule for Courts-Martial (RCM) 1001(c) too narrowly, limiting what survivors are permitted to say during sentencing hearings in ways that do not fully inform the court of the impact of the crime on the survivor.

Therefore, the conferees request that, on a one-time basis, or more frequently, as appropriate, and adjunct to its review of court-martial cases completed in any particular year, the DAC-IPAD assess whether military judges are according appropriate deference to victims of crimes who exercise their right to be heard under RCM 1001(c) at sentencing hearings, and appropriately permitting other witnesses to testify about the impact of the crime under RCM 1001.

Any such request on the part of the victim would not affect the restricted nature of the victim's report of sexual assault. The provision also would require a Sexual Assault Response Coordinator or Sexual Assault Prevention and Response Victim Advocate to inform the victim of his or her right to request the return of personal property under these procedures, but that any such return might

negatively affect a subsequent adjudication of the case, should the victim later decide to convert the restricted report to an unrestricted report. The provision would not affect the requirement to retain a sexual assault forensic examination kit for the period required in law.

The Senate bill contained no similar provision.

The Senate recesses. The conferees note the provision authorizing some servicemembers to transfer their education benefit was originally included as part of the Post-9/11 Veterans' Educational Assistance Act of 2008 (Public Law 110-252) to serve as a retention incentive. Section 3319 of title 38, United States Code, is explicit in stating the purpose of the transferability provision is to "promote recruitment and retention in the uniformed services." Therefore, the conferees fully expect the Department of Defense to require that any servicemember who requests, and is authorized, to transfer their education benefits serve the mandated four additional years as a member of the uniformed services. This payback period should be applied in all cases, regardless of when a servicemember actually elects to transfer their benefits.

While this provision prohibits the Department of Defense from imposing a general limit on transferability based on the number of years served, the overall authority on whether to grant an individual servicemember's request to transfer benefits remains entirely at the service secretary's discretion. The conferees encourage service secretaries to develop policies that properly treat transferability as one of many possible recruiting and retention tools to attract and keep high-quality servicemembers.

The Senate recesses with an amendment that would clarify the direct hire authority for Department of Defense childcare development centers to include family childcare coordinator services and school age childcare coordinator services. Additionally, the provision would require the Secretary of Defense to take remedial action if necessary to reduce waiting lists for childcare at military installations and to provide a report to the Committees on Armed Services of the Senate and the House of Representatives on any action taken or any additional resources necessary to increase access to childcare. The provision also would require that in the case of a member intending to vote in a State that does not accept the Federal write-in absentee ballot as a simultaneous application and ballot for Federal elections, the member would be provided a briefing on, and an opportunity to fill out the official post-card form for absentee voter registration application and absentee ballot application prescribed in law. The provision concludes with a Sense of Congress relating to the use of the Federal write-in absentee ballot.

The House recesses with an amendment that would require a Voting Assistance Officer or other person designated by the secretary of the military department concerned, to provide a Federal write-in ballot to a member of the Armed Forces, upon the request of that member. Further, in the case of a member intending to vote in a State that does not accept the Federal write-in absentee ballot as a simultaneous application and ballot, the member would be provided instructions on, and an opportunity to fill out, the official post-card form.

The conferees urge the Federal government and State governments to remove all obstacles that would inhibit deployed

servicemembers from voting. Further, the conferees strongly advocate that States that do not allow servicemembers to use the Federal write-in absentee ballot as a simultaneous application and acceptable ballot for Federal elections modify their laws to permit such use.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Director of the Federal Voting Assistance Program to include in the feasibility study report, a method to determine under the pilot program if a ballot was counted, and to provide that information to the servicemember casting the vote, and a description of the efforts being undertaken to ensure a reliable and secure military ballot tracking system.

Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398).

The conferees encourage the Secretaries of the military departments to consult with the Valor Medals

Review Task Force to identify those service records that warrant further review to determine whether such veteran should be recommended for an upgrade to the Medal of Honor for valor.

The results of the study shall be reported to the Committees on Armed Services of the Senate and the House of Representatives.

Report on oversight of authorized strengths of certain grades of commissioned regular and reserve officers of the Armed Forces (sec. 595)

The Senate bill contained a provision (sec. 501) that would amend section 523 of title 10, United States Code, to require the Congress to authorize annually the number of officers serving on Active Duty in the grades of major, lieutenant colonel, and colonel in the Army, Air Force, and Marine Corps or lieutenant commander, commander, and captain in the Navy.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and the House of Representatives on alternative methods to improve the oversight of authorized strengths of commissioned regular and reserve officers of the Armed Forces.

The conferees note the officer strength table was included as a fundamental feature of the Defense Officer Personnel Management Act (DOPMA) (Public Law 96-513). The table was designed to serve as an effective limitation on the number of mid-grade officers within each service. The House report to accompany the legislation (H. Rept. 96-1462) explained that the table would be adjusted over time to align with emerging officer manpower requirements. However, in practice, the authorized strength table is rarely updated and it is no longer linked to strategy or actual officer requirements.

Report on certain waivers (sec. 596)

The House amendment contained a provision (sec. 597) that would require the Department of Defense to submit an initial report (within 120 days of the enactment of this Act) and an annual report for 2 years thereafter, to the Committees on Armed Services of the Senate and the House of Representatives, setting forth detailed information about the number of transgender applicants and serving transgender servicemembers who, in the prior calendar year, sought and received a waiver or exception to current Defense Department policy to permit their enlistment/accession or retention in the military. The reporting would require the Department to distinguish between waivers requested by "exempt" persons—applicants or servicemembers "grandfathered" under the policies for military service by transgender persons enacted in June 2016, and "non-exempt" persons—who are subject to the policy on transgender service that that took effect on April 12, 2019.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would modify the data elements required to be included in the report and would clarify that any report submitted will not include Personally Identifiable Information or Protected Health Information.

The conferees note that the new Department of Defense policy with regard to military service by transgender persons expressly asserts that "[t]ransgender persons may seek waivers or exceptions [to the standards established by DTM-19-004], or any other standards, requirements, or policies, on the same terms as any other person." As regards a transgender person's request for a waiver or exception to policy to permit that individual to serve in the military in other than his or her biological sex, the Secretaries of the Military Departments may delegate waiver authority no lower than a Military Service Personnel Chief. The conferees note that all other waiver authority vests in the regular Service-designated waiver authority, affording transgender persons consideration at the

same level of decision-making as persons who are not transgender.

In determining whether an applicant with a disqualifying diagnosis of gender dysphoria or history of gender transition treatment or surgery merits a waiver to permit his or her service in the military, the conferees encourage Service-designated waiver authorities to consider such a waiver under the same circumstances as they would for an applicant who is not transgender, but has been diagnosed with analogous conditions or received analogous treatments, presuming the individual meets all other standards for accession.

The conferees note that the Department of Defense provides resources, including unmanned and manned aerial systems, at the request of States, territories, and other Federal agencies for emergency operations, search and rescue operations, and Defense support to civil authorities. However, the conferees note that there is a lack of understanding on the policy, procedures, and overall availability of these resources to provide such requested support.

Information for members of the Armed Forces on availability of services of the Department of Veterans Affairs relating to sexual trauma (sec. 599)

The House amendment contained a provision (sec. 745) that would require the Secretary of Defense to use available mechanisms to inform members of the Armed Forces of their eligibility for services provided by the Department of Veterans Affairs. The Junior Reserve Officers' Training Corp, and programs like it, can serve as catalysts to overcoming these systemic shortages by providing an extra-curricular experience to young Americans who demonstrate a penchant for computer science and related subjects. The conferees encourage the Secretary of Defense to partner with other Federal, State, and local organizations in developing new programs to better prepare the nation's youth for the workforce of the future.

The House recedes.

The conferees reiterate the importance of the National Guard Youth Challenge Program and good work the program accomplishes. The Senate bill contained no similar provision.

The House recesses.

The conferees note that reserve component full time support personnel are expressly provided by law to organize, administer, recruit, instruct, or train reserve component units and personnel. To provide an exception to this long-standing requirement would be to undermine the necessary distinction between the active and reserve components.

Enactment and expansion of policy on withholding of initial disposition authority for certain offenses under the Uniform Code of Military Justice

The Senate bill contained a provision (sec. 522) that would vest only in a commissioned officer in a grade not below O-6, who is authorized to convene special courts-martial, the authority to determine the disposition of specified offenses under the Uniform Code of Military Justice (Chapter 47 of title 10, United States Code).

Generally, if such an officer's disposition determination differs from the recommendation made by the officer's legal advisor, the matter would be referred to a Special Victim Prosecutor, Senior Trial Counsel, or Regional Trial Counsel not in the chain of command of the officer making the initial disposition determination for review and recommendation to a staff judge advocate in the chain of command. The provision would define minor collateral misconduct as including: (1) Improper use and possession of alcohol; (2) Consensual intimate behavior, including adultery or fraternization; (3) Presence in off-limits areas; and (4) Other misconduct specified in the regulations promulgated.

The Senate recesses.

The conferees encourage the military department boards for the correction of military or naval records to apply their powers of equity broadly to redress injustices in the military

records of a servicemember or former member, and in appropriate cases--as authorized by law or established in board precedent--to accord liberal consideration to the evidence and information presented by or on behalf of the member or former member. In the view of the conferees, such liberal consideration is particularly warranted in cases in which official military records pertinent to the member's application for relief have been destroyed or are otherwise unavailable, through no fault of the member.

The House recesses.

The conferees note that the Services already have the authority to ensure qualified military service academy applicants who do not receive an offer of admission are able to receive a scholarship through the Reserve Officers' Training Corps (ROTC). The Secretaries of the military departments are encouraged to develop creative policies to ensure that those young Americans who have demonstrated their propensity to serve in the military by applying to a service academy are able to qualify for and access ROTC scholarships.

The Senate bill contained a provision (sec. 558) that would require the Secretary of Defense to conduct a periodic

survey—at least once every 4 years but not more frequently than once every 2 years—to be known as the Military Investigation and Justice Experience Survey, on the experience of members of the Armed Forces with military investigations and military justice. Those surveyed would include members of the Armed Forces who are victims of an alleged sex-related offense and who made an unrestricted report of that offense. Participants would be surveyed on their experience with a Special Victims' Counsel/Victims' Legal Counsel and, if charges in the victim's case were referred to court-martial, with the prosecutor and the court-martial in general.

The House amendment contained no similar provision.

The Senate recesses.

The conferees note that the Department already has implemented a Military Investigation and Justice Experience Survey, and encourage the Department to continue to enhance this survey; to monitor trends revealed by survey responses and data over time; as appropriate, to take action to improve military investigations, the Special Victims' Counsel/Victims' Legal Counsel programs, and prosecution processes to address matters raised by survey responses and data; and to include information and insights derived from the survey, when salient, in future briefings and reports to the Congress.

from the Academy for reasons of criminal misconduct, at any time prior to graduation.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that in accordance with section 2005 of title 10, United States Code, and section 303a(e) of title 37 of the Code, the secretaries of the military departments already are vested with authority to recoup the costs of advanced education at a military service academy from a cadet who is separated from the academy prior to graduation. As appropriate, the conferees encourage the secretaries of the military departments to require cadets and midshipmen separated from a military service academy for criminal misconduct to repay the costs of their advanced education, even if the cadet or midshipman is separated prior to having completed 2 years of schooling.

Support of military service academy foundations

The House amendment contained a provision (sec. 560D) that would amend chapter 155 of title 10, United States Code, to authorize service secretaries to provide support to certain non-profit fundraising foundations that operate exclusively to support military service academies.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that the primary funding source for military service academies remains appropriated Federal dollars. Each academy currently receives significant additional support from several dedicated non-profit organizations. While academy superintendents may be formally prohibited from engaging in fundraising on behalf of these private organizations, that restriction helps to maintain a healthy separation between the federally funded military institution and private organizations that are not subject to Federal oversight. The conferees are encouraged that the current arrangement between the academies and their non-profit fundraising foundations has resulted recently in each academy opening new, privately funded, facilities for cadet and midshipmen athletics, character development, and cyber education.

Consecutive service of service obligation in connection with payment of tuition for off-duty training or education for commissioned officers of the Armed Forces with any other service obligations

The Senate bill contained a provision (sec. 566) that would amend section 2007 of title 10, United States Code, to require that an Active-Duty service obligation incurred by an officer for the acceptance of tuition assistance for off-duty training or education be served sequentially with any other service obligation already incurred by the officer.

The House amendment contained no similar provision.

The Senate recesses.

The conferees note that section 2007 of title 10, United States Code, requires officers who accept tuition assistance to remain on Active Duty for a period of at least two years after the completion of the education for which tuition assistance was used. In fiscal year 2018, the Department of Defense provided tuition assistance to approximately 15,000 Active Duty commissioned officers at a cost of almost \$31 million. According to the Government Accountability Office, around 10 percent of Army and Navy officers who last used tuition in 2017 are now separated from the military. The median number of years served after these officer's last use of tuition assistance was 1.6 years for Army officers and only 1.2 years for Navy officers. These statistics suggest that tuition assistance may not be serving one of its intended purposes, which is to provide a valuable benefit in exchange for continued military service.

