## **Executive Summary**

The American Recovery Plan Act (ARPA) was passed by Congress on March 10, 2021 and signed into law on March 11, 2021. It augments programs started by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) in 2020 and the Consolidated Appropriations Act in 2021 and created new programs to address the continuing pandemic-related crises, and fund recovery efforts. Brevard County received ARPA funding in the amount of \$116,920,177 from United States Department of the Treasury (Treasury). The initial tranche of \$58,460,088 was received on May 19, 2021 and the second tranche in the amount of \$58,460,088 was received on June 9, 2022.

The Final Rule provides that these funds may be used for (a) to respond to the public health emergency with respect to Coronavirus Disease or its negative economic impacts, (b) to respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers, (c) revenue replacement for the provision of government services to the extent of the reduction in revenue of the county due to the COVID-19 public health emergency, or (d) to make necessary investments in water, sewer, stormwater or broadband infrastructure.

Brevard County's ARPA Recovery Plan built on the consideration the Board of County Commissioners allocation of and expenditures related to CARES funding Brevard County received on April 23, 2020 for Public Health and Safety programs. The County has been able to address many different aspects of the economic recovery while ensuring that public health and other community needs remained a key focus.

#### **Uses of Funds**

Brevard County Board of County Commissioners initially approved their ARPA Recovery Plan on July 20, 2021. Complying with Treasury's guidelines, this plan was practical and effective in protecting the public health and the region's economy. With the receipt of the 2<sup>nd</sup> tranche, the County is developing a revised plan to incorporate the 2<sup>nd</sup> tranche of funding.

The outline below provides the broad categories of Brevard County's allocation of ARPA funding for the allocation of \$70,660,088 (\$58,460,088 of the 1<sup>st</sup> tranche and \$12,200,000 of the 2<sup>nd</sup> tranche) of Coronavirus State and Local Fiscal Recovery Funds (CLFRF) under ARPA:

# **Brevard County ARPA Recovery Plan Funding Categories**

#### 1. Investment in Water, Sewer Infrastructure, and Stormwater

This plan invests \$44 million of ARPA funds for water, wastewater, and stormwater projects, which are designed to improve water quality and address water pollution, enabling the County to address and prioritize the needs of the citizens. Projects include constructing, improving, and repairing wastewater treatment plants, controlling non-point sources of pollution, improving resilience of infrastructure to severe weather events and protecting the County's waterbodies from pollution.

Categories of eligible projects include treatment, transmission and distribution, source rehabilitation and decontamination, storage, consolidation, and new systems development. Eligible projects also include: construction of publicly owned treatment works, nonpoint source pollution management, national estuary program projects, decentralized wastewater treatment systems, stormwater systems, water conservation, efficiency and reuse measures, watershed pilot projects, energy efficiency measures for publicly-owned treatment works, water reuse projects, security measures at publicly-owned treatment works, and technical assistance to ensure compliance with the Clean Water Act.

#### 2. Public Health

In order to provide for the health and safety to the community served by Brevard County, an allocation of \$2 million for an employee vaccine incentive program was established. This program incentivizes fully vaccinated County employees who are providing essential services during the COVID-19 public health emergency. This allocation has been expended.

Brevard County allocated \$12.2 million of the 2<sup>nd</sup> tranche towards the construction of a new Emergency Operation Center (EOC). The current Brevard County EOC is the most frequently activated EOC in the state of Florida, and one of the most frequently activated in the United States due to the number of space launches and launch attempts. While Brevard has storm surge, flooding, and wildfire threats that most coastal counties in Florida face, it is also home to the second busiest cruise port in the world, multiple military facilities, and a robust defense industrial base. Brevard is also susceptible to a nuclear power plant incident, as the County is within the 50-mile ingestion pathway for the St. Lucie Nuclear Power Plant.

The EOC has been the primary location for staff to gather and disseminated information about COVID-19 to residents of Brevard County. Staff were present to ensure a consistent rollout of the testing kits and vaccines the County received, as well as coordinating with the County Sherriff's office and local municipalities police staffs to ensure proper protection and supplies were available for public safety staff. The EOC also coordinated with the County's Transit system to ensure travel was available for those in need to get access to testing and vaccines.

