*All privately-held net marketable borrowing estimates are “normalized” with details from page 18.

Uncertainty regarding funding needs in FY2025 to FY2026 remains relatively high, reflecting a variety of views on the path of monetary policy, the duration of SOMA redemptions, and the outlook for the economy.

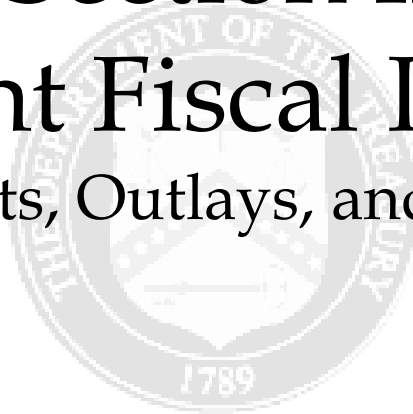

Latest Market Expectations for Treasury Financing in April 2024:

- Primary dealers expected no changes to nominal coupon issuance sizes at the May refunding.
- With respect to TIPS, all dealers expect a \$1 billion increase to the 5-year reopening in June, and most expect a \$1 billion increase to the 10-year new issue in July.

Recent Fiscal Results

Receipts, Outlays, and Deficits

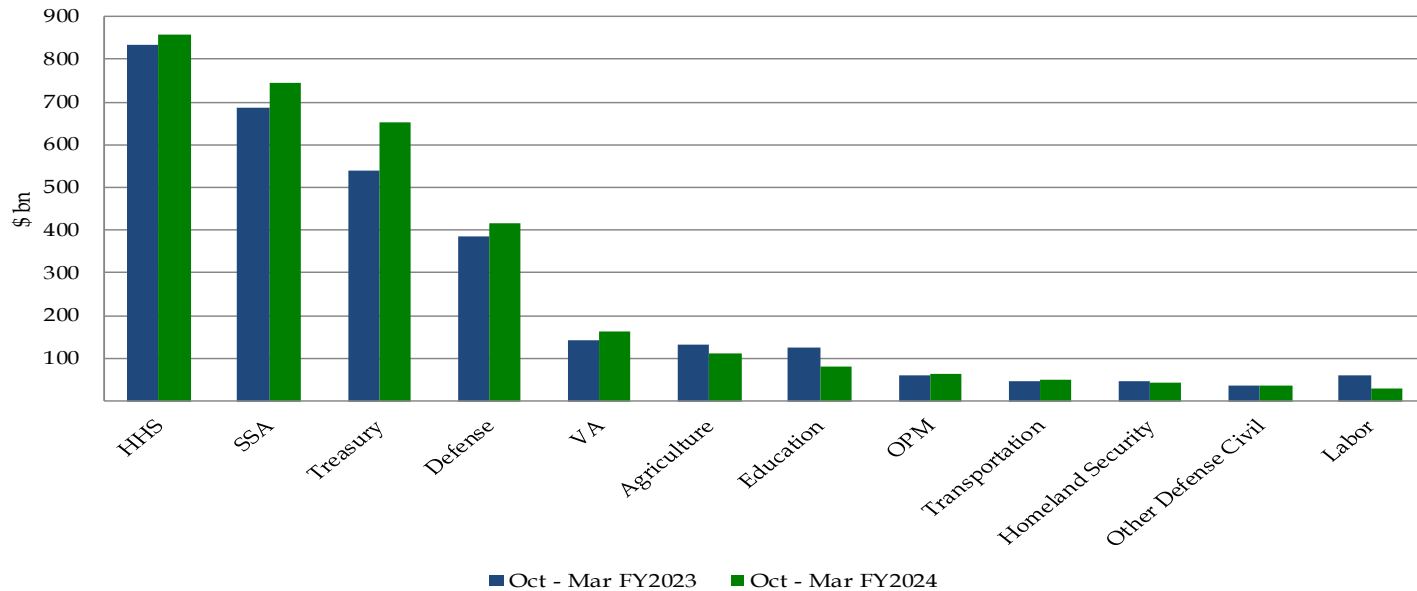

Monthly Receipt Levels (12-Month Moving Average)

Notable Receipt Category	YoY change thru Q2 FY24 (\$ billion)	YoY change thru Q2 FY24 (%)	Comments
Non-withheld and SECA taxes	+\$34	12%	IRS extended several major deadlines for some taxpayers, including those in California, from FY 2023 into FY 2024.
Gross Corporate Taxes	+\$51	32%	IRS extended several major deadlines for some taxpayers, including those in California, from FY 2023 into FY 2024.
Withheld & FICA taxes	+\$45	3%	Increased due to wage and employment growth, partially offset by the non-recurrence of the CARES deferral repayment.
Individual Refunds	-\$26	-13%	IRS pared backlog in January 2023 at a non-recurring rate. Also, the refund season in 2024 started later than 2023.