Therefore, the conferees direct the Secretary of Defense in consultation with the secretaries of the military departments to conduct an analysis of the officer voluntary tuition assistance program. The analysis should include: (1) An evaluation of whether the tuition assistance program is serving

as a retention tool; (2) A discussion of the merits of lengthening or requiring active duty service obligations incurred as a result of accepting tuition assistance be served consecutively with other service commitments; and (3) An assessment of whether those officers who receive a fully funded bachelor's degree through their commissioning source should be eligible to receive voluntary tuition assistance funding prior to the completion of their initial Active Duty service obligation.

The results of this analysis shall be submitted to the Committees on Armed Services of the Senate and House of Representatives by April 1, 2020.

SUBTITLE D—DEFENSE RESALE MATTERS

The Senate bill contained a provision (sec. 641) that would require the Under Secretary of Defense for Personnel and Readiness, in coordination with the Chief Management Officer of the Department of Defense, to maintain oversight of the business transformation efforts of the defense commissary system and the exchange stores system to ensure: (1) Development of an inter-component business strategy that maximizes efficiencies and results in a viable defense resale system in the future; (2) Preservation of patron savings and satisfaction from and in the defense commissary system and exchange stores system; and (3) Sustainment of financial support of the defense commissary and exchange systems for morale, welfare, and recreation services of the Armed Forces. The provision would require the Executive Resale Board of the Department to advise the Under Secretary on the implementation of sustainable, complementary operations of the defense commissary system and the exchange stores system. Additionally, the provision would require the Defense Commissary Agency and the Military Exchange Service to identify and implement best commercial business practices and shared-services systems while integrating certain services provided by the exchange stores system within commissary system facilities. The provision would also require the modernization of information technology and implementation of cutting-edge marketing in the defense resale system. The Comptroller General would submit a report by April 1, 2020, to the Committees on Armed Services of the Senate and the House of Representatives. The provision would prohibit the Secretary of Defense from taking any action to consolidate military exchanges and commissaries until such committees notify the Secretary in writing of receipt and acceptance of the findings of the Comptroller General in the reports required under this provision.

The provision would require the first report to cover the 5-year period preceding the year in which the report is submitted.

The House contained a similar provision (sec. 609), with an added requirement that the report be posted on a publicly available Internet website of the Department of Defense no later than 30 days after it has been submitted to Congress.

The Senate recesses with an amendment that would require that each report be generated in consultation with the Secretary of State, who takes final action on requests for waiver of the prohibition on the acceptance of emoluments, offices or titles from foreign governments, and removes the requirement for public posting of reports.

The House amendment contained a provision (sec. 610A) that would require the Secretary of Defense to submit a report to the congressional defense committees evaluating whether members of the uniformed services located in the territories of the United

Report on implementation of contributions to the Department of Defense Military Retirement Fund based on pay costs per Armed Force rather than on Armed Forces-wide basis (sec. 655)

The Senate bill contained a provision (sec. 631) that would amend section 1465 of title 10, United States Code, to require the Secretary of Defense to make contributions to the Military Retirement Fund based on an actuarial calculation of each service's planned pension obligations, beginning with fiscal year 2021.

The House amendment contained no similar provision.

The House recesses with an amendment that would require the Secretary of Defense to deliver a report to the congressional defense committees detailing an implementation plan for the

Senate-passed provision that would require service-specific contributions to the Military Retirement Fund.

The conferees note that requiring service-specific contributions to the Military Retirement Fund will provide valuable insight into the true costs of each military department's manpower. The current system of Military Retirement Fund contributions produces a disparity between the services. Those services with fewer personnel who reach full retirement eligibility, like the Marine Corps, contribute more to the Military Retirement Fund than needed to pay for retired marines' pensions. Meanwhile, those services that have larger numbers of personnel who reach full retirement eligibility, like the Air Force, effectively receive a discount on their Military Retirement Fund contributions.

As each service updates its overall force profile to support the National Defense Strategy and implements other reforms, like those to the Blended Retirement System, the conferees believe it is critical that senior leaders in the DOD accurately account for the fully-burdened life-cycle cost of each service's manpower plans.

Report on food insecurity among members of the Armed Forces and their dependents (sec. 656)

The House amendment contained a provision (sec. 602) that would amend section 402 of title 37, United States Code, to authorize the Secretary of Defense to pay a basic needs allowance to a qualified servicemember.

LEGISLATIVE PROVISIONS NOT ADOPTED

Basic allowance for housing for a member without dependents when relocation would financially disadvantage the member

The House amendment contained a provision (sec. 604) that would allow the Secretaries of the military departments discretionary authority to authorize a housing allowance based on the old homeport or permanent duty station for single members disadvantaged as a result of a unit's change of homeport or permanent duty station, as long as the member had orders returning to the previous homeport or duty station.

The Senate bill contained no similar provision.

The House recesses.

The conferees note, in general, the Navy plans ship homeport changes well in advance of the actual relocation occurring. In the same way, the Navy should also plan personnel movements related to homeport changes well in advance in order to minimize disruption to sailors. The conferees note that current law does not require Basic Allowance for Housing be based on a ship's homeport, and would encourage the Navy to work with the Department of Defense to develop a policy solution that provides the necessary authority.

Annual adjustment of basic pay

The House amendment contained a provision (sec. 607) that would require the adjustment in rates of monthly basic pay required by subsection (a) of section 1009 of title 37, United States Code, to take effect, notwithstanding any determination made by the President.

The House recesses.

Space-available travel on military aircraft for children and surviving spouses of members who die of hostile action or training duty

The House amendment contained a provision (sec. 626) that would amend section 2641 of title 10, United States Code, to allow children meeting certain requirements and surviving spouses of members of the Armed Forces who die as a result of hostile action or training duty to use space-available travel.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that section 2641b of title 10, United States Code, authorizes the space-available travel program and provides the Secretary of Defense with the ability to extend eligibility for the program to any category of individual the Secretary considers appropriate. The conferees believe that space-available travel privileges should be extended to spouses and children of servicemembers who die in combat, if there is no impact on readiness or on the priority appropriately afforded to members of the armed forces on active duty and their families, in recognition of the demands of active military service and the need for respite from such demands. Accordingly, the conferees direct the Secretary to report to the Committees on Armed Services of the Senate and the House of Representatives by no later than March 1, 2020, on the scope of the population

described in section 626 of the House bill, the obstacles in providing this population with space-available privileges, and whether an extension of this benefit to such population would interfere with the use of space-available travel by active duty members and their families, particularly on the most traveled routes.

Report regarding management of military commissaries and exchanges

The House amendment contained a provision (sec. 632) that would require the Secretary of Defense to submit a report to the congressional defense committees, not later than 180 days after the date of the enactment of this Act, regarding management practices of military commissaries and exchanges.

The Senate bill contained no similar provision.

The House recesses.

Treatment of fees on services provided as supplemental funds for commissary operations

The Senate bill contained a provision (sec. 5642) that would cause section 642, and the amendment made by that section, to have no cause or effect.

The provision would authorize the Secretary of Defense to determine the method and frequency of payment when circumstances prevent payment through an allotment from retired, retainer, or equivalent pay. The amendments in this provision would apply to health care coverage beginning on or after January 1, 2021.

The House amendment contained no similar provision.
The House recesses.

Lead level screening and testing for children (sec. 703)

The Senate bill contained a provision (sec. 703) that would require the Secretary of Defense to establish and disseminate clinical practice guidelines for health care providers in the military health system on screening, testing, and reporting of blood lead levels in children. The provision would require the Secretary to share test results similarly as prescribed in the Senate provision. In addition, the provision would require the Secretary to submit a similar report to the

same committees by the same date and to require the Comptroller General of the United States to submit a report to those committees, not later than January 1, 2022, on the effectiveness of screening, testing, and treating children for lead exposure and lead poisoning. Finally, the provision would require the Secretary to maintain records regarding military housing and lead-based paint.

The provision would require the Secretaries of Defense and Veterans Affairs to enter into a joint memorandum of understanding to share results of such assessments regarding a servicemember's exposure to toxic airborne chemicals or contaminants and to enroll such servicemember in the named registry unless the member elects not to enroll.

The Senate bill contained a similar provision (sec. 5702).

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Over the past four years, Congress has enacted several provisions designed to guide the Department of Defense in implementing a major reform of the military health system to make it more effective, efficient, and less costly. These enactments require replacement of the semi-autonomous Service-run components of the system with a single accountable organization, the Defense Health Agency, responsible for managing an integrated health care system that includes all military medical treatment facilities in the direct care system, with a sharper focus on military medical readiness, and the purchased care system, with an emphasis on maximum value and the attainment of better health outcomes for beneficiaries and the Department. Under this construct, the responsibility of the military departments is to recruit, retain, organize, and develop the military medical force and to make it available to combatant commands when needed to support military operations or otherwise to the Defense Health Agency. The conferees are aware of a lack of consensus in the Department on implementing the reforms required by law but see no reason to change direction. The conferees expect the Secretary of Defense to fully implement the law and to accomplish these critically important reforms expeditiously.

Support by military health system of medical requirements of combatant commands (sec. 712)

The Senate bill contained a provision (sec. 712) that would amend section 712 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-332) to modify and clarify the military health system's support to the medical requirements of the combatant commands.

**TITLE VIII—ACQUISITION POLICY, ACQUISITION
MANAGEMENT, AND RELATED MATTERS**

**SUBTITLE A—ACQUISITION POLICY AND
MANAGEMENT**

Authority for continuous integration and delivery of software applications and upgrades to embedded systems (sec. 800)

The Senate bill contained a provision (sec. 852) that would require the Secretary of Defense to establish initial guidance, not later than 180 days after the enactment of this Act, authorizing the use of special pathways for the rapid acquisition of software applications and upgrades that are intended to be fielded within 1 year. These new pathways would prioritize continuous integration and delivery of working software in a secure manner and prioritize continuous oversight from automated analytics.

The House amendment contained a similar provision (sec. 801).

The House recedes with amendments that would modify the timeline for developing the guidance; allow for the use of one or more pathways; clarify that first fielding of capability for operational use shall occur within one year of the date funds are first obligated for software development; and direct a report on use of the authority and recommendations for any changes to statute by October 15, 2020.

The conferees commend the Under Secretary of Defense for Acquisition and Sustainment's commitment to adopting the recommendations of the Defense Innovation Board. The conferees emphasize that the ability to deliver meaningful capability for operational use within one year is foundational to the establishment of this authority and associated procedures. The conferees remind the Department that delivery of increments of useful software capability no less frequently than every six months is not only a best practice for software-intensive systems but it has also been a standing government-wide requirement for years. Overcoming the Department's institutional and cultural resistance to delivering in a year or less requires ruthless prioritization of features, which hinges on more effective cooperation among stakeholders. The conferees also believe that cost estimation and assessment and program evaluation methods are critical to well-informed program oversight, and note that, for software initiatives, such approaches remain nascent. The conferees therefore direct the Director, Cost Assessment and Program Evaluation, in coordination with the Defense Digital Service and the directors of developmental test and operational test and evaluation, to incorporate lessons learned from the implementation of sections 873 and 874 of the National Defense Authorization Act for Fiscal Year 2018, and sections 215 and 869 of the National Defense Authorization Act for Fiscal Year 2019 in the development of guidance and oversight procedures for managing, estimating, and assessing software programs. First, the conferees remind the Department of flexibility already written into its directive and instruction that the milestone decision authority and program managers "shall tailor program strategies and oversight, including documentation of program information, acquisition phases, the timing and scope of decision reviews, and decision levels, to fit the particular conditions of that program, consistent with applicable laws and regulations and the time sensitivity of the capability need." Accordingly, the conferees also remind the Department that the use of source lines of code, or "SLOC", to estimate or to measure productivity, is inadequate, inappropriate, and can be detrimental in incentivizing bad code design. As such, the conferees encourage the Department to implement the recommendations on software

metrics in the Defense Innovation Board Software Acquisition and Practices Study. Finally, the conferees request a briefing no later than March 30, 2020 from the Joint Staff on how the JCIDS process can be updated to accommodate more flexibility given the iterative and ever-changing nature of present-day acquisition of software.

Pilot program on intellectual property evaluation for acquisition programs (sec. 801)

The Senate bill contained a provision (sec. 801) that would permit the Secretary of Defense and the Secretaries of the military departments to jointly carry out a pilot program to assess mechanisms to evaluate intellectual property in acquisition programs.

The House recedes with an amendment which clarifies the selection of programs and activities to be carried out under the pilot.

Pilot program to use alpha contracting teams for complex requirements (sec. 802)

The Senate bill contained a provision (sec. 802) that would require the Secretary of Defense to establish a pilot program to use third-party industry, academia, or not-for-profit technical organizations as part of alpha contracting teams for complex technical requirements for services.

The House amendment contained no similar provision.

The House recedes.

The conferees note that this construct revives in a modern context the "alpha contracting" concept that is more than a decade old. Further, it brings together all government personnel involved in the functions that support acquisition actions, to include contracting staff as well as technical staff, operators, and cost personnel. This is intended to ensure that technical requirements are appropriately valued and that the most effective acquisition strategy to achieve these requirements is identified.

Failure to provide other than certified cost or pricing data upon request (sec. 803)

The House amendment contained a provision (sec. 803) that would modify section 2306a of title 10, United States Code, to revise the conditions under which the Department of Defense

requires offerors to provide certain data. Specifically, in a case where the head of contracting activity determines the Department is the only buyer of certain commercial items, it introduces a new requirement for those offerors to provide cost or pricing data. Further, in a case where the Department of Defense is determining whether a sole-source offeror's price is reasonable, the provision would direct the Secretary of Defense to require that offeror to provide other than certified cost or pricing data. The provision would further direct the Defense Contract Management Agency to propose which commercial products require should-cost analysis before award.

