

Capital Projects Fund Award Fact Sheet

Utah

Treasury approves Utah's plan to invest \$14.8 million of CPF funding in broadband infrastructure projects that will provide high-quality internet to locations that lack access to adequate service.

Utah Capital Projects Fund Program Overview

- **Program Summary:** \$14.8 million for Broadband Infrastructure (11% of CPF allocation)
- **Locations to Be Served:** 3,080 (estimated)
- **Program Description:** The Utah Rural Last Mile Broadband Grant Program is a competitive grant program designed to deploy high-speed broadband to households and businesses in rural and economically distressed areas across the state. The program is an initiative of the Utah Broadband Center, which works with many nonprofit and government agencies, tribal groups, healthcare and educational organizations, and ISPs throughout the state to bring service to areas where broadband infrastructure projects would not be feasible without assistance.
 - The program is designed to provide internet service with speeds of 100/100 Mbps symmetrical to households and businesses upon project completion.
 - Each of the internet service providers funded by the program will participate in the FCC's [Affordable Connectivity Program \(ACP\)](#) – a \$30 per month subsidy for low-income families.
- **Key State Contact:** The Utah Broadband Center

As reported by Utah, estimates show that investments made using the Capital Projects Fund will serve ~5% of locations still lacking high-speed internet access in the state.

On April 23, 2024, Treasury approved Utah's request to modify the funding from \$9.8M to \$14.8M. This fact sheet reflects these changes.