Tax receipts for Q4 FY2020 reflect the adjustment of April and June 2020 tax deadlines to July 15th, 2020. Individual Income Taxes include withheld and non-withheld. Social Insurance Taxes include FICA, SECA, RRTA, UTF deposits, FUTA and RUIA. Other includes excise taxes, estate and gift taxes, customs duties and miscellaneous receipts.

Social Security Administration (calendar adjusted)	+\$61	+9%	Due to benefit increases from cost-of-living adjustments (COLA). The rate of growth will continue to decrease over the remainder of the fiscal year as the COLA decreased from 8.7% in calendar year 2023 to 3.2% in calendar year 2024.
Health and Human Services (calendar adjusted)	+\$22	+3%	Due to increases in Medicare spending.
Department of Defense (calendar adjusted)	+\$29	+7%	Due to higher military personnel, operation, and maintenance spending.
Department of Treasury	+\$112	+21%	Primarily due to a \$138 billion (36%) increase in gross interest on the public debt, offset by lower tax credits (-\$17 billion).
Department of Veterans Affairs (calendar adjusted)	+\$20	+14%	Due to increased spending per person and veterans' increased use of health care facilities.
Department of Education	-\$43	-35%	Due to several upward modifications for Federal Direct Student Loans that increased outlays last year.
Department of Labor	-\$30	-51%	Due to a \$36 billion Special Financial Assistance payment in January 2023 to shore up troubled multi-employer pension plans as part of the American Rescue Plan Act.

Recent Deficit Forecasts

- Primary dealers marginally decreased their deficit estimates in April 2024 relative to estimates they provided in January 2024.
- Dealers cited higher than expected corporate tax receipts and an outlook for stronger economic growth as driving the improvement in the near-term fiscal outlook. Several dealers noted significant upside risks to 2025 and 2026 fiscal forecasts centered around higher for longer interest rates (resulting in increased debt service costs), geopolitical developments, and a potential extension of the Tax Cuts and Jobs Act.
- The latest OMB and CBO estimates in the table below are provided for reference.

Section IV:
Estimated Borrowing Needs and
Financing Implications

Assumptions for Financing Section (pages 16 to 20)

- Portfolio and SOMA holdings as of 03/31/2024, unless otherwise noted (see slide 20).
- Estimates assume privately announced issuance sizes and patterns remain constant for nominal coupons, TIPS, and FRNs given the issuance sizes in effect in April 2024, while using total bills outstanding of ~\$6.1 trillion, unless otherwise noted (see slide 20).
- The principal on the TIPS securities was accreted to each projection date based on market ZCIS levels as of 03/31/2024, unless otherwise noted (see slide 20).
- No attempt was made to account for future financing needs.
- **Privately-held marketable borrowing** excludes rollovers (auction “add-ons”) of Treasury securities held in the Federal Reserve System Open Market Account (SOMA) but includes financing required due to SOMA redemptions. Secondary market purchases of Treasury securities by SOMA do not directly change privately-held net marketable borrowing but, all else equal, when the securities mature and assuming the Fed does not redeem any maturing securities, this would increase the amount of cash raised for a given privately-held auction size by increasing the SOMA “add-on” amount. These borrowing estimates are based upon current law and do not include any assumptions for the impact of additional legislation that may be passed. Additionally, buybacks are not expected to significantly affect privately-held net marketable borrowing as new issuance replaces securities that are bought back.

 - 1) the median Primary Dealer’s estimates for SOMA redemptions, and
 - 2) OFP’s fiscal year 2024 cash balance of \$850 billion, held constant in out years.
- OMB projections are using estimates are from Table S-10 of “Budget of The U.S. Government, Fiscal Year 2025,” March 2024.
- CBO projections are using estimates are from “The Budget and Economic Outlook: 2024 to 2034,” February 2024.

