

Capital Projects Fund Award Fact Sheet

New Hampshire

Treasury approves New Hampshire's second plan to invest an additional \$66 million of CPF funding in broadband infrastructure programs to provide high-speed internet to locations that lack access to adequate service.

New Hampshire Capital Projects Fund Program Overview

- **Program Summary:** An additional \$66 million for New Hampshire's Broadband Infrastructure programs (54% of CPF allocation)
- **Program Description:** New Hampshire's Broadband Matching Grant Initiative (BMGI), a competitive grant program, is the state's second broadband infrastructure program funded by CPF. The BMGI is designed to fund broadband infrastructure projects to bring high-speed internet to areas currently lacking service of 100/20 Mbps. The BMGI will provide a state match that is designed to alleviate the fiscal impact of community-driven broadband investment for both ISPs and municipalities and reduce reliance on bonding.
 - The program is designed to provide internet service with speeds of 100/100 Mbps symmetrical to households and businesses upon project completion.
 - Each of the ISPs funded by the program will participate in the FCC's [Affordable Connectivity Program \(ACP\)](#) – a \$30 per month subsidy for low-income families.
- **Key State Contact:** New Hampshire Department of Business and Economic Affairs

In total, New Hampshire is using **\$122 million – 100% of their CPF funding – for broadband infrastructure** to reach an estimated 24,000 locations, or **80% of locations** still lacking high-speed internet access in the state.
