## Executive Summary

# Highlights of Treasury's May 2023 Quarterly Refunding Presentation to the Treasury Borrowing Advisory Committee (TBAC) 

Receipts and Outlays through Q2 FY2023 (without calendar adjustment)

|  | \$ billions | Change from same <br> period last year (\$ bn) | Change from same <br> period last year (\%) | As \% of <br> GDP | Change from same <br> period last year <br> (GDP $\%)$ |

| Total Outlays thru Q2 FY2023 | $\$ 3,149$ | $+\$ 359$ | $+13 \%$ | $23.8 \%$ | $1.5 \%$ |

Treasury's Projected Net Privately-held Marketable Borrowing for the Next Two Fiscal Quarters*

| Treasury OFP Near Term Fiscal <br> Projections | Net Privately Held Marketable <br> Borrowing (\$ billion) | Assumed End-of-Quarter <br> Cash Balance (\$ billion) |
| :---: | :---: | :---: |
| Q3 FY2023 | 726 | 550 (Jun) |
| Q4 FY2023 | 733 | 600 (Sep) |

*The cash balances for the next two quarter-ends assume enactment of a debt limit suspension or increase. Treasury's cash balance may be lower than assumed depending on several factors, including constraints related to the debt limit. If Treasury's cash balance for the end of either quarter is lower than assumed, and assuming no changes in the forecast of fiscal activity, Treasury would expect that borrowing would be lower by the corresponding amount(s).

Projected Net Privately-held Marketable Borrowing for the Next Three Fiscal Years from Various Sources**

| Fiscal Year | Primary Dealers Median April <br> 2023 (\$ billion) | OMB budget, March 2023 (\$ billion) | CBO Budget, February 2023 (\$ billion) |
| :---: | :---: | :---: | :---: |
| 2023 | 2,080 | 2,328 | 2,143 |
| 2024 | 1,823 | 2,233 | 2,014 |
| 2025 | 1,595 | 1,809 | 1,844 |

**All privately-held net marketable borrowing estimates are "normalized" with details from page 18.
Uncertainty regarding funding needs in FY2023 and FY2024 remains relatively high, reflecting a variety of views on the path of monetary policy, the duration of SOMA redemptions, and the outlook for the economy.

## Latest Market Expectations for Treasury Financing in April:

- Primary dealers expected no changes to coupon auction sizes at the May refunding despite the fact dealers increased their aggregate median estimates for privately-held net marketable borrowing by $\$ 600$ billion for the FY23-FY25 period in May, relative to their February estimates.
- Given the forecasted financing gap over FY2023 and beyond, all dealers noted that bills could be used to address near term financing gaps because bills as a percentage of debt outstanding was close to the lower bound of the TBAC recommended range of 15 to 20 percent and demand for bills was expected to remain strong over the near term. Most dealers expect that coupon auction sizes will need to eventually rise.
- All dealers expected Treasury to keep TIPS issuance stable in the upcoming quarter.

## Recent Deficit Forecasts

- Primary dealers increased their deficit estimates in April relative to estimates they provided in January. Their changes reflected a slower economy, possible recession and higher interest costs.
- Dealers generally suggested that risks were asymmetrical to the upside, i.e. risks for higher deficits, and noted a high degree of uncertainty around their estimates.
- The latest OMB and CBO estimates in the table below are provided for reference.

## Evolution of Median Primary Dealer, OMB, and CBO Deficit Estimates

Interest Rate Assumptions: 10-Year Treasury Note

## Section IV:

Estimated Borrowing Needs and
Financing Implications

## Assumptions for Financing Section (pages 16 to 20)

- Portfolio and SOMA holdings as of $3 / 31 / 2023$.
- Estimates assume privately announced issuance sizes and patterns remain constant for nominal coupons, TIPS, and FRNs given the issuance sizes in effect in April 2023, while using total bills outstanding of $\sim \$ 4.1$ trillion.
- The principal on the TIPS securities was accreted to each projection date based on market ZCIS levels as of $3 / 31 / 2023$.
- No attempt was made to account for future financing needs.
- Privately-held marketable borrowing excludes rollovers (auction "add-ons") of Treasury securities held in the Federal Reserve System Open Market Account (SOMA) but includes financing required due to SOMA redemptions. Secondary market purchases of Treasury securities by SOMA do not directly change net privately-held marketable borrowing but, all else equal, when the securities mature and assuming the Fed does not redeem any maturing securities, this would increase the amount of cash raised for a given privately-held auction size by increasing the SOMA "add-on" amount. These borrowing estimates are based upon current law and do not include any assumptions for the impact of additional legislation that may be passed.
- All estimates assume enactment of a debt limit suspension or increase.

| Estimates as of: |  | Apr-23 |  | May-23 | Mar-23 | Feb-23 |

- *All privately-held net marketable borrowing estimates of are "normalized" using:
- 1) the median Primary Dealer's estimates for SOMA redemptions, and
- 2) assuming OFP's end of fiscal year 2023 cash balance of $\$ 600$ billion, held constant in out years.
- OMB projections are using estimates are from Table S-1 of "Budget of The U.S. Government Fiscal Year 2024," March 2023.
- CBO projections are using estimates are from Table 1-1 of "The Budget and Economic Outlook: 2023 to 2033," February 2023.
- OFP's SOMA redemption estimate excludes securities maturing on 9/30/2023 (Saturday).