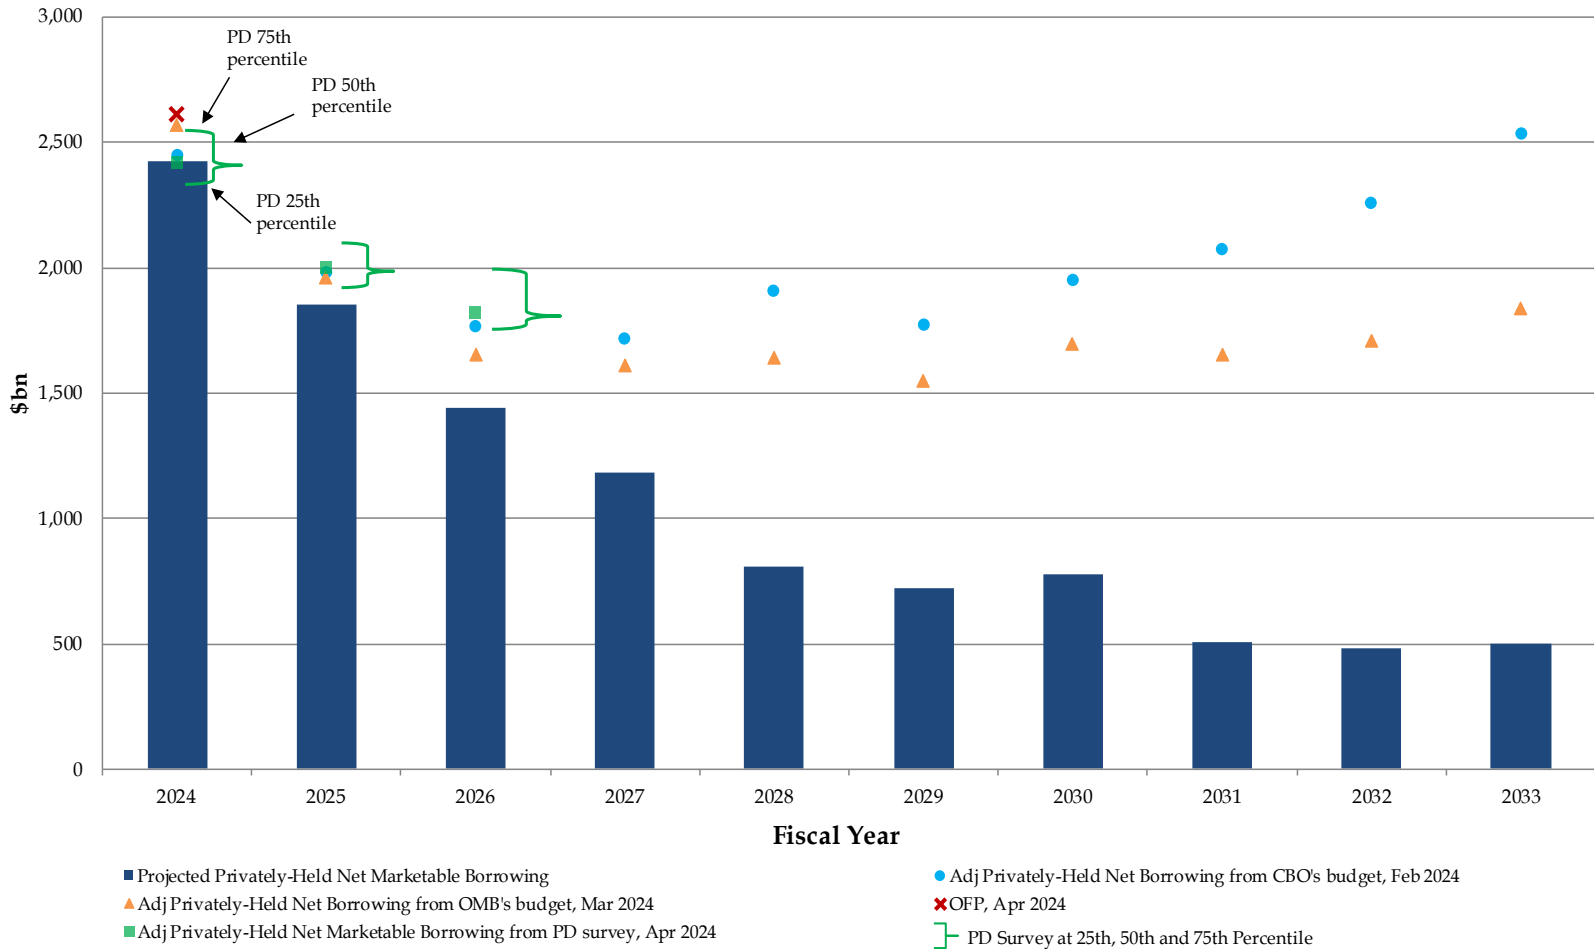

Evolution of Median Primary Dealer, OMB, and CBO Privately-Held Net Marketable Borrowing Estimates*

* Note that both the OMB and CBO privately-held net marketable borrowing estimates are calculated by adjusting their respective deficit estimates using dealer's median SOMA redemption estimates. In addition, all the PD, OMB and CBO privately-held borrowing estimates are normalized with the same cash balance changes. See slide 18 for details.

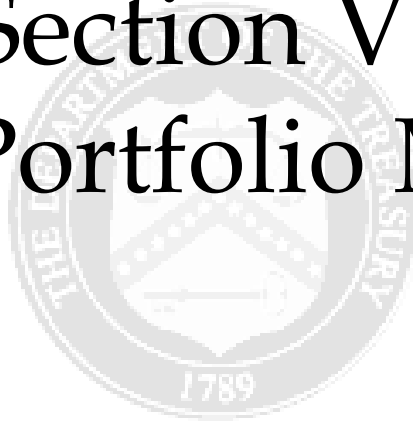

Projected Privately-Held Net Marketable Borrowing

Assuming Private Coupon Issuance & Total Bills Outstanding Remain Constant as of 04/30/2024*

*Treasury's latest primary dealer survey median/interquartile range estimates can be found on page 18. OMB projections are using estimates are from Table S-10 of "Budget of The U.S. Government, Fiscal Year 2025," March 2024. CBO projections are using estimates are from "The Budget and Economic Outlook: 2024 to 2034," February 2024. OMB and CBO borrowing estimates from FY24 to FY26 are normalized to privately-held net marketable borrowing after adding PD survey median SOMA redemption assumptions for FY24/25/26. In addition, all privately-held net marketable borrowing estimates are normalized with OFP's FY24 ending cash balance assumption of \$850 billion.

Section V: Select Portfolio Metrics

Note: Several of the portfolio metric charts that follow include three years of projected metrics.

These projections are hypothetical and are meant for illustrative purposes only. The projections contained in these charts should not be interpreted as representing any future policy decisions regarding Treasury financing.

Projections illustrate how various portfolio metrics could evolve under three hypothetical financing scenarios. The scenarios were chosen to illustrate a potential range of portfolio metric outcomes based on hypothetical issuance choices.

The scenarios are:

