Americans are Keeping More of Their Hard-Earned Money:

Real Wages Increased 1.8% Over the Past 12 Months (ending in February). This translates into an additional \$600 above inflation for the average full-time production worker.

Real After-Tax Income Per Person has Risen 10% - an extra \$2,950 per person – since the President took office.

Pro-Growth Policies will Enhance Long-Term U.S. Economic Strength:

The Administration proposed a budget that reaches a small surplus in 2012. Economic growth has generated increased tax receipts and dramatically improved the budget outlook. The budget holds the line on spending. The budget reduces the deficit as a percentage of GDP-the most meaningful measure of its size-every year through 2012. The time has come for both political parties to work together on comprehensive earmark reform that produces greater transparency and accountability to the congressional budget process, including full disclosure for each earmark and cutting the number and cost of all earmarks by half.