The House amendment contained a another provision (sec. 804) that would modify section 2306a(c) of title 10, United States Code, and section 3504 of title 41, United States Code, to give contracting officers, instead of the head of the procuring activity, the discretion to request certified cost or pricing data in cases where, although not required, the contracting officer deems it necessary to determine price reasonableness. The provision would further add commercial items to the list of products where contracting officers may request such data.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would combine the two provisions, to instead modify section 2306a(d) of title 10, United States Code, to specify that offerors who do not make a good faith effort to comply with a contracting officer's reasonable requests for data other than certified cost or pricing data are ineligible for award. The amendment would also direct contracting officers, when determining whether an offeror's price is fair and reasonable, to not base that assessment solely on the historical prices paid by the government. The amendment would further add a requirement for the Under Secretary of Defense for Acquisition and Sustainment to identify and report those offerors who denied multiple such requests and nonetheless received awards, as part of assessing whether to conduct should-cost analysis on such products in the future.

The provision would further require the Comptroller General of the United States to submit a report on the Department's use of fixed-price contracts over time no later than February 1, 2021. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232). That law authorized the Secretary of Defense to reform and accelerate the contracting and pricing processes for 10 programs on a pilot basis. The amendment would remove the 10-program limitation and would delay the program's sunset from January 2, 2021, to January 2, 2022.

The House amendment contained no similar provision.
The House recesses.

Uniformity in application of micro-purchase threshold to certain task or delivery orders (sec. 826)

The Senate recesses with amendments that replace the requirement for a five-year test program with a requirement for cost estimates, and directs that the estimates be submitted within a year after the first contracts are awarded under the program.

In implementing this section, the conferees do not intend to require the Administrator to provide independent government cost estimates, but rather a range of potential costs or a general order of magnitude for each model.

SUBTITLE C—PROVISIONS RELATING TO MAJOR DEFENSE ACQUISITION PROGRAMS

Modification of requirements for reporting to Congress on certain acquisition programs (sec. 830)

The House amendment contained a provision (sec. 893) that would exclude the selected acquisition reports required by section 2432 of title 10, United States Code, from the reports that will sunset under section 1080 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92). The provision would also require the Secretary of Defense to propose an alternative for reporting the status of major defense acquisition programs and other acquisition activities that would include information on cybersecurity tests, software development metrics, and quality metrics for software.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would require selected acquisition reports for any defense program estimated to require a total expenditure of more than \$300.0 million for research, development, test and evaluation or a total

expenditure of more than \$1,800.0 million for procurement through fiscal year 2021 and that would clarify the requirement for the Secretary of Defense to report on alternatives models and thresholds for congressional reporting on acquisition programs.

Pilot program to streamline decision-making processes for weapon systems (sec. 831)

The Senate bill contained a provision (sec. 808) that would require the service acquisition executive for each military department to recommend at least one major defense acquisition program to participate in the pilot program to streamline decision-making processes not later than February 1, 2020.

The House amendment contained no similar provision.

The House recesses with a technical amendment.

The conferees direct the Under Secretary of Defense for Acquisition and Sustainment to brief the congressional defense committees not later than May 1, 2020, on the acquisition programs selected for the pilot program, the associated action plans and timelines for each program, and the manner in which each program conforms to the required elements of the pilot program.

The House amendment contained no similar provision.

The House recesses with an amendment that would direct the Under Secretary of Defense for Acquisition and Sustainment to assess how the Department conducts analyses of alternatives.

Naval vessel certification required before Milestone B approval (sec. 833)

The Senate bill contained a provision (sec. 821) that would require a certification of compliance with section 8669b

of title 10, United States Code, for naval vessel programs prior to Milestone B approval.

The House amendment contained no similar provision.

The House recesses.

SUBTITLE D—PROVISIONS RELATING TO THE ACQUISITION SYSTEM

Extramural acquisition innovation and research activities (sec. 835)

The House amendment contained a provision (sec. 861(1)) that would amend chapter 97 of title 10, United States Code, to establish an academic center for acquisition innovation at the Naval Postgraduate School to provide decision-makers with academic analyses and policy alternatives for innovating the defense acquisition system.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would direct the Secretary of Defense to establish extramural acquisition innovation and research activities to include an acquisition research organization within a non-Federal civilian university or college, to provide and maintain essential research and development capabilities through a long-term, strategic relationship with the Department of Defense.

Report on realignment of the defense acquisition system to implement acquisition reforms (sec. 836)

The House amendment contained a provision (sec. 822) that would direct the Secretary of Defense to provide a briefing to the committee on lessons learned through the use of the authority provided under section 804 of the National Defense Authorization Act for Fiscal Year 2016 (10 U.S.C. 2302 note) commonly known as "Middle-Tier of Acquisition," to include certain risks and how the lessons are applicable to procedures for acquiring major defense acquisition programs.

The Senate bill contained no similar provision.

The Senate recesses with amendments that instead require the Secretary of Defense to report on ongoing efforts to realign the whole Defense Acquisition System in response to recent reforms - through changes to the 5000 series of directives, instructions, guidance and procedures and to address certain elements in the report.

The conferees appreciate the careful consideration the Department is giving to implementing the acquisition reforms

legislated through these Acts over the last five years. In doing so, the conferees note that the Department of Defense can no longer afford to use cost, schedule, and performance thresholds as simple proxies for risk when designating the path an acquisition program travels through the Defense Acquisition System, and in organizing how programs are managed and overseen. Exclusive attention to cost, schedule, and performance of major defense acquisition programs and other development programs obscures a myriad of other risks in programs large and small, any one of which could be single points of failure for successful acquisition. Such risks include: technical risks such as engineering, software, manufacturing and testing; integration and interoperability risks - complicated by the implications of systems working across multiple domains while using machine learning and artificial intelligence capabilities to continuously change and optimize system performance; operations and sustainment risks - mediated by access to technical data and intellectual property rights; workforce and training risks - to include consideration of the role of contractors as part of the total workforce; and supply chain risks - to include cybersecurity, foreign control and ownership of key elements of supply chains, and the consequences a fragile and weakening defense industrial base, combined with barriers to industrial cooperation with allies and partners pose for delivering systems and technologies in a trusted and assured manner. Finally, the Secretary's report under this section should look ahead to consider the implications of these changes for the acquisition of non-developmental items and the implications of the shift in acquisition of capabilities through development, to acquisition of capabilities "as-a-service".

Based on the Secretary's report under this section, and given the important role of the Comptroller General's annual weapons assessment in enabling the congressional defense committees' detailed oversight of the Defense Acquisition System, the conferees also direct the Comptroller General of the United States to brief the committees on how the Department's efforts are informing the refresh of that annual report as directed under section 803 of the National Defense Authorization Act for Fiscal Year 2019.

Report and limitation on the availability of funds relating to the ``middle tier`` of acquisition programs (sec. 837)

The House amendment contained a provision (sec. 821) that would amend section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to direct the Secretary of Defense to ensure the Director of Operational Test

and Evaluation, the Director of Cost Assessment and Program Evaluation, and the Under Secretary of Defense for Research and Engineering have access to certain data on acquisitions carried out under the authority, and would limit use of the authority to programs below the major defense acquisition threshold unless the Secretary were to issue a waiver. The House amendment also contained a provision (sec. 861(f)) that would direct the Secretary to submit a report that would include the guidance required by section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) and, would limit the Department's ability to obligate or expend funds on Middle Tier programs until that report is submitted.

The Senate bill contained no similar provision.

The Senate recedes with amendments that would strike the provision amending section 804, and, relating to the report and guidance, would expand the limitation of funds beyond acquisition programs, to the organizations which are parties to the disagreements that are preventing the guidance from being finalized.

The conferees believe the difficulty the Department has faced in reaching agreement illustrates the tension of balancing empowered execution by the Services with appropriate oversight by the Director of Cost Assessment and Program Evaluation, the Director of Operational Test and Evaluation, and the Under Secretaries of Defense for Research and Engineering and for Acquisition and Sustainment, as well as Congressional oversight. To address the latter, the conferees direct the Defense Acquisition Executive and the Service Acquisition Executives to notify the congressional defense committees within 30 days of a decision to designate a program to use the authority provided for under section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92). The conferees note the inability of the parties to reach agreement on the use of this authority threatens the momentum of the very initiatives that would most benefit from it. The conferees encourage the parties to focus immediately on the most critical issues, bring them to resolution, and publish the guidance required by section 804.

Report on intellectual property policy and the cadre of intellectual property experts (sec. 838)

The House amendment contained a provision (sec. 861(d)) that would amend section 802 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91; 131 Stat. 1450) by requiring the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition and Sustainment, to submit a report on activities to implement

section 2322 of title 10, United States Code, to include the composition and plans for the cadre, and the policy on the acquisition or licensing of intellectual property required. The provision would also limit the funds the Department may obligate or expend until the report is submitted.

The Senate bill contained no similar provision.

The Senate recedes with a an amendment that would require that the report include a description of the specific activities performed, and the programs and efforts supported by, the cadre of intellectual property experts and would change the Department of Defense offices subject to limitation of funds.

Guidance and reports relating to covered defense business systems (sec. 839)

The House amendment contained a provision (sec. 861(a)) that would amend section 2222(d) of title 10, United States Code, to require that guidance developed by the Department of Defense for defense business systems includes policies to ensure compliance with auditability requirements and approvals. The provision would also establish due dates to provide guidance related to covered defense business systems, as well as due dates to provide the Department's information technology enterprise architecture and related integration plans and schedules. The provision would also limit the availability of funds until such guidance, architecture and plans are provided.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would remove the limitation on funds and combine the reporting requirements for the information technology enterprise architecture.

Implementation guidance for use of a modular open system approach (sec. 840)

The House amendment contained a provision (sec. 861(c)) that would require the Secretary of Defense, acting through the Director of Cost Assessment and Performance Evaluation, to submit to the congressional defense committees a report that includes the study guidance required under section 2446b(b) of title 10, United States Code, and would limit funding available if the report is not provided by the end of 2019. The provision would also modify section 2446c of title 10, United States Code, to require a policy on the support for the acquisition for modular open system approaches (MOSA).

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would instead modify section 2446b of title 10, United States Code, to direct

the Secretaries of the military departments to develop implementing guidance for the requirements to address MOSA, and as well would amend section 2446c of title 10, United States Code, to direct the Secretaries of the military departments to develop policies relating to the availability of major system interfaces and support for MOSA.

The conferees note the importance of policies in implementing MOSA to the fullest extent. Therefore, the conferees direct the Secretaries of the military departments to submit a report to the congressional defense committee by March 15, 2020, that includes the implementation guidance required under section 2446b of title 10 and section 2446c of title 10. Furthermore, the conferees note that MOSA should go beyond the ability to exchange information broadly through the adoption of standards. Therefore, the conferees direct the Secretaries of the military departments to include in their policy a description of the goals and anticipated benefits of MOSA, with respect to maintaining and enhancing competition across the life-cycle of systems and programs; enabling systems to be more easily upgraded over their lifetimes; more easily modifying or replacing components and modules without the risk of adversely affecting software or the functioning of other components and modules; achieving interoperability among a wide range of systems, and thereby enabling the creation of novel cross-domain and cross-service kill chains.

Limitation on availability of funds for the Office of the Chief Management Officer of the Department of Defense (sec. 841)

The House amendment contained a provision (sec. 861(e)) that would limit the fiscal year 2020 funds that may be obligated or expended for the Office of the Chief Management Officer of the Department of Defense until the date on which the Chief Management Officer submits either a certification of cost savings or the notice and justification described in Section 921(b)(5) of the National Defense Authorization Act for Fiscal Year 2019.

The Senate bill contained no similar provision.
The Senate recesses.

SUBTITLE E—INDUSTRIAL BASE MATTERS

Modernization of acquisition processes to ensure integrity of industrial base (sec. 845)

The Senate bill contained a provision (sec. 831) that would require the Secretary of Defense to modernize mitigation

of risks to the integrity of the supply chain, to include those cited in recent studies on the defense industrial base.

The House amendment contained similar provisions (secs. 853, 855, and 892).

The House recedes with amendments that would establish the requirement for the framework in statute under section 2506 of title 10, United States Code; add certain systems to a list of those being assessed; and provide further detail on phased implementation and reporting on the framework.

The conferees note that contracting is the mechanism by which the Department of Defense operationalizes its relationship with the defense industrial base/national security innovation base. The conferees further note that the Department's ability to maintain awareness of the sources of procured items or materials, including the degree to which the sources are foreign or domestic, are critical elements for understanding supply chain risks. This is particularly the case for items used in critical programs such as major defense acquisition programs. The conferees believe that certain risks to the defense industrial base are not being appropriately considered. These include but are not limited to risks associated with: insufficient insight into ownership structures, fragile sources of supply, and cybersecurity concerns, as well as contractors' violations of law pertaining to fraud, human trafficking, and worker health and safety. The conferees further note that, even where risks may be a high priority, the existing acquisition processes and procedures are not effective or timely in mitigating such risks. As such, the provision would require the Department to rigorously optimize the policy, processes, and procedures throughout the contracting life cycle, beginning with market research, responsibility determination, technical evaluation/award, mobilization, contract administration, contract management and oversight (to include contractor business systems reviews), and contract audit for closeout. It is critical that this optimization incorporate modern sources of data and methods to conduct appropriate and continuous risk assessment for contractors doing business with DOD. The provision would also require the Comptroller General of the United States to coordinate individual reviews in these risk areas, report on them collectively, and begin annual reviews of the Department's progress in this area.

