American Rescue Plan

Last year, President Biden signed the American Rescue Plan Act into law, which has resulted in one of the strongest periods of economic growth in a century.

The American Rescue Plan includes:

- State and Local Fiscal Recovery Funds, which delivers $350 billion for states, territories, localities, and Tribal governments to respond to the COVID-19 emergency and lead a strong, resilient, and equitable recovery.

Key objectives of this funding:

- Fight the pandemic and support families and businesses struggling with its public health and economic impacts
- Maintain vital public services, even amid declines in revenue resulting from the crisis
- Build a strong, resilient, and equitable recovery by making investments that support long-term growth and opportunity
SLFRF Implementation Approach

Treasury’s final rule provides greater flexibility and simplicity for recipients to turn the tide on the pandemic, maintain vital public services amid revenue shortfalls, and build a strong, resilient, and equitable recovery.

NEW FEATURES IN THE FINAL RULE

1. More Automatically Eligible Uses
   - In the final rule, there is an expanded set of automatically eligible uses of funds when provided in disproportionately impacted communities. This makes it easier for recipients to address underlying disparities that contributing to more severe impacts of the pandemic in underserved communities.

2. Expanded Eligible Populations
   - Expansion of eligible populations allows recipients to serve families and communities hardest hit by the pandemic.
SLFRF Implementation Approach Continued

Treasury’s final rule provides greater flexibility and simplicity for recipients to turn the tide on the pandemic, maintain vital public services amid revenue shortfalls, and build a strong, resilient, and equitable recovery.

PROGRAM DESIGN ELEMENTS

3. Structured to Encourage Equitable Practices & Approaches

- The SLFRF reporting is designed to support equity by encouraging recipients to engage their communities in the design of their SLFRF programs.

- The program provided ongoing government-to-government support to Tribal governments by prioritizing Tribal consultations to ensure that the final rule and reporting approach were tailored to the unique needs of Tribal governments.

Prioritizing Equity

“Equity means closing the gaps in policy, practice and allocation of City resources so that race, gender, religion, sexual orientations, and income do not predict one’s success, while also improving outcomes for all.”

Performance Management and Evaluation Approach
Performance Data and Metrics

- Our goal is to use performance data to demonstrate equity and return on investment

- Developed metrics for funded entities by:
  - Reviewing ARPA and associated guidance
  - Leveraging existing measures from other efforts (budget and strategic action plan)
  - Coordinating with funded entities on data collection feasibility for proposed metrics

- To ensure compliance with performance management efforts, performance measures are included in grant agreements with funded entities

</table>
• To ensure sound rationale for proposed projects, applicants were required to provide existing research or best practices (new programs/services)

• To add capacity in data analysis and evaluation, the City of Baltimore opted to employ a university partnership approach

• Issued an RFI to select university partners

• The City of Baltimore set aside $1.8M for research and evaluation services

• Selected the University of Baltimore and Morgan State University to leverage local subject matter expertise
# Leveraging University Partnerships

The City of Baltimore is leveraging its university partnerships in the following ways:
