Privacy and Civil Liberties Impact Assessment
for the

Department-wide Use of FOIAXpress

July 28, 2020

Reviewing Official

Timothy H. Skinner
Bureau Privacy and Civil Liberties Officer
Departmental Offices
Department of the Treasury
Section 1: Introduction

PCLIAs are required for all systems and projects that collect, maintain, or disseminate personally identifiable information (PII). The system owner completed this assessment pursuant to Section 208 of the E-Government Act of 2002 (“E-Gov Act”), 44 U.S.C. § 3501, Office of the Management and Budget (OMB) Memorandum 03-22, “OMB Guidance for Implementing the Privacy Provisions of the E-Government Act of 2002,” and Treasury Directive 25-07, “Privacy and Civil Liberties Impact Assessment (PCLIA),” which requires Treasury Offices and Bureaus to conduct a PCLIA before: (1) developing or procuring information technology (IT) systems or projects that collect, maintain or disseminate PII from or about members of the public, or (2) initiating a new collection of information that: (a) will be collected, maintained, or disseminated using IT; and (b) includes any PII permitting the physical or online contacting of a specific individual, if identical questions have been posed to, or identical reporting requirements imposed on, 10 or more persons (not including agencies, instrumentalities, or employees of the federal government).

It is the policy of the Department of the Treasury (“Treasury” or “Department”) and its Bureaus to conduct a PCLIA when PII is maintained in a system or by a project. This PCLIA provides the following information regarding the system or project: (1) an overview of its purpose and functions; (2) a description of the information collected; (3) a description of how information is maintained, used, and shared; (4) an assessment of whether the system or project is in compliance with federal requirements that support information privacy; and (5) an overview of the redress/complaint procedures available to individuals who may be affected by the use or sharing of information by the system or project.

*With the exception the Internal Revenue Service (IRS), the Office of the Comptroller of the Currency (OCC), and the Treasury Inspector General for Tax Administration (TIGTA), this PCLIA covers the use of FOIAXpress by Treasury and all of its bureaus, and offices. The IRS and OCC use FedRAMP FOIAXpress Moderate while TIGTA uses an on-premises version of FOIAXpress Moderate.*

Section 2: System Overview

Section 2.1: System/Project Description and Purpose

The Freedom of Information Act (FOIA) of 1966, as amended (5 U.S.C § 552), permits any person to request access to federal agency records. The FOIA also establishes a presumption that records in the possession of federal departments and agencies are accessible to the people, except to the extent the records are protected from disclosure by any of nine exemptions contained in the law, or by one of three special law enforcement record exclusions. Records that, generally, may be protected from disclosure are: Properly classified material; limited kinds of purely internal matters; matters exempt from disclosure by other statutes; trade secrets or commercial or financial information obtained from a person and privileged or confidential; internal agency communications that represent the deliberative, pre-decisional process, attorney work product, or attorney-client records; information that would be a clearly unwarranted invasion of personal privacy; law enforcement records to the extent that one of six specific harms could result from disclosure; bank examination records; and oil well and similar information.
The Privacy Act of 1974, as amended (5 U.S.C. § 552a), embodies a code of fair information principles that governs the collection, maintenance, use, and dissemination of PII by federal departments and agencies. Further, the Privacy Act provides U.S. citizens and lawful permanent residents (LPRs) the opportunity to request access to federal agency records that are maintained about them.

At the Department of the Treasury (“Department” or “Treasury”) any PII that is maintained about a U.S. citizen or lawful permanent resident (LPR) in a system of records is treated as a system of records subject to the Privacy Act.

FOIA provides the public the rights to government records while the Privacy Act grants individuals the right to access records about themselves. The Privacy Act ensures proper protections covering records maintained by the agency on individuals.