Report requirements for the national technology and industrial base (sec. 846)

The House amendment contained a provision (sec. 861(k)) that would amend section 2501(a) of title 10, United States

Code, to establish a deadline for the Secretary of Defense to submit an already-required strategy to Congress after the submission of the national security strategy report required under section 108 of the National Security Act of 1947. The provision would also modify section 2504(3) of title 10, United States Code, to require that the Department's annual report to Congress on the national technology and industrial base include a prioritized list of gaps and vulnerabilities within the base.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that clarifies requirements for the annual report to Congress, and that adds a requirement to submit unfunded priorities for the national technology and industrial base, ten days after the annual budget is submitted to Congress.

The conferees note that the national security strategy developed by the United States for the national technology and industrial base should leverage an analytical framework that uses digital tools, technologies, and approaches to inform decision-makers.

Mitigating risks related to foreign ownership, control, or influence of Department of Defense contractors or subcontractors (sec. 847)

The Senate bill contained a provision (sec. 833) that would require the Secretary of Defense to amend policy and regulation to take steps to enhance the process for assessing and mitigating risks related to foreign ownership, control, or influence (FOCI).

The House amendment contained no similar provision.

The House recesses with technical and clarifying amendments.

The conferees are concerned by the growing threat to the integrity of the defense industrial base from strategic competitors, like the Russian Federation, the People's Republic of China, and their proxies, seeking to gain access to sensitive defense information or technology through contractors or subcontractors. The conferees recognize that there are existing efforts underway to understand and mitigate some of these risks as directed by several pilot programs including section 1048 of the National Defense Authorization Act for Fiscal Year 2019 and section 1969 of the National Defense Authorization Act for Fiscal Year 2018. The conferees also recognize that the Defense Counterintelligence and Security Agency (DCSA) has transitioned to a new mission and has taken on additional responsibilities despite resource constraints. However, the acquisition community must have greater visibility into all cleared and

uncleared potential contractors and subcontractors seeking to do business with the Department. The Department must ensure that contractors and subcontractors do not pose a risk to the security of sensitive data, systems, or processes such as personally identifiable information, cybersecurity, or national security systems.

Prohibition on operation or procurement of foreign-made unmanned aircraft systems (sec. 848)

The Senate bill contained a provision (sec. 863) that would prohibit the operation or procurement of foreign-made unmanned aircraft systems by the Department of Defense. The House amendment contained a similar provision (sec. 854, as amended by sec. 899D) that would prohibit the Secretary of Defense from operating or entering into a contract for the procurement of certain unmanned aircraft systems.

The House recedes.

Additionally, the conferees encourage the Secretary of Defense to take such action as necessary to strengthen the domestic production of small unmanned aircraft systems (as defined in section 331 of the FAA Modernization and Reform Act of 2012 (Public Law 112-95; 49 U.S.C. 44802 note)), as described under Presidential Determination No. 2019-13 of June 10, 2019.

Modification of prohibition on acquisition of sensitive materials from non-allied foreign nations (sec. 849)

The Senate bill contained a provision (sec. 1411) that would include tantalum in the definition of covered materials. Additionally, the provision would expand the National Defense Stockpile Manager's authority to not sell a material if it is determined to not be in the national interests of the United States.

The House amendment contained a similar provision (sec. 808).

The House recedes with a technical amendment.

Acquisition and disposal of certain rare earth materials (sec. 850)

The Senate bill contained a provision (sec. 6401) that would require the Secretary of Defense, acting through the Defense Logistics Agency, to submit a report assessing issues relating to the supply chain for rare earth materials.

The House amendment contained a similar provision (sec. 807) that would require the Department of Defense to promulgate

guidance on streamlined acquisition of items with rare earth materials and allows exceptions to the Joint Capabilities Integration and Development System Manual and Department of Defense Directive 5000.01. The provision would also provide authority for the disposal of tungsten ores and concentrates contained in the National Defense Stockpile and acquisition of other critical materials.

The Senate recedes with an amendment that would remove the requirement to establish guidance on streamlined acquisition of covered rare earth materials and would include an assessment of rare earth supply chain issues.

Pilot program for development of technology-enhanced capabilities with partnership intermediaries (sec. 851)

The House amendment contained a provision (sec. 879) that would authorize the Commander of U.S. Special Operations Command to use not more than 5 percent of funds required to be expended by the Department of Defense relating to small businesses for a pilot program to increase participation by small business concerns in the development of technology-enhanced capabilities for special operations forces. The authority would terminate on September 30, 2021.

The Senate bill contained no similar provision.

The House amendment contained no similar provision.
The House recesses.

The conferees note that the Department of Defense's process to account for, manage, and report its information technology and cyberspace investments—which account for at least \$50.0 billion annually—is inefficient. Further, the conferees are concerned that this process results in unnecessary delays in preparing the annual budget exhibit and in regulatory reporting required by the Federal Information Technology Acquisition Reform Act of 2015, incorporated into the Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291). After years of legislation and regulation, the definitions pertaining to and the methods for grouping and accounting for spending on these investments have become cumbersome and obscure, and they hinder, rather than facilitating, insight into and oversight of spending plans and portfolio management. The briefing provided to the committees should include alternative methods for presenting budget justification materials to the public and congressional staff to more accurately communicate when, how, and with what frequency capabilities are delivered to end-users, in accordance with best practices for managing and reporting on information technology investments.

The conferees acknowledge that it is beneficial for the Department to understand what technologies its contractors are investing in beyond Department of Defense contracts. However, the conferees note that there is an ongoing Comptroller General review of recent changes to IR&D policies and the extent that recently funded IR&D projects align with the Department's modernization priorities as laid out in the National Defense Strategy. The conferees encourage the Department to use the findings from the Comptroller General's review as a basis for its IR&D strategy going forward, including what information is required to be reported by the contractor. Lastly, the conferees remind the Department that it should share information about contractor costs within the Department in a continuous and strategic manner, including in coordination with the Department's Chief Data Officer.

Supply chain security of certain telecommunications and video surveillance services or equipment

The House amendment contained a provision (sec. 851) that would require the Secretary of Defense to consult with the Federal Acquisition Security Council to comprehensively assess policies and contractors' systems relating to telecommunications and video surveillance services and equipment from foreign suppliers; to mitigate risks through a specific interagency debarment and suspension process; to promulgate guidance; and to issue regulation containing certain elements. The House amendment contained another provision (sec. 852) that would require the Secretary of Defense to procure certain telecommunications services or installations of telecommunications infrastructure on national security installations located on territories of the United States in the Pacific Ocean, only from American-owned or -operated companies, with a national security waiver.

The Senate bill contained similar provisions, (sec. 831) that would require the Secretary of Defense to modernize mitigation of risks to the integrity of the supply chain, to include those cited in recent studies on the defense industrial base, and (sec. 833) that would require the Secretary of Defense to amend policy and regulation to enhance the process for assessing and mitigating risks related to foreign ownership, control, or influence.

The House recedes with amendments to sec. 831 that would direct the Secretary to recommend revisions to certain statutory definitions, would more explicitly emphasize the role of suspension and debarment in supply-chain security, and would direct the Secretary to establish a process to re-assess companies who have addressed certain risks.

The conferees acknowledge that establishing blanket "prohibitions" in legislation can be well-intended and effective in some aspects, while also having unintended consequences. The conferees intend for the Department to be pro-active rather than reactive, in securing its supply chain. The conferees note there are multiple efforts in place and underway at the Department to address supply chain risks, and that similar efforts are being undertaken government-wide. The conferees encourage the Department to harmonize these activities where appropriate in ways that do not inhibit the Department from exercising its discretion in areas of national security interest. In this regard, the Department should pay specific attention to the

procurement of telecommunications goods and services for use on installations in the Pacific Ocean.

Revised authorities to defeat adversary efforts to compromise United States defense capabilities

The House amendment contained a provision (sec. 853) that would strengthen defense supply chains by including security as a primary purpose for Department of Defense acquisition.

The Senate bill contained no similar provision.

The House recedes.

The conferees note other sections of the conference report that modernize the Department's supply chain risk mitigation efforts by requiring the Secretary of Defense to develop an analytical framework across the acquisition process, assign risk mitigation roles and responsibilities to organizations and individuals, and modernize access to data necessary to assess risk across the acquisition enterprise.

Supply chain risk mitigation policies to be implemented through requirements generation process

The House amendment contained a provision (sec. 855) that would amend section 807 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) to require the Secretary of Defense to develop tools for supply chain risk mitigation policies during the requirements generation process.

The Senate bill contained a similar provision (sec. 831) which addressed this and several other matters pertaining to the defense industrial base.

The House recedes.

The conferees note the House provision was based on the work of the Advisory Panel on Streamlining and Codifying Acquisition Regulations established by section 809 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92). The conferees commend the work of the Panel and note that, since the Panel was established, it has made 98 recommendations across 3 report volumes and continues to identify areas where United States Code can be reorganized for clarity and efficiency. The Congress has enacted a number of the recommendations from the first two volumes in prior National Defense Authorization Acts and continues to carefully consider the recommendations of the Panel.

Size standard calculations for certain small business concerns

The House amendment contained a provision (sec. 872) that would clarify that section 3(a)(2)(C) of the Small Business Act applies to the Small Business Administration (SBA). The section would align the size standards based on data to the Small Business Runway Extension Act of 2018 (Public Law 115-324) by changing the calculation from 3 years to 5 years. This section also would require the SBA to develop a transition plan for small businesses and Federal agencies to help them successfully navigate the transition from the previous 3-year calculation to the new 5-year calculation as mandated and would require that the System for Award Management be updated accordingly.

The Senate bill contained no similar provision.

The House recesses.

Small Business Administration cybersecurity reports

The Senate bill contained no similar provision.

The House recesses.

The conferees understand that the Secretary of Defense is intending to establish a Trusted Capital Marketplace pilot program to link technology startup companies with trusted sources of capital in areas relevant to defense missions. The conferees direct the Secretary of Defense to provide a briefing on the progress of the Trusted Capital Marketplace pilot program to the congressional defense committees to include plans for how the program will: align with critical defense requirements; use the acquisition flexibilities authorized under recent National Defense Authorization Acts; be coordinated with other research and engineering technology investment programs, including the Small Business Innovation Research program; and be managed and resourced so as to evolve into a stable, funded activity. The conferees direct the Secretary to provide this briefing no later than 6 months after the date of enactment of this Act.

Contractor science, technology, engineering, and math programs

The House amendment contained a provision (sec. 894) that would deem the cost of participating in certain science, technology, engineering, and math (STEM) programs an allowable cost under a contract between the contractor and the Department of Defense.

The Senate bill contained no similar provision.

The House recesses.

The conferees note the importance of developing a world class cadre of technical talent who can perform critical STEM job functions in both government and industry, including a number which require security clearances. The conferees believe that a strong partnership between the defense industry and the Department of Defense can stimulate efforts to increase that pool of STEM talent. Therefore, the conferees direct the Secretary of Defense to enter into an arrangement with one or more academic institutions to study and develop policy options and recommendations to promote DOD-defense industry collaboration in STEM education activities. The conferees note that these partnerships should be primarily focused on developing collaborative DOD-industry activities relevant to: creating a clearable technical workforce to meet defense missions, supporting educational opportunities for defense sector personnel in both government and industry, and increasing educational opportunities for veterans and military dependents.

Further, the study should focus on activities which are based on metrics and education best practices to ensure maximum effectiveness. The conferees direct that the study, accompanied by an assessment and plan for the Secretary to implement the recommended policy options, if appropriate, should be delivered to the congressional defense committees no later than October 1, 2020. The conferees direct that Secretary to ensure that the study is developed in consultation with industry, education experts, and all appropriate defense organizations with expertise in STEM education.

Report on cost growth of major defense acquisitions programs

The House amendment contained a provision (sec. 898) that would require the Comptroller General of the United States to provide a report analyzing cost growth of major defense acquisition programs to the defense committees.

GAO report on contracting practices of the Corps of Engineers

The House amendment contained a provision (sec. 899M) that would require the Comptroller General of the United States to conduct a study on the contracting practices of the U.S. Army Corps of Engineers (USACE).

The Senate bill contained no similar provision.
The House recesses.

The conferees direct the Comptroller General of the United States to conduct a study on the contracting practices of USACE, with a specific focus on how USACE complies with and enforces the requirement to pay prevailing wages on federally financed construction jobs, as required by subchapter IV of chapter 31 of title 40, United States Code (commonly referred to as the Davis-Bacon Act). The study should consider the following:

(1) Any programs or protocols USACE has in place for the purpose of carrying out its Davis-Bacon Act enforcement obligations as set forth in the Federal Acquisition Regulation.

(2) Any programs or protocols USACE has in place for the purpose of identifying and addressing independent contractor

misclassification on projects subject to the Davis-Bacon Act.

(3) The frequency with which USACE conducts site visits on each covered project to monitor Davis-Bacon Act compliance.