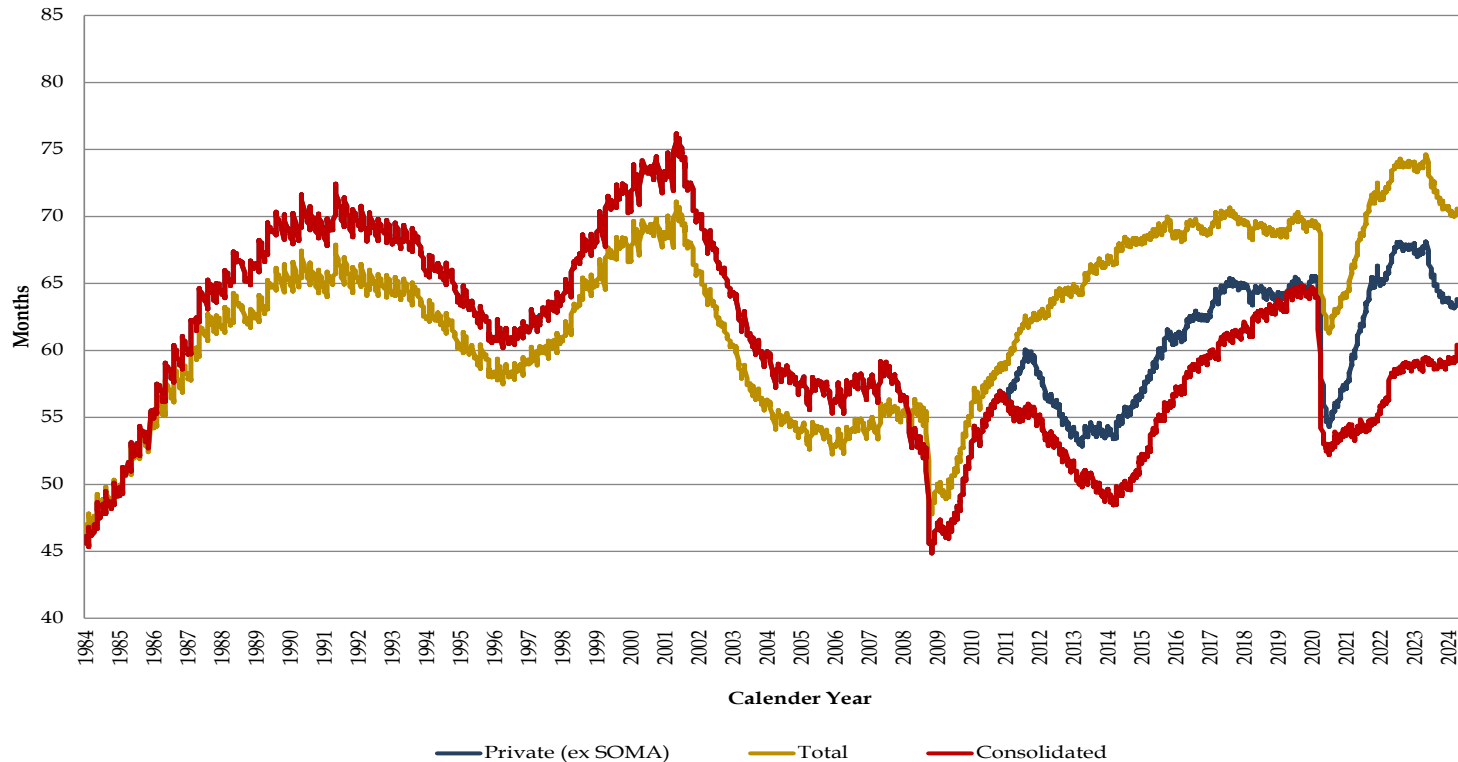

- 1) ***“Coupons Constant”***: Treasury maintains **coupon, FRN, and TIPS auction sizes constant** as of April 2024 and addresses any changes in financing needs by only increasing or decreasing T-bill auction sizes;
- 2) ***“Bills Constant”***: Treasury maintains **T-bills aggregate supply constant** at \$5.9 trillion as of 4/30/2024 and increases or decreases coupon, FRN, and TIPS auction sizes in response to financing needs in a manner that maintains current issuance proportions going forward;
- 3) ***“Prorated Bills and Coupons”***: Treasury maintains **T-bills share constant** at 21.8% as of 4/30/2024 and addresses any changes in financing needs by pro rata increasing or decreasing coupon, FRN, and TIPS auction sizes.

Privately-held net marketable borrowing needs used in the projections section of these charts are proxied using median primary dealer estimates for FY24, FY25 & FY26 (see page 18).

Weighted Average Maturity of Marketable Debt Outstanding

Consolidated WANRR Calculation*

* Weighted Average Next Rate Reset (WANRR) is a “Weighted Average Maturity” metric that attempts to adjust for the floating rate aspect of some Treasury debt. The WANRR is the average time until the outstanding debt’s interest rate is set to a new interest rate. For bills and fixed rate notes and bonds, the next rate reset is equal to the maturity date.