Treasury is replacing its existing GoFOIA system with FOIAXpress to manage the entire lifecycle of FOIA/Privacy Act requests and appeals, from the initial request to the final disclosure of records. FOIAXpress is a commercial off-the-shelf web-based system. The purpose of FOIAXpress is to allow: (1) the processing of access requests and administrative appeals made under the FOIA (2) the processing of access and amendment requests and administrative appeals under the Privacy Act; and (3) enable Treasury bureaus and offices to carry out ancillary responsibilities related to the FOIA and the Privacy Act, such as the FOIA Annual Report, the Chief FOIA Officer Report, and the Quarterly FOIA Report to the Attorney General.

FOIAXpress maintains PII that Treasury collects from members of the public and individuals who submit FOIA and Privacy Act requests to Treasury. Treasury uses this electronic system to track and fulfill requests filed by members of the public seeking access to nonpublic Treasury records under the Freedom of Information Act, and requests from individuals seeking access under the Privacy Act of 1974 to Treasury records, if any, about themselves.

**Internal FOIAXpress**

The Internal FOIAXpress component ensures that FOIA and Privacy Act requests are addressed in a timely manner. This FOIAXpress component promotes the streamlining of procedures to process FOIA and Privacy Act requests. The Internal FOIAXpress is used to:

- Log and track the receipt and processing of each FOIA or Privacy Act request;
- Record the status of requests and relevant deadlines;
- Scan, store, redact and manage records that have been gathered in response to each request, some of which contain personally identifiable information (PII) about the requester or about other individuals mentioned or discussed in the relevant records;
- Track FOIA processing statistics and fees, and generate compliance reports on the number, type, and disposition of FOIA requests processed, as required by the U.S. Department of Justice.
External FOIAXpress Public Access Link Portal (PAL)

EPALP enhances service delivery and transparency through a public-facing, secure web portal. Integrated directly with FOIAXpress, PAL offers a centralized location for receiving online FOIA requests, delivering responsive records, communicating with requesters, and providing access to released documents in a public reading room. Requesters have the option of creating their own account to electronically submit FOIA requests or submitting requests without creating an account.

☐ A PCLIA is being done for this system for the first time.
2. ☐ This is an update of a PCLIA previously completed and published under this same system or project name. The date the earlier PCLIA was published was 1.1.2020.
3. ☒ This is an update of a PCLIA previously completed and published for a similar system that is undergoing migration to a new system: FOIAXpress. The name of that previous PCLIA was FOIA Citizens' Web Portal and the date of its publication was March 25, 2011.

Section 2.2: Authority to Collect

Federal agencies must have proper authority before initiating a collection of information. The authority is sometimes specifically granted by a specific statute, an Executive order (EO) of the President or other legal authority. The following specific authorities authorize FOIAXpress to collect the information necessary to process FOIA and Privacy Act requests:

- The Freedom of Information Act, 5 U.S.C. 552;

The information and records stored on the Internal FOIAXpress system and any records disclosed through the EFPALP are not new information collections. These existing Treasury records are collected pursuant to the authorities stated in the privacy documentation (SORNS and PCLIA) applicable to the information systems and records from which they originated.

All Treasury systems and projects derive general authority to collect information from:

- 31 U.S.C. 321 – General authorities of the Secretary establish the mission of the Department of the Treasury
- 5 U.S.C. 301 – Department regulations for the operations of the department, conduct of employees, distribution and performance of its business, the custody, use, and preservation of its records, papers, and property.

Section 2.3: Privacy Act Applicability; SORN Requirement

Under certain circumstances, federal agencies are allowed to exempt a system of records from certain provisions in the Privacy Act. This means that, with respect to information systems and papers files that maintain records in that system of records, the agency will not be required to comply with the requirements in Privacy Act provisions that are properly exempted. If this system or project contains records covered by the Privacy Act, the applicable Privacy Act system of records notice(s) (SORNs) (there may be more than one) that cover the records in this system
or project must list the exemptions claimed for the system of records (it will typically say: “Exemptions Claimed for the System” or words to that effect).

All answers in this section must be provided in the space as instructed after checking the appropriate box(es).

Section 2.3(a) Please check ALL statements below that apply to your system or project and provide any additional information requested. Please read all possible responses before selecting an answer.