The current EOC is over 55 years old, undersized, and carries a variety of facility and technology issues. When an EOC activation occurs, it houses over 200 people from cross-functional teams including: County staff, Brevard County Sheriff's Office (BCSO), Florida Health Department, municipal representatives, Federal partners (NASA, Department of Defense, Coast Guard), Brevard County Schools, National Weather Service, State of Florida Emergency Management, and several private partners to include communications and energy providers. There is very little space available in this building to provide for all the needed staff to adequately respond to emergencies. There are also issues with flooding during storm events, which can lead to technology outages.

The new Brevard County EOC will be located on a plot of land owned by the County, and in a less flood prone location. Additionally, the building will be significantly larger than the current facility, which will allow for enhanced social distancing and safety measures for staff. The building will also include a consolidated emergency call center that will better be able to respond during the disaster events and provide the appropriate level of responses for the current COVID-19 response and all future emergencies.

### 3. Revenue Replacement Opportunities

The County allocated \$12.5 million for use for revenue replacement projects. Of this amount, currently \$8.5 million has been dedicated to the Fire Rescue program to support the County's public safety operations. The remaining \$4 million in revenue replacement funds has been allocated towards critical priorities in the county. To date, \$2.4 million of the \$4.0 million has been obligated to these critical programs. As provided by Treasury guidance, this revenue loss can be used for maintenance of infrastructure including roads, modernization of cybersecurity, protection of critical infrastructure, health services, environmental remediation, school or educational services, and the provision of police, fire and other public safety services. The County is in the process of allocating the remaining \$36.0 million that's available within this category.

# 4. Other Eligible Programs, Funding Levels to Be Determined

Brevard County is in the process of assessing the needs of our community and the impacts of the COVID-19 public health emergency to determine how to most effectively allocate remaining ARPA funds. Eligible programs being considered include but are not limited to: addressing negative economic impacts in recognition of disproportionately impacted communities and economically disadvantaged; programs that provide workforce readiness training; promoting healthy childhood environments. The total amount of ARPA funding from the second tranche available to be allocated is \$46.3 million.

## Promoting equitable outcomes

As Brevard County moves forward with implementing the ARPA Recovery Plan, initiatives are being established to measure equity including developing goals to provide benefits across various groups, awareness for residents and businesses, and equitable access and distribution of programs and services.

This initial plan invested the majority of ARPA funds in water and wastewater projects has now been expanded to include stormwater projects. These are community projects that will provide citizens with clean water, additional capacity, and resiliency to climate change. While developing this plan, careful consideration was given to ensure that projects are completed timely to benefit the community.

Developing a vaccination incentive program has encouraged essential employees to get vaccinated in order to provide a safe working environment, as well as reduce public

health risk to the community. Research shows that vaccinated employees are less likely to transmit the COVID-19 virus, and therefore are less likely to infect their families, coworkers, and the general public that they serve. This program protects employees and citizens while mitigating the risk of reduced public services that could result from excessive sick leave of essential workers.

The initial ARPA Recovery Plan allocated a portion of revenue replacement funds to support the operational needs of the Fire Rescue Department, ensuring that public health and safety needs were well served. These resources allowed for key investments in personnel, capital equipment, and infrastructure to effectively respond to our community.

The County is currently evaluating the community's needs and further COVID-19 impacts to determine how remaining funds will be expended. Opportunities include but are not limited to: investing in the community; long tern needs for drinking water projects; long term needs for wastewater and stormwater projects; addressing negative economic impacts of disproportionately impacted communities and economically disadvantaged; addressing educational disparities exacerbated by COVID-19, including educational services and workforce training; promoting healthy childhood environments; and additional provisions of government services to benefit and serve the community through revenue replacement opportunities.

### **Community Engagement**

All programs were approved by the Board of County Commissioners at a public meeting where the community has an opportunity to provide input in a public forum. Commissioners engage with the citizens on a daily basis to understand the local needs, priorities, and pressures facing the County.

Prior to advertising and solicitation of projects, Brevard County will look for opportunities to engage local contractors and workforce through community outreach. All projects undertaken with the second tranche of funds will follow the same community engagement plan.

#### **Labor Practices**

The County will ensure that as projects are selected to utilize SLFRF funds, that all procurement contracts using such funds are consistent with the procurement standards set forth in the Uniform Guidance at 2 CFR 200.317 through 2 CFR 200.327, as applicable, as well as local procurement policies. The Uniform Guidance requires competitive bidding and contractor oversight and maintaining written standards of conduct and prohibitions on dealing with suspended or debarred parties.

Brevard County will strongly encourage the use of local workforce to promote efficient delivery of high-quality infrastructure projects while also supporting the economic recovery efforts. The County will report on community benefits agreements, workforce wages and local hiring achieved through these agreements.