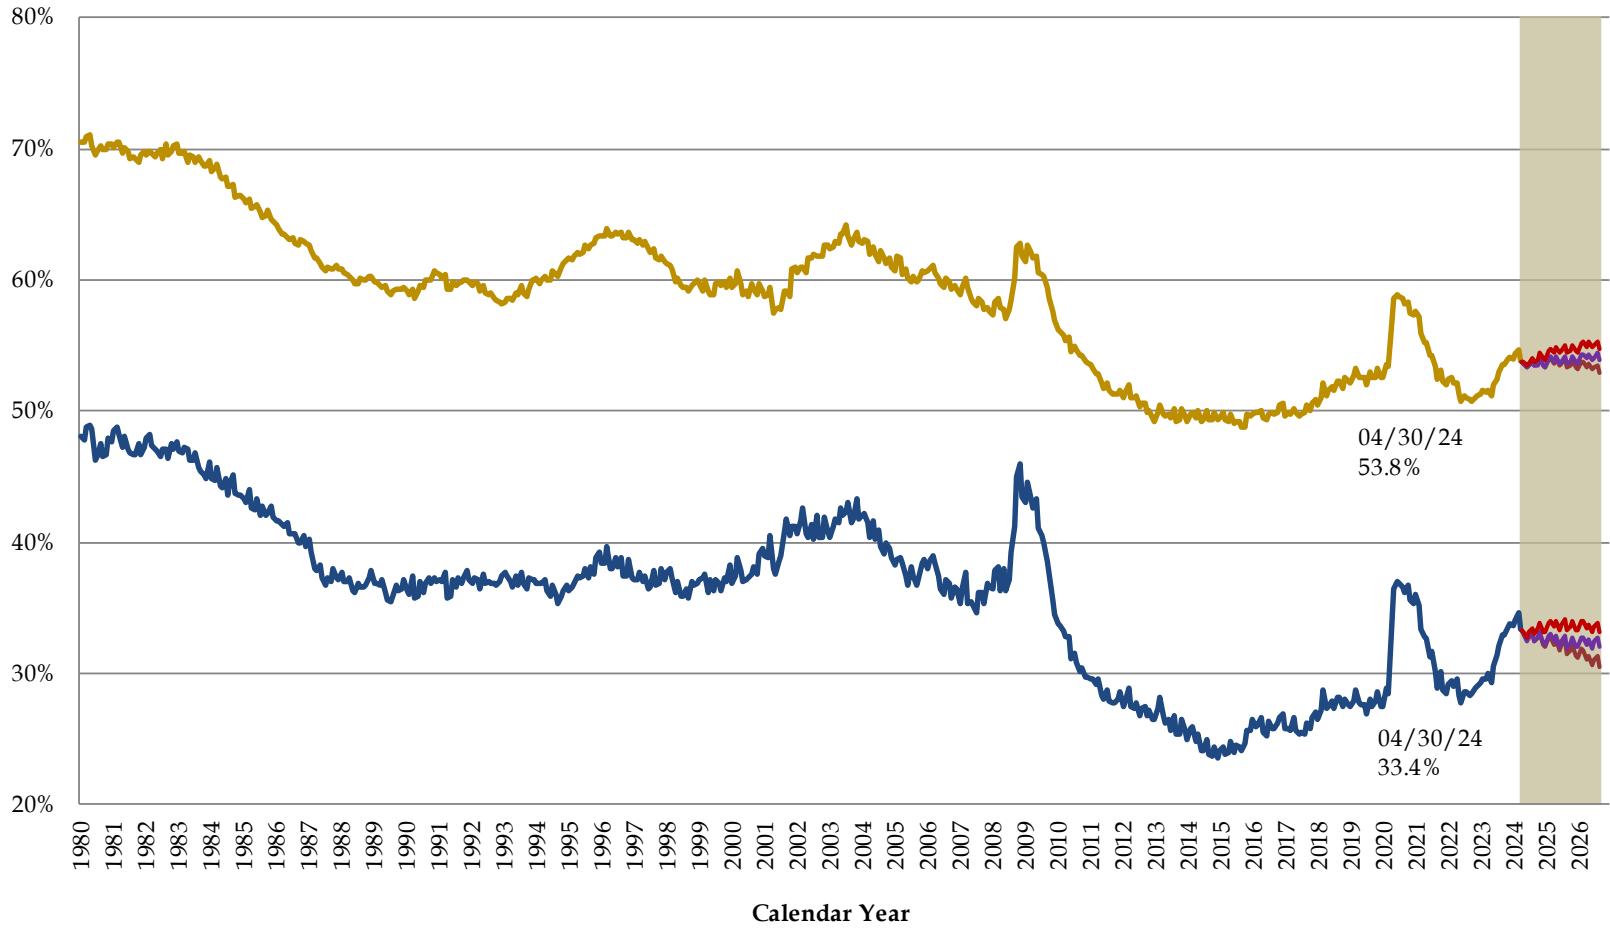

In contrast, for floating rate obligations, the time between the next rate reset date or maturity date is examined and the shorter period is used in the calculation.

The consolidated outstanding debt is defined as the private amount plus SOMA Treasury securities holdings less currency amount and Treasury General Account (TGA). In this calculation, SOMA Treasury holdings greater than the sum of the level of currency outstanding and TGA is treated as if it is a daily rate reset.

FY 2022 Actual Deficits and Privately-Held Net Marketable Borrowing, in \$ billions

	FY 2022 Actual
FY 2022 Deficit	1,375
FY 2022 + Change in Cash Balance	421

- Other Means of Financing include cash flows associated with federal credit programs, such as those related to student loans and loans to small businesses.
- Privately-Held Net Marketable Borrowing = Total Net Marketable Borrowing + SOMA Redemption
- SOMA redemption is the amount that the Federal Reserve redeems securities that Treasury has to replace with privately-held marketable borrowing. Actual SOMA redemptions amounts is from the Sources and Uses Reconciliation Table.
- Actual Privately-Held Net Marketable Borrowing is from the Sources and Uses Reconciliation Table.
