GENERAL OVERVIEW

Executive Summary

Jackson County, Missouri originally proposed to use the \$136,551,645 in American Recovery Plan funds for the following purposes:

- \$28.5 million to support ongoing public health response and recovery needs
- \$88 million for revenue replacement
- \$20 million to mitigate negative economic impacts caused by the public health emergency

This has been revised to reflect actual numbers pertaining to the revenue replacement piece. The new allocation is:

- \$51.4 million to support ongoing public health response and recovery needs
- \$33.7 million for revenue replacement
- \$51.4 million to mitigate negative economic impacts caused by the public health emergency

A top goal is to equip and improve the new Jackson County Health Department Building. This would allow the County to provide adequate office, laboratory, testing and vaccination space for pandemic response, ongoing health concerns and regular Health Department services. To date, \$4.4 million has been earmarked and \$3.8 million expensed for this cause. Both the Jackson County Health Department and Jackson County's Environmental Health Department, which inspects businesses across the County for health and safety, have moved into this building.

One of the most notable accomplishments is the research, studies, vaccination clinics and liaison programs conducted by University of Missouri – Kansas City (UMKC). UMKC received a contract in 2022 for nearly \$5 million and has entirely expensed those funds. The results of UMKC's work pertaining to the first contract include nearly 13,000 vaccinations given, over 4,000 health screenings and treatments provided, and over 2,000 participants in COVID-19 research studies. In May of 2023, UMKC was awarded another contract for \$5 million to further their work in underserved areas of the County. Using the feedback provided by citizens, UMKC intends to use the current funding to increase vaccinations, share knowledge regarding women's reproductive needs, and provide diabetes prevention programs, among other goals. Of this contract, \$2 million has been spent to date.

Uses of Funds

The following describes in more detail the use of funds and how Jackson County is supporting a strong and equitable recovery:

Public Health (EC 1) – Over \$7 million has been spent by UMKC for work in Kansas City's Eastside which is traditionally an underserved and adversely affected area. \$2 million of this amount was spent in the previous 12 months.

\$3.5 million was allocated to the Jackson County Health Department to continue their efforts with vaccinations, testing, contact tracing, personal protective equipment, and staffing to achieve these efforts. Including the Health Department's previous allocation, nearly \$5.4 million has been spent on these efforts.

The County has also contracted with several non-profit organizations to provide food, shelter and other case management services to those in need. Those that still have funds available are Guadalupe Centers and restart. Contracts for capital projects to expand services were awarded to Samuel U Rodgers and Swope Health.

Negative Economic Impacts (EC 2) – Metropolitan Community Colleges (MCC) have been allocated \$2 million to provide the tools and equipment needed for job training. MCC is the only area college that provides job training for essential supply chain and economic recovery industries such as CDL licensing, construction, manufacturing, and public safety. MCC has spent all but \$11,000 as they are experiencing some supply chain issues.

Public Health-Negative Economic Impact: Public Sector Capacity (EC 3) – Over \$1.5 million was expended by the Jackson County Health Department to provide for staffing to support recovery efforts and the Integrated Referral and Intake System (IRIS) which connects citizens to social service agencies, non-governmental organizations, and healthcare.

Revenue Replacement (EC 6) - \$1.9 million was spent of \$4.5 million allocated for a new collections software. The current software is outdated and costly. The new software, Aumentum, will allow for a more efficient and streamlined billing and collection process. It will also integrate with other systems the County uses.

Promoting equitable outcomes

Thus far, Jackson County has allocated funds to UMKC and non-profit organizations who are targeting underserved and adversely affected groups. UMKC has used nearly \$5 million to target and traditionally underserved area of Kansas City, Missouri. UMKC is also partnering with local church officials, business owners and citizens to promote health services. With the new Health Department remodel, the County hopes to be able to reach out to even more people and expand their services to meet the communities' needs.

Community Engagement

UMKC engaged 60 community organizations in their efforts to expand vaccination access. They also trained 160 health liaisons, held 123 health service events, conducted over 3,000 surveys and had over 2,000 citizens participate in COVID-19 related research studies.

Labor Practices

The new health department building remodel is nearly complete. Services including remodel and furniture and fixture installation were put out to bid and include WBE/MBE/VBE goals and prevailing wage requirements. Other planned projects include remodel of the new administration building, the second floor and front steps of the downtown courthouse, and to make improvements to the Historic Truman Courthouse. These projects have and will provide additional jobs and/or job retention in the construction industry.

Use of Evidence

Entities receiving SLFRF funds from Jackson County that have measurable outcomes will be required to track those data points. Metropolitan Community Colleges measures outcomes by tracking job training certifications; how many students enrolled and completed the training. UMKC tracked how many community partnerships were created, vaccines given, health screenings provided and surveys completed.

Performance Report

In addition to those measurable outcomes listed in the Use of Evidence section, Jackson County plans to create a public facing dashboard. This dashboard will show the funding available, funds spent, what the funds were spent on, and how/if those funds helped the community. Using the job training certificate project, the dashboard would include how many students were enrolled in certain certification programs before SLFRF funding, how many are enrolled after SLFRF funding, how many completed the training and how many obtain jobs in their certification field. The dashboard could also incorporate community engagement as well. Those who visit the dashboard could have the option to fill out a survey or comment section on what they would like to see the funds used for.