#### **Use of Evidence**

The County is not currently incorporating evidence-based interventions or program evaluations into its use of the SLFRF funding. The bulk of the funding is being used to address critical areas of need in the community with respects to drinking water and water pollution control. If the Board, in conjunction with the community, decides funds should be used to address the types of projects that require these evaluations, the County will fully comply with all Federal guidelines.

# **Performance Report**

The infrastructure projects planned below were divided across all five of Brevard County's Districts to ensure assistance to residents across the County. See Projected Outcomes in the Project Inventory below. \$66,426,003 has been budgeted for specific programs out the above mentioned \$70,660,088. \$2,442,540 remains in Revenue Replacement funding that has not been budgeted, and \$1,791,545 remains to be budgeted for projects from the first Tranche of funds.

Sules Creek Force Main	61 000 003	¢1.000.003	6005247	5.5	This project involves the replacement of approximately 3500 linear feet of 14 inch diameter sewer force main on Sykes Creek Parkway.  This project was identified in the Utilities Services Division Infrastructure Asset Evaluation conducted in 2013.	24-36 months. This project has been awarded, and work has beegun on replacing the force main.	County Procurement Policies were followed, and Metro Equipment Service, Inc. was awarded the contract.	This project will ensure consistent and safe sewer service to Brevard County Residents, and reduce the risk of a possible sewage spill into the Indian River Lagoon.
Sykes Creek Force Main	\$1,999,603	\$1,999,603	6985217	5.5	This project consists of the replacement or rehabilitation of lift	24-36 months. This	County Procurement	This project will ensure

County Procurement Policies were followed, and Danus Utilities was awarded the contract.	This project will ensure continued safe sewer service to residents of Brevard County.
LS B 03	\$500,000	\$0	6987502	5.5	This project consists of the replacement or rehabilitation of lift stations within the South Beaches service area. Each of the lift stations identified is beyond its useful life.	24 - 36 months. The project is currently in the design phase.	County Procurment Policies will be followed. Once the contract is awarded, all Federal clauses and guidelines will be followed.	This project will ensure continued safe sewer service to residents of Brevard County.
Basin Treatment Planning - Stormwater	\$400,000	\$0	515979	5.6	This consists of the initial modeling and design of denitrification bioreactors and other nutrient removal systems in Brevard County drainage systems. It addresses nutrient loading by using groundwater/stormwater treatment technologies to intercept nutrient-laden waters prior to discharge into the Indian River Lagoon.	24 - 36 months. The project is currently in the design phase.	County Procurment Policies will be followed. Once the contract is awarded, all Federal clauses and guidelines will be followed.	This project will greatly reduce the impact of stormwater runoff into the Indian River Lagoon in Brevard County.
Basin 2258 Babcock Road Bioreactor Stormwater	\$89,000	\$0	516649	5.6	This consists of the modeling, design and installation of a denitrification bioreactor in a Brevard County drainage ditch to address nutrient loading by using groundwater/ stormwater treatment technologies to intercept nutrient-laden waters prior to discharge into the Indian River Lagoon.	24 - 36 months. The project is currently in the design phase.	County Procurment Policies will be followed. Once the contract is awarded, all Federal clauses and guidelines will be followed.	This project will greatly reduce the impact of stormwater runoff into the Indian River Lagoon in Brevard County.
Indialantic Stormwater Improvements	\$625,000	\$0	517302	5.6	Stormwater costs are estimated at \$625,000 due to site conditions (25% of construction). Funding for the remainder of the project is estimated at \$1.875M, Requiring funding from other sources.  Surveying/drainage analysis/Master Plan in progress(complete 2022); Funding for Engineering and Permitting only (2023-2026).	36-48 months.	County Procurment Policies will be followed. Once the contract is awarded, all Federal clauses and guidelines will be followed.	This project will greatly reduce the impact of stormwater runoff into the Indian River Lagoon in Brevard County.
Titusville Causeway Beach Restoration	\$500,000	\$0	517434	5.6	This project is to restore a recreational sandy beach at the northeast end of the causeway, adjacent to planned park improvements. The sandy beach will improve resilience from erosionwave attack for the park improvements and the road.	36-48 months. The project is in the design phase.	County Procurment Policies will be followed. Once the contract is awarded, all Federal clauses and guidelines will be followed.	This project will help reduce erosion along the shoreline of the Indian River Lagoon in a vital seagrass habitat.