## Evolution of Median Primary Dealer, OMB, and CBO Privately-Held Net Marketable Borrowing Estimates*

* Note that both the OMB and CBO privately-held net marketable borrowing estimates are calculated by adjusting their respective deficit estimates using dealer's median SOMA redemption estimates. In addition, all the PD, OMB and CBO privately-held borrowings are normalized with the same cash balance changes.

Projected Privately-Held Net Marketable Borrowing Assuming Private Coupon Issuance \& Total Bills Outstanding Remain Constant as of 03/31/2023*

*Treasury's latest primary dealer survey median/interquartile range estimates can be found on page 18. OMB's borrowing projections are from Table S-1 of "Budget of The U.S. Government Fiscal Year 2024," March 2023. CBO's borrowing projections are using estimates from Table 1-1 of "The Budget and Economic Outlook: 2023 to 2033," February 2023. OMB and CBO borrowing estimates from FY23 to FY25 are normalized to privately-held net borrowing after adding PD survey median SOMA redemption assumptions for FY23/24/25. In addition, all privately-held net borrowing estimates are normalized with OFP FY23 ending cash balance of $\$ 600$ billion.

## Section V: Select Portfolio Metrics

Note: Several of the portfolio metric charts that follow include three years of projected metrics.
These projections are hypothetical and are meant for illustrative purposes only. The projections contained in these charts should not be interpreted as representing any future policy decisions regarding Treasury financing.

Projections illustrate how various portfolio metrics could evolve under three hypothetical financing scenarios. The scenarios were chosen to illustrate a potential range of portfolio metric outcomes based on hypothetical issuance choices.

The scenarios are:

1) "Coupons Constant": Treasury maintains coupon, FRN, and TIPS auction sizes constant starting in April 2023 and addresses any changes in financing needs by only increasing or decreasing T-bill auction sizes;
2) "Bills Constant": Treasury maintains T-bills aggregate supply constant at $\$ 4.1$ trillion as of $3 / 31 / 2023$ and increases or decreases coupon, FRN, and TIPS auction sizes in response to financing needs in a manner that maintains current issuance proportions going forward;
3) "Prorated Bills and Coupons": Treasury maintains T-bills share constant at $16.7 \%$ as of $3 / 31 / 2023$ and addresses any changes in financing needs by pro rata increasing or decreasing coupon, FRN, and TIPS auction sizes.

Privately-held net marketable borrowing needs used in the projections section of these charts are proxied using median primary dealer estimates for FY23, FY24, \& FY25 (see page 18).

## Weighted Average Maturity of Marketable Debt Outstanding

## Consolidated WANRR Calculation*

* Weighted Average Next Rate Reset (WANRR) is a "Weighted Average Maturity" metric that attempts to adjust for the floating rate aspect of some Treasury debt. The WANRR is the average time until the outstanding debt's interest rate is set to a new interest rate. For bills and fixed rate notes and bonds, the next rate reset is equal to the maturity date.
In contrast, for floating rate obligations, the time between the next rate reset date or maturity date is examined and the shorter period is used in the calculation.
The consolidated outstanding debt is defined as the private amount plus SOMA Treasury securities holdings less currency amount. In this calculation, SOMA Treasury holdings greater than the level of currency outstanding is treated as if it is a daily rate reset.

## Privately-Held Net Marketable Borrowing Definition and Calculation Example

## FY 2022 Actual Deficits and <br> Privately-Held Net Marketable Borrowing, in \$ billions

|  | FY 2022 Actual |
| :--- | :---: |
| FY 2022 Deficit | 1,375 |
| FY 2022 + Change in Cash Balance | 421 |
| FY 2022 + Other Means of Financing (e.g. Direct Loans) | -125 |
| FY 2022 = Total Net Marketable Borrowing | 1,671 |
| FY 2022 + SOMA Redemption | 150 |
| FY 2022 = Privately-Held Net Marketable Borrowing | 1,821 |

- Actual deficits are sourced from the Monthly Treasury Statement.
- Actual change in cash balance is sourced from the Daily Treasury Statement. Change in cash balance = cash balance of Sept 30, 2022 - cash balance of Sept 30, 2021
- Other Means of Financing include cash flows associated with federal credit programs, such as those related to student loans and loans to small businesses.
- Privately-Held Net Marketable Borrowing = Total Net Marketable Borrowing + SOMA Redemption
- SOMA redemption is the amount that the Federal Reserve redeems securities that Treasury has to replace with privately-held marketable borrowing. Actual SOMA redemptions amounts is from the Sources and Uses Reconciliation Table.
- Actual Privately-Held Net Marketable Borrowing is from the Sources and Uses Reconciliation Table.