PROJECT INVENTORY

Manatron-Aumentum

Project Aumentum: Manatron-Aumentum

Funding amount: \$4,456,590.00

Project Expenditure Category: 6-Revenue Replacement – 1- Provision of Government Services

Project Overview

- Purchase and implement new tax collection software. The new software, Aumentum, will allow for a more efficient and streamlined billing and collection process. It will also integrate with other systems the County uses.

Use of Evidence

- N/A

Performance Report

- N/A

Samuel Rodgers

Project Aumentum: Res21092-SamRodgers

Funding amount: \$1,100,000.00

Project Expenditure Category: 1-Public Health – 9-COVID-19 Assistance to Non-Profits

Project Overview

- Samuel Rodgers will use these funds to purchase items that will aid them in providing and expanding health and medical care to a variety of citizens. Items include those to equip an optometry suite, an x-ray unit, repair a parking structure and casework installation.

Use of Evidence

- N/A

Metropolitan Community Colleges

Project 780121001: Metropolitan Community Colleges

Funding amount: \$2,000,000

Project Expenditure Category: 2 – Negative Economic Impacts – 10 – Assistance to Unemployed or Underemployed Workers

Project Overview

- Metropolitan Community Colleges (MCC) is using these funds to strengthen the economic recovery. MCC provides truck driver, construction, manufacturing and public safety training. MCC is the only provider of these training areas in the Kansas City area. Specifically, these funds will go to purchase equipment to teach electrical concepts of circuits, skid steer, update the secure storage for the police academy, digger derrick and the design and upgrade of the commercial driver's license training pad.
- As of 6/30/24, two 18 wheel tractors and trailers, AC/DC complete training system, commercial driver's license pad, plasma table, a sinker EDM, and several other items have been purchased.
- <https://mcckc.edu/>

Use of Evidence

- A goal of MCC is to increase the number of students enrolled in one of the training programs listed above. MCC is also hoping with the expanded and upgraded equipment, the graduation rate in these fields will also increase.

Performance Report

- MCC will track and report the number of students enrolled and those that complete a job training program in one of the areas listed about.

UMKC 2023

Project UMKC-Res 21090: UMKC 2023

Funding amount: \$5,000,000.00

Project Expenditure Category: 1-Public Health – 14-Other Public Health Services

Project Overview

- To fully engage community members in a multi-sectoral COVID-19 education, communication, and vaccination project. This project is taking place on Kansas City,

Missouri's Eastside whose residents are typically minorities. UMKC continues to include businesses, churches and neighborhood and youth organizations in order to reach community members.

- <https://info.umkc.edu/healthy-jackson-county/>

Use of Evidence

- UMKC will continue to engage community partner organizations, train community health liaisons, hold health service events, and provide health screenings and treatments.

Performance Report

- Database and Dashboard is available upon request.

Health Department Remodel

Project Ord5578: Health Department Remodel

Funding amount: \$4,500,000.00

Project Expenditure Category: 1-Public Health – 4 – Prevention in Congregate Settings

Project Overview

- Jackson County acquired a new health department building and needed to remodel it to better serve the citizens. The new building is better able to serve more citizens, safely and offer more, expanded programs. While \$4.4 million has been earmarked for this project, to date \$3,841,815 has been expensed. Jackson County has until 12/31/24 to spend these funds.

UMKC-Vaccination - COMPLETED

Project CT140421008-Vaccination: UMKC-Vaccination

Funding amount: \$1,211,155.88

Project Expenditure Category: 1-Public Health – 1-COVID-19 Vaccination

Project Overview

- To fully engage community members in a multi-sectoral COVID-19 education, communication, and vaccination project. This project took place on Kansas City, Missouri's Eastside whose residents are typically minorities. The project started in June 2021 and ended in May 2022. UMKC included businesses, churches and neighborhood and youth organizations in order to reach community members.
- <https://www.umkc.edu/news/posts/2021/may/umkc-awarded-5-million-to-fight-covid-on-the-east-side.html>
- <https://info.umkc.edu/healthy-jackson-county/>

Use of Evidence

- UMKC gave 12,942 vaccinations during this time period.

Performance Report

- Database and Dashboard is available upon request.

UMKC-Public Health Services - COMPLETED

Project CT140421008-Public: UMKC-Public Health Services

Funding amount: \$3,786,858.12

Project Expenditure Category: 1-Public Health – 14-Other Public Health Services

Project Overview

- To fully engage community members in a multi-sectoral COVID-19 education, communication, and vaccination project. This project took place on Kansas City, Missouri's Eastside whose residents are typically minorities. The project started in June 2021 and ended in May 2022. UMKC included businesses, churches and neighborhood and youth organizations in order to reach community members.

- <https://info.umkc.edu/healthy-jackson-county/>

Use of Evidence

- UMKC engaged 60 community partner organizations, trained 160 community health liaisons, held 123 health service events, and provided 4,152 health screenings and treatments.

Performance Report

- Database and Dashboard is available upon request.