(4) The frequency with which USACE monitors certified payroll reports submitted by contractors and subcontractors on each covered project.

(5) Whether USACE accepts and investigates complaints of Davis-Bacon Act violations submitted by third parties, such as contractors and workers' rights organizations.

(6) Whether USACE maintains a database listing all contractors and subcontractors who have, in one way or another, violated the Davis-Bacon Act and whether USACE consults this database as part of its contract award process.

(7) The frequency, over the last five years, with which USACE penalized, disqualified, terminated, or moved for debarment of a contractor for Davis-Bacon violations.

(8) How USACE verifies that the contractors it hires for its projects are properly licensed.

The conferees further direct the Comptroller General to submit a report that summarizes the results of the study, with recommendations for legislative or regulatory action that would improve the efforts of enforcing the requirement to pay prevailing wages on federally financed construction jobs, to the following committees not later than 1 year after the date of enactment of this Act to: the Committee on Education and Labor; the Committee on Armed Services; and the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Health, Education, Labor, and Pensions; the Committee on Armed Services; and the Committee on Commerce, Science, and Transportation of the Senate.

Comptroller General report on defense business processes

Amendments to research project transaction authorities to eliminate cost-sharing requirements and reduce burdens on use

The Senate bill contained a provision (sec. 5202) that would amend section 2371(e) of title 10, United States Code, to

eliminate certain restrictions on the use of the authority and associated funds.

The House amendment contained no similar provision.

The Senate recesses.

The conferees note that current law already permits the Secretary to engage in research project transaction authorities with cost sharing from industry that is less than fifty percent of the total costs, as appropriate, to allow for delivering performance with affordability and speed as outlined in the National Defense Strategy. The conferees believe the Secretary should use research project transaction authorities to drive efficiency, adopt and implement new ideas, and leverage leading practices from industry and academia to positively impact and support acquisition, personnel, research, and operational processes.

Report on contracts with entities affiliated with the Government of the People's Republic of China or the Chinese Communist Party

The Senate bill contained a provision (sec. 5801) that would require a report concerning Department of Defense contracts with companies or business entities that are owned or operated by, or affiliated with, the Government of the People's Republic of China or the Chinese Communist Party.

The House amendment contained no similar provision.

The Senate recesses.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

SUBTITLE A—OFFICE OF THE SECRETARY OF DEFENSE AND RELATED MATTERS

*Headquarters activities of the Department of Defense matters
(sec. 901)*

The Senate bill contained a provision (sec. 901) that would repeal certain certifications, require a report on numbers of employees in the National Guard Headquarters, provide modest increases in the statutory caps on other headquarters personnel, and sunset the requirements of section 346 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

The House amendment contained no similar provision.

The House recedes with an amendment that would eliminate the repeal of certain certifications and modify the increases in the statutory caps on headquarters personnel with the intent of enhancing the opportunity for civilian perspective and advice to be considered in the balance on strategic decisions regarding matters of the armed forces.

The conferees are concerned about civilian-military relations and note a perceived unhealthy drift in decision-making on strategic defense issues away from civilian leaders. Therefore, the conferees urge the Secretary of Defense to utilize the relief to existing limitations on civilian personnel supporting the Office of the Secretary of Defense in such a manner as to optimize enhancement of civilian control of the military. For example, the conferees note that section 922 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) assigned additional authority to the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD SO/LIC). As such, the conferees expect the additional authority and relief of limitations on civilian personnel will enhance civilian oversight of U.S. Special Operations Command through its 'service secretary-like' role.

The conferees direct the Secretary of Defense, not later than January 1, 2020, to submit to the armed services committees a report setting forth:

- 1) the total number of members of the Armed Forces and civilian employees of the Department of Defense assigned to support the Office of the Chief of the National Guard Bureau and the National Guard Joint Staff;

2) a description of the headquarters staff of each geographic combatant command, as well as each sub-unified command and service component command under the geographic combatant command, as of the following dates: October 1, 2014 and October 1, 2019. The description of the headquarters staffs of the geographic combatant commands shall include the number of military and civilian personnel who are authorized, and the numbers assigned or detailed, to duty in, functions of, or direct support to the headquarters element, including a breakout of personnel by functional area as defined in Department of Defense Instruction 5100.73.

The conferees direct the Secretary of Defense, not later than January 1, 2021, to submit to the congressional defense committees a report setting forth the following:

a) A recommendation for the total number of members and employees required for the Office of the Chief of the National Guard Bureau and the National Guard Joint Staff to execute the missions and functions of the National Guard Bureau and the National Guard Joint Staff.

b) A recommendation for the number of military and civilian personnel who are required in the headquarters element to execute the missions and functions of each geographic combatant command.

Clarifying the roles and responsibilities of the Under Secretary of Defense for Acquisition and Sustainment and the Under Secretary of Defense for Research and Engineering (sec. 902)

The Senate bill contained a provision (sec. 5902) that would allocate the responsibilities of the Under Secretary of Defense for Acquisition, Technology, and Logistics, a position that was eliminated in the National Defense Authorization Act of Fiscal Year 2017, between the two successor entities.

The House amendment contained a similar provision (sec. 861(j)).

The Senate recedes with amendments that include directing the Secretary of Defense to issue guidance and a framework for independent technical risk assessments (ITRAs), clarifying prototyping responsibilities for the Under Secretary of Defense for Research and Engineering, updating the Executive Schedule level for the Under Secretary of Defense for Research and Engineering, and adding prototyping responsibilities for the Under Secretary of Defense for Acquisition and Sustainment.

The conferees note the benefit of having specific guidance detailing the conditions in which the Department would approve ITRAs conducted by independent organizations within the military

departments. The conferees therefore direct the Secretary of Defense to issue the required ITRA guidance and framework no later than March 1, 2020, and to provide a briefing to congressional defense committees at that time.

The conferees also direct the Secretary of Defense to further refine and elaborate the definitions of prototyping to ensure that the Under Secretary of Defense for Research and Engineering and the Under Secretary of Defense for Acquisition and Sustainment have clearly defined roles and responsibilities, paying particular attention to the activities executed under budget activity 4, and software activities, which are likely to be difficult to determine.

Return to Chief Information Officer of the Department of Defense of responsibility for business systems and related matters (sec. 903)

The Senate bill contained a provision (sec. 903) that would return the responsibilities for business systems from the Chief Management Officer back to the Chief Information Officer and would realign the Chief Data Officer to report to the Chief Information Officer instead of the Chief Management Officer.

The House amendment contained no similar provision.

The House recesses.

Assessments of responsibilities and authorities of the Chief Management Officer of the Department of Defense (sec. 904)

The Senate bill contained a provision (sec. 5901) that would direct the Secretary of Defense to determine the manner in which the Chief Management Officer directs the business-related activities of the military departments and determine the responsibilities and authorities, if any, of the Chief Management Officer for the Defense Agencies and Department of Defense Field Activities. The provision would further direct the Secretary of Defense, in light of these determinations, to assign the responsibilities and authorities of the Chief Management Officer and submit a plan to Congress for carrying out these requirements.

The House amendment contained no similar provision.

The House recesses with amendments that would require a Secretary of Defense and an independent assessment of the Chief Management Officer position, and associated reports on those assessments with recommendations regarding the roles and responsibilities of the Chief Management Officer.

The conferees note the Department has faced significant structural challenges in implementing the Chief Management

Officer position since its inception. Accordingly, it is the conferees' intention to change the position from senior executive schedule II to III and, pending the assessment directed by this section, to disestablish the Chief Management Officer position altogether. The conferees therefore direct the Secretary to ensure the assessment provided for in this section is sufficiently comprehensive to allow for the reassignment of roles and responsibilities, as well as the authorities that would be necessary for orderly transition of such activities should the conferees decide to do so.

Senior Military Advisor for Cyber Policy and Deputy Principal Cyber Advisor (sec. 905)

The Senate bill contained a provision (sec. 904) that would require the designation of a general or flag officer of the Armed Forces to serve within the Office of the Under Secretary of Defense for Policy as the Senior Military Advisor for Cyber Policy and, concurrently, as the Deputy Principal Cyber Advisor.

The House amendment contained no similar provision.
The House recedes.

Exclusion from limitations on personnel in the Office of the Secretary of Defense and Department of Defense headquarters of fellows appointed under the John S. McCain Defense Fellows Program (sec. 906)

The Senate bill contained a provision (sec. 921) that would amend section 932(f)(3) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232) to stipulate that an individual appointed to a fellowship under this section shall not count against the limitation on the number of Office of the Secretary of Defense personnel in section 143 of title 10, United States Code, or any similar limitation in law on the number of personnel in headquarters of the Department of Defense.

The House amendment contained no similar provision.
The House recedes with a technical amendment.

**SUBTITLE B—ORGANIZATION AND MANAGEMENT OF
OTHER DEPARTMENT OF DEFENSE OFFICES AND
ELEMENTS**

Codification of Assistant Secretaries for Energy, Installations, and Environment of the Army, Navy, and Air Force (sec. 911)

The Senate bill contained a provision (sec. 911) that would amend sections 3016(a), 5016(a), and 8016(a) of title 10, United States Code, to require that each military department maintain an assistant secretary for energy, installations, and environment.

The House amendment contained a similar provision (sec. 911).

The Senate recedes with a technical amendment.

**SUBTITLE C—OTHER DEPARTMENT OF DEFENSE
ORGANIZATION AND MANAGEMENT MATTERS**

Prohibition on ownership or trading of stocks in certain companies by certain officials of the Department of Defense (sec. 921)

The Senate bill contained a provision (sec. 1034) that would prohibit Department of Defense officials who participated personally and substantially in an acquisition valued in excess of \$10.0 million who occupy a position on the Executive Schedule, are a member of the Senior Executive Service, a General or Flag Officer, or who served as a program manager, deputy program manager, procuring contracting officer, administrative contracting officer, source selection authority, member of a source selection evaluation board, or chief of a financial or technical evaluation team for a contract in excess of \$10.0 million, from owning or trading a publicly traded stock of a company that, during the preceding calendar year, received more than \$1.0 billion in revenue from the Department of Defense, including through contracts with the Department.

Further, the provision would direct that no officer or employee of the Department of Defense may own or trade a publicly traded stock of a company that is a contractor or subcontractor of the Department, if the Standards of Conduct Office of the Office of the General Counsel of the Department of Defense determines that the value of the stock may be directly or indirectly influenced by any official act of that officer or employee.

Any official who knowingly fails to comply with these requirements would be subject to administrative action by the Secretary of Defense. The definition of publicly traded stock would not include a widely-held investment fund, for purposes of this provision.

The House amendment contained no similar provision.

The House recesses with an amendment that would prohibit an individual serving in a key acquisition position in the Department of Defense who is: (1) A civilian officer or employee in a Senior Executive Service, Senior-Level, or Scientific or Professional position; or (2) A member of the Armed Forces in a grade above O-6, from owning or purchasing publicly traded stock of a company that is one of the ten entities awarded the most amount of contract funds by the Department of Defense in a fiscal year during the five preceding fiscal years. This same prohibition would apply to any civilian appointed to a position in the Department of Defense by the President, by and with the advice and consent of the Senate.

The prohibition would not apply if the aggregate market value of the stock holdings ascribed to the individual officer, employee, member of the Armed Forces, or appointee does not exceed the de minimis threshold established in the Code of Federal Regulations, or if the stock is purchased and owned as part of an Excepted Investment Fund or mutual fund.

Limitation on consolidation of Defense Media Activity (sec. 922)

The House amendment contained a provision (sec. 912) that would prohibit funds authorized or appropriated for the Department of Defense to be used to consolidate the Defense Media Activity until 180 days after the Secretary of Defense submits a report that includes any plans to consolidate the Defense Media Activity.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would remove the funding limitation, direct the Secretary of Defense not to take any actions to consolidate the Defense Media Activity until 60 days after submitting the required report, and change the definition of consolidation.

Report on resources to implement the civilian casualty policy of the Department of Defense (sec. 923)

The Senate bill contained a provision (sec. 922) that would require, not later than 30 days after the date of the enactment of this Act, the Secretary of Defense to submit to the congressional defense committee a report on the resources necessary to fulfill the requirements of section 936 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232) over the future years defense plan.

The House amendment contained no similar provision.

The House recesses.

SUBTITLE D—UNITED STATES SPACE FORCE

United States Space Force Act (secs. 951-961)

The Senate bill contained a series of provisions (sec. 1601-1608) that would establish the United States Space Force (USSF) within the Department of the Air Force and make changes to the organization of, authorities of, and acquisition associated with space forces assigned to the Department of Defense (DOD).

The House amendment contained a similar series of provisions (sec. 921-925) that would establish a U.S. Space Corps within the Department of the Air Force.

The Senate recedes with an amendment that would enact the United States Space Force Act. The amendment would modify title 10, United States Code, to establish the United States Space Force as an Armed Force within the Department of the Air Force. The amendment would make multiple technical and conforming changes necessary to fully establish the United States Space Force in title 10, United States Code.

The Space Force would include military personnel of the Air Force Space Command and other military personnel of the Air Force as assigned to the Space Force by the Secretary of the Air Force. The amendment would prohibit the authorization of additional military billets. The conferees expect that the Space Force would be supported by civilian personnel within the Department of the Air Force and by Air Force Reserve elements, as determined by the Secretary of the Air Force. The conferees direct the Secretary of the Air Force to provide to the congressional defense committees a total force management plan in support of the Space Force. The report shall be delivered not later than 90 days after the enactment of this Act.

