OUTBOUND NOTIFICATION SYSTEM (ONS)

RELEASE NOTES

Version 1.0
Release Date: January 2, 2025

Overview: This release note outlines the initial features and capabilities of the Outbound Notification System, an online platform designed to support the implementation of Executive Order 14105.

Key Features

- **User Authentication**: Secure user registration and authentication with ID.me integration.
- **Notification Submission:** Allows users to create and submit notifications that include the data elements specified in sections 850.401, 850.402, and 850.403 of the EO 14105 regulations.
- **User Management:** Allows users to collaborate by adding and removing users from their filings.
- **Dashboard**
    - **Submission History:** View a history of all previously submitted notifications.
    - **Edit and Delete Drafts:** Edit and delete draft before submitting a notification.
- **Downloadable Notification and Certification Templates:** Allows users to download templates for offline access.
- **Supported File Types**
    - **Document Upload:** Allows users to upload PDF and XLSX file types.
    - **Certification Template:** Allows users to upload PDF, XLSX, and JPEG file types.
- **Accessibility:** Supports 508 compliance for notification forms.