Jackson County Detention Center - COMPLETED

Project Res20866: Jackson County Detention Center

Funding amount: \$396,998

Project Expenditure Category: 1-Public Health – 4-Prevention in Congregate Settings

Project Overview

- The Detention Center purchased paper products, cleaning supplies, and COVID tests to help prevent COVID from spreading inside the Detention Center. The wireless network was also upgraded to accommodate the increase in virtual health services and virtual court appearances. Several allocations to the Detention Center have been approved and these funds were used shortly after the approvals.

Community Services League - COMPLETED

Project Res20927-CSL: Community Services League

Funding amount: \$175,000

Project Expenditure Category: 2 – Negative Economic Impacts – 2 – Household Assistance: Rent, Mortgage, and Utility Aid

Project Overview

- Community Services League was awarded \$175,000. These funds were used for rental assistance, case manager salary and benefits, Assistant Vice President of Housing Services salary and benefits along with client assistance. Client assistance includes helping individuals obtain vital documents and household items. CSL has identified several measurable outcomes/goals. These include enroll homeless households in the Bridge Housing Program, transition 85% into permanent housing, aid individuals in increasing and maintaining earned income, 100 homeless households connected with resources.
- <https://www.cslcares.org/>

Use of Evidence

- CSL identified several measurable outcomes/goals. These include enroll homeless households in the Bridge Housing Program, transition 85% into permanent housing, aid individuals in increasing and maintaining earned income, 100 homeless households connected with resources.
- \$106,776 for rental assistance. \$6,035 for client assistance (vital documents, household items, etc).

Performance Report

- CSL tracked the number of households/individuals receiving eviction prevention services and housing units preserved.

Metro Lutheran Ministry - COMPLETED

Project Res20927-Metro: Metro Lutheran Ministry

Funding amount: \$370,000

Project Expenditure Category: 1 – Public Health – 9 – COVID-19 Assistance to Non-Profits

Project Overview

- Metro Lutheran used these funds primarily for housing assistance. Other items included case management, home and community assistance and administrative salary, benefits and supplies.
- <https://www.mlmkc.org/>

Use of Evidence

- N/A

Performance Report

- N/A

Jackson County Human Resources – Testing - COMPLETED

Project Res20923-HR: Jackson County Human Resources - Testing

Funding amount: \$463,390.00

Project Expenditure Category: 1 – Public Health – 2 – COVID-19 Testing

Project Overview

- These funds were used for testing of unvaccinated associates of Jackson County and the 16th Circuit Court.
- <https://www.jacksongov.org/Government/Departments/Human-Resources>

Use of Evidence

- 9,170 tests completed

Performance Report

- N/A

Harvesters - COMPLETED

Project 152622001: Harvesters

Funding amount: \$1,000,000

Project Expenditure Category: 2 – Negative Economic Impacts – 1 – Household Assistance: Food Programs

Project Overview

- Harvesters has striven throughout the pandemic to provide a variety of food items to Jackson County citizens. This funding was used to purchase fruits, vegetables, meat, rice, soups, etc, with the largest portion being utilized for fruits and vegetables.
- <https://www.harvesters.org/>

Use of Evidence

- As of 6/30/23, these funds have helped 105,441 households.

Performance Report

- Harvesters will continue to track the number of households aided by these funds.

Jackson County, Missouri - COMPLETED

Project Res21108-3.1: Jackson County, Missouri

Funding amount: \$20,510,298.92

Project Expenditure Category: 3 – Public Health-Negative Economic Impacts – 1 – Public Sector Workforce

Project Overview

- These funds were used for 80% of salaries, overtime, taxes and insurance of the County's front line workers within the Sheriff's Office and Detention Center

Use of Evidence

- N/A

Performance Report

- N/A

Jackson County, Missouri - COMPLETED

Project Res21108-1.4: Jackson County, Missouri

Funding amount: \$10,797,420.14

Project Expenditure Category: 1 – Public Health – 4 – Prevention in Congregate Settings

Project Overview

- These funds were used to purchase an existing building to house County administrative offices. This will allow for employees and citizens to socially distance.

Use of Evidence

- N/A

Performance Report

- N/A

Jackson County, Missouri - COMPLETED

Project Res21108-6.1: Jackson County, Missouri

Funding amount: \$145,678.76

Project Expenditure Category: 6 – Revenue Replacement– 1 – Provision of Government Services

Project Overview

- These funds were used to design an ADA entranced to the front of the downtown courthouse. Currently, there are a large number of stairs which makes it difficult for all citizens to access the first floor of the courthouse.

Use of Evidence

- N/A

Performance Report

- N/A

Jackson County, Missouri - COMPLETED

Project Res21108-3.5: Jackson County, Missouri

Funding amount: \$1,681,044.00

Project Expenditure Category: 1 – Public Health-Negative Economic Impact – 5 – Public Sector Capacity: Administrative Needs

Project Overview

- The County currently has a very antiquated financial system. The County has implemented a new financial system. The new system allows the County to become

more automated in areas such as paying vendors by ACH as opposed to paper checks, store documents such as invoices, W9's and grant documents electronically.

Use of Evidence

- N/A