The amendment would designate the commander of the Space Force as the Chief of Space Operations (CSO), appointed by the President and confirmed by the Senate. The CSO's rank would be that of general with a 4-year term of command. The CSO could be the incumbent Commander, Air Force Space Command, without further appointment. The CSO would report directly to the Secretary of the Air Force upon enactment of this Act. After 1 year, the CSO would be a member of the Joint Chiefs of Staff. The amendment would provide the Secretary of Defense with the temporary authority to establish a dual-hatted arrangement wherein the CSO, for the first year after enactment, would also serve as the Commander, U.S. Space Command (SPACECOM).

The conferees expect the Space Force and its supporting elements to be the exclusive source of personnel of the Department of the Air Force to be assigned, by the CSO, to the

National Reconnaissance Office (NRO), unless otherwise specified by the Secretary of the Air Force.

The amendment would establish the position of the Assistant Secretary of Defense (ASD) for Space Policy within the Office of the Secretary of Defense. The amendment would require the Secretary of Defense to seek to enter into an agreement with a Federally Funded Research and Development Center (FFRDC) to develop recommendations on the appropriate elements of the Office of the ASD for Space Policy, including, in particular, whether to include space capabilities and programs currently assigned to the Office of the Under Secretary of Defense for Intelligence or in the Military Intelligence Program. The Secretary would submit to the congressional defense committees such recommendations, together with an assessment of those recommendations, not later than 180 after the date of the enactment of this Act.

The amendment would rename the Principal Assistant to the Secretary of the Air Force for Space as the Assistant Secretary for Space Acquisition and Integration (ASAF/SP), who would report directly to the Secretary of the Air Force and serve as the senior architect for space systems and programs across the Department of Defense, providing advice to the service acquisition executive (SAE) of the Air Force (the existing Assistant Secretary of the Air Force for Acquisition). The ASAF/SP would oversee and direct the Space Rapid Capabilities Office, the Space and Missile Systems Center, and the Space Development Agency, providing fiscal and strategic guidance to the organizations. Effective October 1, 2022, the ASAF/SP would also become the SAE for Space Systems and Programs, which would include all space acquisition activities within the Air Force. All space acquisition projects currently managed by the Assistant Secretary of the Air Force for Acquisition would be transitioned to the ASAF/SP in the role of SAE for Space Systems and Programs, therefore providing for two SAEs reporting to the Secretary of the Air Force. The ASAF/SP would require confirmation by the Senate for this additional role.

The conferees note that the Deputy Secretary of Defense did not submit to the congressional defense committees the plan required by section 1601(b) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232). Therefore, the conferees direct the Secretary of the Air Force to provide to the congressional defense committees a report on whether and, if so, how to implement an alternative acquisition system, due not later than March 31, 2020. The report should include an assessment of the feasibility of a new acquisition system specifically tailored for space systems and programs, including with respect to procuring space vehicles,

ground segments relating to such vehicles, and satellite terminals. The plan shall include recommendations with respect to whether the alternative acquisition system described in the plan should use the Joint Capabilities Integration and Development System process or instead use a new requirements process developed in a manner that ensures that requirements for a program are synchronized across the space vehicles and ground segments. It should also consider how such a system can achieve faster acquisition and more rapid fielding of critical systems, including by using new commercial capability. The conferees also direct the Secretary to submit, not later than 120 days after the enactment of this Act, to the congressional defense committees a report with recommendations on the integration of acquisition authority for the NRO into acquisition authority of the Air Force for space systems and programs.

The amendment would also establish a Space Force Acquisition Council (SAC) within the Office of the Secretary of the Air Force that would oversee, direct, and manage Air Force acquisitions for space in order to ensure integration across the national security space enterprise. The SAC would meet not less frequently than monthly. The amendment would establish the ASAF/SP as the chair of Council. The Under Secretary of the Air Force, the Director of the NRO, the CSO, the ASD for Space Policy and the Commander, SPACECOM, would also be members of the Council. The amendment would require the SAC to submit quarterly reports to the congressional defense committees through the first calendar year quarter of 2025 on the activities of the Council.

The conferees direct the Secretary of the Air Force and Secretary of Defense to submit the following reports and briefings to the congressional defense committees on the establishment of the United States Space Force:

The conferees note that the Department of Defense currently provides an annual budget exhibit that describes the country-by-country costs of maintaining overseas posture, which estimated worldwide posture costs of just over \$24.0 billion in fiscal year 2019. However, the exhibit excludes considerable costs such as those borne in overseas contingency accounts and does not account for host nation contributions, either cash or

in-kind, or contributions from the North Atlantic Treaty Organization (NATO).

The amendment would allow the Secretary of Defense, jointly with the Secretary of State, to waive such limitation if the Secretaries submit to the appropriate committees of Congress a written certification that contains a determination by the Secretaries, and any relevant documentation on which the determination is based, that the Government of Turkey, having previously accepted delivery of the S-400 air and missile defense system from the Russian Federation: no longer possesses the S-400 air and missile defense system or any other equipment, materials, or

Limitation on use of funds to reduce the total number of members of the Armed Forces serving on active duty who are deployed to South Korea (sec. 1254)

The Senate bill contained a provision (sec. 1251) that would prohibit the use of funds authorized to be appropriated by this Act to reduce the total number of members of the Armed Forces in the territory of the Republic of Korea (ROK) below 28,500 until 90 days after the date on which the Secretary of Defense certifies to the congressional defense committees that: such a reduction is in the national security interests of the United States and will not significantly undermine the security of United States allies in the region; such a reduction is commensurate with a reduction in the threat posed to the security of the United States and its allies in the region by the conventional military forces of the Democratic People's Republic of Korea (DPRK); and the Secretary has appropriately consulted with allies of the United States, including the ROK and Japan, regarding such a reduction.

The House amendment contained a similar provision (sec. 1243) that would prohibit the use of funds authorized to be appropriated by this Act to reduce the number of members of the Armed Forces serving on Active Duty in the Republic of Korea

below 28,500 unless the Secretary of Defense first provides certification to the congressional defense committees that such a reduction is in the national security interest of the United States and will not significantly undermine the security of the United States' allies in the region.

The conferees recognize that United States military forces deployed on the Korean Peninsula remain vital to deterring, and if necessary, defeating aggression by the Democratic People's Republic of Korea, which continues to threaten the national security interests of the United States and the peace and stability of the Indo-Pacific region through both its conventional forces and weapons of mass destruction. While the conferees support diplomatic efforts to achieve the complete and fully verified denuclearization of the Democratic People's Republic of Korea, the conferees believe the removal of United States military forces from the Korean Peninsula is a non-negotiable item in such negotiations.

The provision would also express the sense of the Senate that the Secretary of State and the Secretary of Defense should: affirm the commitment of the United States to the Mutual Defense Treaty between the United States and the Republic of the Philippines; preserve and strengthen the alliance of the United States with the Republic of the Philippines; prioritize efforts to develop a shared understanding of alliance commitments and defense planning; and provide appropriate support to the Republic of the Philippines to strengthen the self-defense capabilities of the Republic of the Philippines, particularly in the maritime domain.

LEGISLATIVE PROVISIONS NOT ADOPTED

Report on participants in security cooperation training programs and recipients of security assistance training that have been designated for human rights abuses or terrorist activities

The House amendment contained a provision (sec. 1205) that would require, not later than 180 days after the date of the enactment of this Act, the Secretary of State and the Secretary of Defense, in consultation with the heads of other appropriate Federal departments and agencies, to submit to the appropriate congressional committees a report on individuals and units of security forces of foreign countries that have participated in security cooperation programs or received security assistance training and have been subject to United States sanctions relating to the violation of human rights or terrorist activities. The Secretaries would also be required to submit an annual update of the report.

The Senate bill contained no similar provision.

The House recesses.

The conferees note the importance of adherence to human rights by recipients of Department of Defense (DOD) security cooperation training. The conferees note that section 362 of title 10, United States Code, prohibits DOD from providing assistance to foreign security forces if there is credible

information that gross violations of human rights have been committed. Among the key elements of the security cooperation reforms contained in the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) were an increased emphasis on the integration of human rights training into DOD security cooperation programs and the strengthening of the defense and security institutions of foreign partners in order to more effectively and responsibly train, manage, and employ their forces. The conferees note that DOD faces significant challenges relating to its ability to comprehensively track recipients of DOD security cooperation training in order to identify those who may subsequently have committed gross violations of human rights. The conferees understand that these challenges arise in part from limitations in the Department's ability to collect and maintain data on all individuals who receive security cooperation training under title 10 chapter 16 authorities and in the ability to cross-reference such information with that of other departments and agencies of the United States government. The conferees are aware that the lack of data would result in incomplete information on recipients of security cooperation training that have been designated for human rights abuses or terrorist activities.

Therefore, the conferees direct the Secretary of Defense to provide a briefing to the Armed Services Committees of the House of Representatives and the Senate not later than 30 days after the date of enactment of this Act on the advisability and feasibility of providing Congress with a report on recipients of security cooperation training programs at the unit and individual level that, after such training, go on to commit gross violations of human rights. The briefing should identify any challenges that DOD may encounter in such an effort as well as recommendations for overcoming such challenges.

Prohibition on use of funds to transfer defense articles and services to Azerbaijan

The House amendment contained a provision (sec. 1207) that would prohibit the use of funds authorized by this Act or otherwise made available to the Department of Defense for fiscal year 2020 to transfer defense articles or services to Azerbaijan unless the President certifies to Congress that the transfer of such defense articles or services does not threaten civil aviation.

The Senate bill contained no similar provision.

The House recesses.

The conferees are concerned by any threat or use of force against civilians or actions against a nation's sovereignty,

which would be contrary to international law. The importance of a diplomatic resolution of the Nagorno-Karabakh conflict is addressed in another section of this report.

Multinational regional security education center

The House amendment contained a provision (sec. 1209) that would require, not later than 120 days after the date of the enactment of this Act, the Secretary of Defense to provide a briefing on the utility and feasibility of establishing a multinational regional security education center.

The Senate bill contained no similar provision.

The House recesses.

Not later than 120 days after the date of the enactment of this Act, the conferees direct the Secretary of Defense to provide to the Committee on Armed Services and the Committee on Foreign Affairs of the House of Representatives and the Committee on Armed Services and the Committee on Foreign Relations of the Senate a briefing on the utility and feasibility of establishing a multinational regional security education center, including as a satellite entity of the Daniel K. Inouye Asia-Pacific Center for Security Studies that is located in a member country of the Association for Southeast Asian Nations, to offer year-round training and educational courses to Southeast Asian and Indo-Pacific civilian and military security personnel to enhance engagement of territorial and maritime security, transnational and asymmetric threats, and defense sector governance in the Indo-Pacific region. Training may also include English-language training, human rights training, rule of law and legal studies, security governance and institution-building courses, and budget and procurement training.

The conferees direct the Secretary of Defense to provide a written summary of the briefing to the Committee on Armed Services and the Committee on Foreign Affairs of the House of Representatives and the Committee on Armed Services and the Committee on Foreign Relations of the Senate, within 30 days following the briefing.

Training for participants in professional military education programs

The House amendment contained a provision (sec. 1210) that would require any foreign person participating in professional military education to participate in human rights training.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that every year numerous students from foreign militaries participate in professional military education provided and funded by the United States. These courses should be viewed as a valuable opportunity to foster an appreciation of human rights and the rule of law. The conferees are aware that foreign students in professional military education programs participate in the Department of Defense Field Studies Program, which includes instruction in human rights and law of war, among other topics. The Secretary of Defense is encouraged to continue providing human rights training as a key component of professional military education.

Report on plan to transfer funds in connection with the provision of support under section 385 of title 10, United States Code

The House amendment contained a provision (sec. 1210A) that would require the Secretary of Defense to submit to the appropriate congressional committees a report on Department of Defense plans to transfer funds with the provision of support under section 385 of title 10, United States Code, for fiscal year 2020.

The Senate bill contained no similar provision.

The House recesses.

The conferees direct the Secretary of Defense, Secretary of State, and the Administrator of the U.S. Agency for International Development to provide a briefing not later than December 1, 2019 to the Armed Services Committees of the House of Representatives and the Senate on any plans to use the authority provided by section 385 of title 10, U.S. Code, in fiscal year 2020. The briefing should also include a description of any issues that may impede the use of such authority.

Rule of construction relating to use of military force against Iran

The House amendment contained a provision (sec. 1225) that would establish that nothing in this Act or any amendment made by this Act may be construed to authorize the use of military force against Iran.

The Senate bill contained no similar provision.

The House recesses.

Sense of Congress on support for Ministry of Peshmerga Forces of the Kurdistan Region of Iraq

The House amendment contained a provision (sec. 1226) stating that it was the sense of Congress that the Ministry of Peshmerga forces of the Kurdistan Region of Iraq had made significant contributions and sacrifices in the United States-led campaign to degrade, dismantle, and destroy ISIS, and that the Department of Defense and Department of State should continue to work with and support the non-partisan forces of the Ministry of Peshmerga of the Kurdistan Region of Iraq in order to continue to develop their capabilities, promote security sector reforms, and enhance sustainability and interoperability with the other elements of the Iraqi security forces in order to provide for Iraq's lasting security against terrorist threats.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that the United States-led coalition known as the Combined Joint Task Force-Operation Inherent Resolve (CJTF-OIR) in partnership with the Iraqi Security Forces (ISF), including the Kurdish Peshmerga, successfully liberated significant Iraqi territory from the control of the Islamic State of Iraq and Syria (ISIS). While the conferees applaud this significant achievement, they also express concern that ISIS continues to pose a significant threat to Iraq, the region, and potentially the U.S. homeland.

According to the August 2019 Lead Inspector General report for OIR, CJTF-OIR noted "deep-seated internal Kurdish political divisions and the Kurds' continuing dispute with Iraq's central government over a swath of disputed territory in northern Iraq rich in resources have allowed ISIS insurgents to exploit gaps between ISF and Peshmerga forces, which allows ISIS to regroup and plan attacks in the region." Furthermore, the Lead Inspector General report for OIR stated "that the ISF and the Peshmerga has made progress this quarter in ongoing planning of 'joint security mechanisms'-coordination to effectively combat ISIS in the disputed territories. However, on-the-ground cooperation between the ISF and the Peshmerga remained limited and security gaps remained." The conferees believe a lasting defeat of ISIS is critical to maintaining a stable and tolerant Iraq in which all faiths, sects, and ethnicities are afforded equal protection and full integration into the government and society of Iraq and support the provision of U.S. security and other assistance for such purposes. As part of those efforts, the conferees support continued reform of, and materiel and training assistance to, Kurdish Peshmerga forces with the objective of enabling them to more effectively partner with the ISF, the United States, and other international partners. In furtherance of those objectives, the conferees believe continued efforts by the Peshmerga and ISF to establish joint security

mechanisms are critical to addressing the threat of ISIS in disputed territories.

The conferees strongly support continuation of the partnership between the U.S. military and ISF, including the Kurdish Peshmerga in furtherance of our shared interests. In the coming years, the conferees encourage the Department to normalize its support to the Peshmerga by focusing assistance on the reform and professionalization at the ministerial and unit level and the development of capabilities and interoperability with other ISF elements that contribute to the long-term stability of Iraq.

Sense of Congress on supporting the return and repatriation of religious and ethnic minorities in Iraq to their ancestral homelands

The House amendment contained a provision (sec. 1227) that expressed the sense of Congress that it should remain a policy priority of the United States to support the safe return of displaced indigenous people of the Nineveh Plan and Sinjar to their ancestral homeland and that it should be a priority to ensure reintegration and restoration of fundamental human rights.

The Senate bill contained no similar provision.

The House recesses.

Prohibition of unauthorized military force in or against Iran

The House amendment contained a provision (sec. 1229) that would prohibit the use of Federal funds for any use of military force in or against Iran unless Congress has declared war or enacted a specific statutory authorization.

The Senate bill contained no similar provision.

The House recesses.

Report on Russian military involvement in the AFRICOM AOR

The House amendment contained a provision (sec. 1240) that would require the Secretary of Defense, in coordination with the Secretary of State, not later than 120 days after the date of enactment of this Act to provide a report to the appropriate congressional committees on military assistance provided by the Russian Federation or any private military corporations headquartered or registered in Russia to countries in the U.S. Africa Command area of responsibility (AOR).

The Senate bill contained no similar provision.

The House recesses.

The conferees direct the Secretary of Defense to provide a briefing to the Armed Services Committees of the House of Representatives and the Senate not later than 120 days after the date of enactment of this Act on the presence, activities, and strategic objectives of the Russian Federation in Africa. The briefing shall address, at a minimum, the following:

1) A description of the presence, activities, and strategic objectives of the Russian Federation in Africa.

2) A description of all known bilateral agreements between Russia and African governments negotiated since 2014, including military and technical cooperation, arms sales, and mineral exploration.

3) An analysis of any direct or indirect military support Russia or private military corporations based in Russia are providing to state and non-state armed groups in Africa, including a description of the types of support.

4) A description of arms sales within the previous calendar year by the Russian defense sector to African countries, and an analysis of whether any of such arms sales constitute significant transactions within the meaning of section 231 of the Countering America's Adversaries Through Sanctions Act of 2017 (22 U.S.C. 9525).

5) An analysis of the extent to which such arms sales may be in violation of United Nations Security Council-imposed arms embargoes in Africa, including with regard to South Sudan, the Democratic Republic of Congo, and the Central African Republic.

6) An analysis of Russian disinformation and propaganda operations in African countries, and the extent to which such operations pose a risk to United States interests in Africa.

7) A description of any plans to counteract destabilizing Russian activities in Africa.

8) Any other matters the Secretary deems relevant.

United States actions relating to Russian interference in elections for Federal office

The Senate bill contained no similar provision.

Extension and modification of report on military and security developments involving North Korea

The House amendment contained a provision (sec. 1242) that would amend section 1236 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) to extend and modify the requirement to provide a report on the military and security developments involving the Democratic People's Republic of Korea.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that Congress's ability to evaluate the security threat posed by North Korea and to conduct oversight of United States policy toward North Korea has been impaired by a lack of transparency and associated delays in providing information necessary for such oversight. For example, the report to Congress on the status of North Korea's nuclear program to establish a baseline of progress for negotiations with respect to denuclearization as required by section 1265 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232) was recently submitted over 300 days late. The conferees reiterate support for diplomatic efforts to achieve the denuclearization of North Korea. The conferees urge the Administration to review its policies related to North Korea to ensure they are consistent with a priority on open and timely communication with the Congress.

Report by Defense Intelligence Agency on certain military capabilities of China and Russia

army of the military, including an analysis of field maintenance, sustainment maintenance, movement control, intermodal operations, and supply, and how such functions interact with specific echelons of that military; and (4) an assessment of the future of mechanized army logistics of the military.

Topics to be covered in the briefing shall include: (1) a description of military activities of the United States and India, separately, in the Western Indian Ocean; (2) a description of military cooperation activities between the United States and India in the Western Indian Ocean; (3) a description of how the relevant geographic combatant commands coordinate their activities with the Indian military in the Western Indian Ocean and the mechanisms in place to ensure such cooperation is maximized; (4) a description of how the major defense partnership with India will be utilized to enhance cooperation in the Western Indian Ocean; and (5) areas of future opportunity to increase military engagement with India in the Western Indian Ocean.

The House amendment contained a provision (sec. 1250E) that would express the sense of the Congress concerning the enduring commitment of the United States to the Freely Associated States.

The Senate bill contained no similar provision.

The House recesses.

The conferees recognize that the United States has strong and enduring interests in the security and prosperity of Oceania and the Western Pacific region, including close relationships with the countries of Palau, the Marshall Islands, and the Federated States of Micronesia, with whom the United States

shares Compacts of Free Association. The United States and the Freely Associated States share values including democracy and human rights, as well as mutual interest in a free, open, and prosperous Indo-Pacific region. Therefore, the conferees believe the United States should expeditiously begin negotiations on the renewal of the Compacts of Free Association and conclude such negotiations prior to the expiration of the current compacts in 2023 and 2024.

The House amendment contained no similar provision.

The Senate recesses.

The conferees underscore that the United States-Japan alliance remains the cornerstone of peace and security for a free and open Indo-Pacific region. The conferees also recognize that the Government of Japan has made among the most significant "burden sharing" contributions of any United States ally, including through direct cost sharing, paying for the realignment of United States forces currently stationed in Okinawa, community support, and other alliance-related expenditures.

European Center of Excellence for Countering Hybrid Threats

The House amendment contained a provision (sec. 1258) that would require the Secretary of Defense to provide \$2.0 million for the European Center of Excellence for Countering Hybrid Threats.

The Senate bill contained no similar provision.

The House recesses.

The conferees strongly support the efforts of the European Center of Excellence for Countering Hybrid Threats (henceforth referred to as "the Center"), and encourage the Department of Defense to cooperate fully and actively with the Center. The conferees note that the Center could play an important role in addressing the strategic challenge described by the National Defense Strategy: revisionist powers and rogue regimes increasing "efforts short of armed conflict by expanding coercion to new fronts, violating principles of sovereignty, exploiting ambiguity, and deliberately blurring the lines between civil and military goals." The conferees also anticipate the Center serving as a unique forum to address the common concerns of transatlantic democracies and as a hallmark of cooperation between the North Atlantic Treaty Organization and the European Union.

To better understand the full scope of capability and impact the Center could have to further the strategic and operational objectives of the Department of Defense, the conferees direct the Department of Defense to provide the Committees on Armed Services of the Senate and House of Representatives a briefing, no later than 60 days after the enactment of this Act, on the Center, including the following components: the strategic vision for the Center, associated resources and manpower, planned or current activities, and intended engagement strategy of the Department with the Center.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that the importance of NATO is addressed elsewhere in this report.

The Senate bill contained no similar provision.

The House recesses.

The conferees have serious concerns about the executive branch's handling of the ambush in Niger that occurred on October 4, 2017, which led to the death of four U.S. servicemembers. These concerns include the Department of Defense's repeated delays in providing to Congress the report on the investigation into the incident as well as information on the disciplinary actions issued in connection with the incident. The executive branch has a duty to conduct itself with candor and it must act in a way that is transparent and responsive to congressional oversight.

Therefore, the conferees direct the Secretary of Defense to submit to the Armed Services Committees of the House of Representatives and the Senate not later than January 15, 2020 a report containing a description of each disciplinary action issued by rank as a result of the AR 15-6 investigation findings relating to the incident in Niger on October 4, 2017. BUDGET ITEMS

Standard Missile-3 Block IIA flight test against intercontinental ballistic missile target

The budget request included \$53.8 million across several defense-wide research, development, test and evaluation lines to conduct a flight test of the Standard Missile-3 Block IIA (SM-3 IIA) against an intercontinental ballistic missile (ICBM) target ("FTM-44").

The House amendment would authorize a reduction of \$41.7 million below the request.

The Senate bill would authorize the funding level in the request.

The conference agreement authorizes the funding level in the request.

The conferees note that a Government Accountability Office assessment ("Missile Defense: Delivery Delays Provide Opportunity for Increased Testing to Better Understand Capability," GAO-19-387) found that the SM-3 IIA has not been adequately tested against threats it was designed to intercept, potentially leading to design issues being discovered well into production of interceptors. Further, the Director for Operational Test and Evaluation (DOT&E) stated that flight test failures of the SM-3 IIA in operational testing should have been discovered in developmental testing that was not conducted. The conferees strongly urge the Director of the Missile Defense Agency and DOT&E to look for opportunities to conduct additional tests of the SM-3 IIA against threats it was designed to intercept, adhering to fly-before-you-buy principles. Additionally, the conferees recommend continued engagement with allies to discuss potential policy implications of the planned SM-3 IIA ICBM flight test.

The Senate bill contained a provision (sec. 1613) that would direct the Secretary of the Air Force to ensure that military Global Positioning System (GPS) user equipment terminals can incorporate signals from the European Union's Galileo and Japan's QZSS satellites, while enabling the Secretary to waive this requirement on a case-by-case basis if certain criteria are met. The provision would also require the Secretary to ensure that military GPS terminals can receive allied and non-allied positioning, navigation, and timing (PNT) signals, provided that analysis indicates that the benefits outweigh the risks or that the risks can be appropriately mitigated.

The House amendment contained a provision (sec. 1605) that would require the Secretary of Defense to establish under the Space Development Agency (SDA) a program to prototype an M-code based, multi-global navigation satellite system (GNSS) receiver that would incorporate both allied and non-allied, trusted and open GNSS signals to increase the resilience and capability of military PNT equipment. The provision would require the Secretary to provide an assessment of the benefits and risks of each potential signal and require the Director of the SDA to

provide a relevant briefing and report to the congressional defense committees. Finally, the provision would fence 75 percent of funds for the Military GPS User Equipment Program until the submission of such briefing and report.

The Senate recedes with an amendment that would move responsibility of the M-code multi-GNSS prototype program from the Director of the SDA to the Secretary of the Air Force and clarify the waiver authority for trusted signals capabilities. The amendment would also change the fence from 75 percent to 90 percent.

Commercial space situational awareness capabilities (sec. 1608)

The House amendment contained a provision (sec. 1606) that would require the Director of the Space Development Agency (SDA) to procure commercial space situational awareness (SSA) services by awarding at least two contracts for such services. The provision would limit the obligation or expenditure of funds to 75 percent for the enterprise space battle management command and control until the Secretary of Defense certifies to the congressional defense committees the award of these contracts. The provision would also require a report on using commercial SSA requirements.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would strike the findings and change the requirement for the Director of the SDA to procure commercial SSA services to a requirement for the Secretary of the Air Force to certify to the congressional defense committees that the Air Force is using commercial SSA services. The amendment would also change the limitation of funds to be obligated or expended until the Secretary makes such certification from 75 percent to 85 percent.

Expansion of authority for access and information relating to cyberattacks on Department of Defense operationally critical contractors

The Senate bill contained a provision (sec. 1644) that would amend section 391 of title 10, United States Code, to extend the ability of the Department of Defense (DOD) to react immediately to reports of intrusions that may affect critical DOD data.

The House amendment contained no similar provision.

The Senate recedes.

The conferees are sympathetic to the need for this additional authority, which the Department already has in the case of cleared defense contractors and which the Department requested via a legislative proposal. The Department relies on operationally critical contractors to move troops and supplies across the world, in peacetime and during conflict, and adversaries' cyberattacks on these critical contractors pose a genuine threat to the Department's conduct of operations. The conferees, however, are concerned that the Department's legislative proposal was not scoped in such a way that this authority would be operationalized through contractual mechanisms. The conferees are also concerned that the Department's broader efforts to improve the cybersecurity of its contractors and the Department's ability to respond in the event of a cyberattack are primarily focused on the defense industrial base as traditionally conceived of—namely, those companies that supply the Department's weapons systems. The cybersecurity of operationally critical contractors is at least as important as

that of traditional defense industrial base contractors, and the conferees seek greater clarity as to what efforts are underway to ensure their cybersecurity.

The conferees therefore direct the Commander of U.S. Transportation Command, the Under Secretary of Defense for Acquisition and Sustainment, the Chief Information Officer, and the Director of the Protecting Critical Technologies Task Force to brief the Committees on Armed Services of the Senate and House of Representatives, no later than 90 days after the enactment of this Act, on: (1) The expected use-case for the requested authority; (2) The expected implementation through contractual mechanisms of such an authority; (3) The need for and purpose of subsections (2) and (3) of the legislative proposal; and (4) How the Department is treating operationally critical contractors within its broader efforts to secure the defense industrial base against cyber attacks and respond, in the event of a cyberattack, more aggressively in its investigatory and counterintelligence actions.

The conferees look forward to this briefing and to legislating on this issue in the Fiscal Year 2021 National Defense Authorization Act.

The Senate recedes. The conferees direct the Secretary of Defense to provide to the Committees on Armed Services of the Senate and House of Representatives a briefing on the Joint Department of Defense and Department of Homeland Security Memorandum of Understanding signed by the Secretary of Defense on October 6, 2018.

The briefing shall include information on the following: (1) The number of planners assigned by the Department of Defense to line of effort three and line of effort four and the areas of expertise of those planners; (2) Whether these planners are physically co-located with their counterparts in the Department of Homeland Security and are assigned full-time or part-time to line of effort three and line of effort four; (3) Under what authority these planners have been assigned; (4) The status of

the development of operational plans and playbooks that will be implemented in response to actual cyberattacks of national scale; (5) The standing arrangements for interagency coordination and orchestration of response in the event of a cyberattack of national scale, including the status of the process established in Presidential Policy Directive-41 and the relevant principal, organization, and staff tasked with orchestrating a whole-of-government response; (6) The charter and implementation plan of the Joint Department of Defense and Department of Homeland Security Cyber Protection and Defense Steering Group; (7) The status of any Department of Defense cyber intelligence activities and operational preparation of the environment intended specifically to deter and disrupt adversary cyberattacks on United States critical infrastructure and planned in coordination with the Department of Homeland Security; (8) The current operational planning activities and standing arrangements between the Department of Defense and Department of Energy, including a determination as to whether the Secretary of Energy can directly request Defense Support of Civil Authorities; and (9) The status of implementing section 1650 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232) on the pilot program authority to enhance cybersecurity and resilience of critical infrastructure.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

Summary and explanation of funding tables

Division B of this Act authorizes funding for military construction projects of the Department of Defense. It includes funding authorizations for the construction and operation of military family housing as well as military construction for the reserve components, the defense agencies, and the North Atlantic Treaty Organization Security Investment Program. It also provides authorization for the base closure accounts that fund military construction, environmental cleanup, and other activities required to implement the decisions in base closure rounds. The tables contained in this Act provide the project-level authorizations for the military construction funding authorized in Division B of this Act and summarize that funding by account.

The conferees continue to believe in the value and appropriateness of providing a full authorization but incremental authorization of appropriations for certain military construction projects. The conferees believe incremental funding of large and complex military construction projects enables the Department to execute additional infrastructure projects in a fiscal year, enables continuous congressional oversight, and provides opportunities to adjust the authorization of appropriations level for projects should issues arise or requirements change over the course of construction. In instances where the conference agreement provides full authorization but incremental authorization of appropriations for certain military construction projects, the committee expects the Department to award these projects in the year of authorization and not defer award until the full appropriation amount is received.

Short title (sec. 2001)

TITLE XXI—ARMY MILITARY CONSTRUCTION

Summary

The budget request included \$1,453,499,000 for Army military construction and \$499,279,000 for family housing for fiscal year 2020. The conference agreement includes authorization of appropriations of \$1,270,999,000 for military construction and \$604,012,000 for family housing for the Army in fiscal year 2020.

The agreement includes authorization and authorization of appropriations for 3 military construction projects that were not included in the budget request but submitted to the congressional defense committees as part of the Army's unfunded requirements list. These projects include: \$40.0 million for an Air Traffic Control Tower and Terminal at Kwajalein Atoll; \$21.0 million for a Railhead at Fort Drum, New York; and \$18.5 million for a Vehicle Bridge at Fort Hood, Texas.

The agreement also includes authorization and authorization of appropriations of \$27.0 million for the Secretary of the Army to carry out Child Development Center projects, with prior notification to the congressional defense committees. The conferees recommend the Secretary use this authority to alleviate issues with the condition and capacity of Child Development Centers in support of military families.

The agreement provides for full authorization and incremental authorization of appropriations in an amount equal to the Department's ability to execute in the year of the authorization of appropriations for the following projects: Cyber Instruction Facility (Admin/Command) at Fort Gordon, Georgia; and the General Instruction Building at Carlisle Barracks, Pennsylvania.

The agreement provides an additional \$5,000,000 for Family Housing, Construction Army Planning and Design for the housing pilot program mandated in this Act.

Finally, the conferees note that the budget request included \$211.0 million in Army military construction as a placeholder to support the Army, Navy, Marine Corps, and Air Force response to the challenges facing the management and oversight of Military Housing Privatization Initiative developments. The conferees support additional resources to hire additional civilian personnel at the headquarters and installation level to improve the management and oversight of

MHPI developments. The conferees also support applying additional resources towards improved maintenance of government-owned and operated housing units. However, the conferees believe these resources should be directed to the appropriate military departments' family housing accounts. Therefore, the agreement recommends a reduction of \$211.0 million from the placeholder, but an increase of \$54.7 million for Army Family Housing Maintenance and \$45.0 million for Army Housing Privatization Support.

LEGISLATIVE PROVISIONS NOT ADOPTED

Review and report on construction of new, or maintenance of existing, direct fuel pipeline connections at Air National Guard and Air Force Reserve installations

The House amendment contained a provision (sec. 2607) that would require the Secretary of the Air Force, in conjunction with the Defense Logistics Agency (DLA), to complete a review on the construction of new, or maintenance of existing, direct fuel pipeline connections at Air National Guard (ANG) and Air Force Reserve (AFRES) installations.

The Senate bill contained no similar provision.

The House recesses.

The conferees direct the Secretary of the Air Force, in conjunction with the DLA, to complete a review on the construction of new, or maintenance of existing, direct fuel pipeline connections at ANG and AFRES installations not later than 180 days after the date of the enactment of this Act. The review should contain the following elements:

(1) An analysis of the extent to which the Air Force and DLA have identified direct fuel pipeline projects as an effective and efficient way to enhance the ability of regular component, ANG, and AFRES installations to improve the readiness of affected units and help them to meet their mission requirements. This should include an assessment of how the ANG and AFRES facilities, across all States and territories, can leverage such connections to better support current and emerging air refueling requirements.

(2) An assessment of how direct fuel pipeline connections enhance the resiliency and efficiency of the installations and help meet existing DLA requirements for secondary storage and other fuel requirements.

(3) A list of ANG and AFRES installations that do not currently have a direct connection pipeline but have access to such a pipeline within reasonable proximity (less than 5 miles) to the facility.

(4) An overview and summary of the current process for considering such proposals, including the factors used to consider requests, the weight provided to each factor, and a list of ANG and AFRES installations that have sought funding for projects to create direct access to a national fuel pipeline or to maintain access to such pipelines over the last 5 years.

(5) A list of the total instances in the past 5 years in which projects for direct fuel pipeline connections have been approved for regular component, ANG, or AFRES installations, including the costs of each project and the justification for such approval.

(6) A list of ANG and AFFRES installations with current pipeline connections that the Air Force or DLA has determined should no longer be used, including:

(A) An analysis of the justifications for each determination, such as decisions to switch from pipelines to trucks as the primary fuel delivery method;

(B) An assessment of whether these determinations fairly weigh the costs and benefits of building or maintaining a pipeline tap as a practical primary or secondary fuel delivery method for the installation compared to railroad, barge terminal, or truck delivery; and

(C) An assessment of whether these determinations fairly consider or weigh how direct fuel pipeline connections increase security for the fuel supply by reducing the threat of interruption, how the connections enhance mission reliability by providing access to greater fuel storage capability, and the ability of such projects once completed to better support the domestic and global operations of the ANG or AFRES installation.

(7) An assessment of how costs associated with each direct fuel pipeline connection project is considered by the Air Force or DLA and the weight given to such costs in the final analysis.

(8) An assessment of the effectiveness or usefulness of guidance or technical assistance provided to installations that request or propose direct fuel pipeline connection projects and recommendations for additional ways to provide assistance to ensure the Air Force and DLA receive the most up-to-date information about the costs and benefits of proposed projects from installations.

(9) An assessment of the available funding sources through the Air Force, DLA, other Department of Defense entities, or other mechanisms, such as a public-private partnership or enhanced use lease, that can support direct fuel pipeline connection projects either in whole or in part.

(10) An assessment of the extent to which direct fuel pipeline connection projects have been incorporated in any comprehensive plan the Air Force has developed or will develop regarding investments needed to improve regular component, ANG, and AFRES installations to meet the Department's needs.

The conferees further direct the Secretary to provide a final report containing the results of the review to the congressional defense committees not later than 1 year after the date of enactment of this Act. The report should include recommendations on how the Air Force can better expedite and support the use of fuel pipelines at ANG and AFRES installations. The recommendations should include options for accelerating the development and consideration of such projects where most feasible and appropriate, including whether costs savings could be obtained by including such projects as part of other related projects already authorized at an installation.

DIVISION E—INTELLIGENCE AUTHORIZATIONS FOR FISCAL YEARS 2018, 2019, AND 2020

Intelligence authorizations for fiscal years 2018, 2019, and 2020 (secs. 5001-6747)

The Senate bill contained Division F that included the Intelligence Authorization Act for Fiscal Year 2020 and Division G that included the Intelligence Authorization Act for fiscal years 2018 and 2019.

The House amendment contained no similar provisions.

The House recedes with an amendment that would make various modifications to such provisions.

DIVISION F—OTHER MATTERS

TITLE LXXI—SANCTIONS WITH RESPECT TO NORTH KOREA

*Sanctions with respect to North Korea and Financial Industry
Guidance to Halt Trafficking Act (secs. 7101-7155)*

The Senate bill contained multiple provisions (sections 6901, 6911-6913, 6921-6925, 6931-6935, 6941-6946, 6951-6954, 6961-6966) that would strengthen United States sanctions on North Korea, impose oversight measures concerning sanctions on North Korea, and strengthen the Department of Treasury's role in combating human trafficking, among other measures.

The House amendment contained multiple similar provisions (sections 1099Z-1-1099Z-8).

The House recedes with an amendment that would provide for significant enhancement of economic sanctions on North Korea and foreign persons involved with North Korea, including new secondary banking sanctions and broadening primary trade-based sanctions provided for in the North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114-122), hereafter referred to as NKSPEA. In addition, it would provide for increased congressional oversight in response to North Korea's aggressive nuclear and ballistic missile testing, sanctions evasion, and global compliance failures weakening enforcement of United Nations Security Council (UNSC) resolutions. The amendment

would also provide for significant guidance to the financial industry on strengthening measures to combat human trafficking.

More specifically, the amendment would impose such "secondary banking sanctions" as asset blocking and restrictions on correspondent accounts, and any other penalty authorized by the International Emergency Economic Powers Act (Public Law 95-223), hereafter referred to as IEEPA, against foreign financial institutions that provide financial services to certain sanctioned persons. Furthermore, the amendment would prohibit transactions with the same types of certain sanctioned persons by persons owned or controlled by U.S. financial institutions, and provides for civil IEEPA penalty authority against both the person owned or controlled and as appropriate its parent U.S. financial institution.

The amendment would also expand on the list of designation requirements for mandatory sanctions provided in NKSPEA, by adding as mandatory: any person that engages in the import or export, including of related services or technology, of coal, textiles, seafood, iron, or iron ore; and in crude oil or refined petroleum products above UNSC-set limits. The amendment would also require the imposition of sanctions with respect to any person who engages in, or otherwise facilitates: a transfer of North Korean government funds or property, contributing to a material violation of a UNSC resolution; the exportation of workers from North Korea; the sale or transfer of vessels to North Korea, or their registration, chartering or insurance; bribery of a North Korean official; or the significant misappropriation of public funds.

The amendment would also provide for enhanced guidance to the financial industry to combat human trafficking by: elevating human trafficking as an enumerated function of the U.S. Treasury Office of Terrorism and Financial Intelligence and requiring increased coordination and reporting related to human trafficking; strengthening the role that anti-money laundering and other tools play in combating human trafficking by requiring the U.S. Inter-Agency Task Force to Monitor and Combat Trafficking to provide certain policy recommendations to federal regulators and to Congress; and underscoring the sense of Congress that adequate funding be provided for public outreach and critical federal efforts to combat human trafficking at home and abroad.