1. ☐ The system or project does not retrieve records about an individual using an identifying number, symbol, or other identifying particular assigned to the individual. A SORN is not required with respect to the records in this system.

2. ☒ The system or project does retrieve records about an individual using an identifying number, symbol, or other identifying particular assigned to the individual. A SORN is required with respect to the records in this system. Treasury.004 - Freedom of Information Act/Privacy Act Request Records - - 81 FR 78266 (Nov. 7, 2016).

3. ☐ A SORN was identified in the original PCLIA and a determination was made during this current PCLIA update that modifications [choose one] ☐ were ☐ were not required to that SORN. [If modifications were made, generally describe them here]. The current applicable SORN is: [Provide here the SORN number(s), system of records name(s) and the citation to the SORN(s) in the Federal Register.]

4. ☐ A SORN(s) was not identified or required in the original PCLIA, but a determination was made during this current PCLIA update that a SORN(s) is now required. The applicable SORN(s) is:[Provide here the SORN number(s), system of records name(s) and the citation to the SORN(s) in the Federal Register].

5. ☒ A SORN was published and no exemptions are taken from any Privacy Act requirements. Please note that the Department has claimed one or more exemptions (see 31 CFR 1.36) for a number of its other systems of records under 5 U.S.C. 552a(j)(2) and (k)(1), (2), (3), (4), (5), and (6). The FOIA/Privacy Act request review processes may include records properly exempted from other Treasury systems of records. These records may become a part of the case records in this information system. To the extent that copies of exempt records from those other systems have been recompiled and/or entered into these FOIA/Privacy Act case records, the Department claims the same exemptions for the records as they have in the original systems of records of which they are a part.

6. ☐ Exemptions are claimed from the following Privacy Act provisions in the applicable SORN(s): [List here all exemptions taken in the applicable SORN; Hint: it’s at the end of the SORN]: The citation to the applicable Notice of Proposed Rulemaking and/or Final Rule is[provide here the Federal Register Citation to the NPRM and Final Rule (if a Final Rule was required)].

Section 3: Information Collection

Section 3.1: Relevant and Necessary
The Privacy Act requires “each agency that maintains a system of records [to] maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President.” 5 U.S.C. § 552a (e)(1). It allows federal agencies to exempt records from certain requirements (including the relevant and necessary requirement) under certain conditions. 5 U.S.C. §552a (k). The proposed exemption must be described in a Notice of Proposed Rulemaking (“NPRM”). In the context of the Privacy Act, the purpose of the NPRM is to give the public notice of a Privacy Act exemption claimed for a system of records and solicit public opinion on the proposed exemption. After addressing any public concerns raised in response to the NPRM, the agency must issue a Final Rule. It is possible for some, but not all, of the records maintained in the system or by the project to be exempted from the Privacy Act through the NPRM/Final Rule process.

**Section 3.1(a) Exemption Claimed from this Requirement?**

1. ☒ The PII maintained in this system or by this project is **not** exempt from 5 U.S.C. § 552a(e)(1), the Privacy Act’s requirement that an agency “maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President.”

2. ☐ The PII maintained in this system or by this project **is** exempt from 5 U.S.C. § 552a(e)(1), because [See Appendix B for a list of acceptable bases for claiming this exemption and cut and paste here all that apply].

**Section 3.1(b) Continuously Assessing Relevance and Necessity**

1. ☐ The PII in the system is not maintained in a system of records. Therefore, the Privacy requirements do not apply. [Explain here what you do to ensure relevance and necessity despite the fact that the Privacy Act does not apply].

2. ☐ The PII in the system is maintained in a system of records, but the agency exempted these records from the relevance and necessity requirement. [Explain here what you do to ensure relevance and necessity to the extent possible despite the fact the records are exempt from this requirement].

3. ☒ The system owner conducted an assessment prior to collecting PII for use in the system or project to determine which PII data elements and types (see Section 3.2 below) were relevant and necessary to meet the system’s or project’s mission requirements. During this analysis, the system owner sought to minimize the contact information required from FOIA/Privacy Act requestors. The system owner determined that the only data elements Treasury needed to request from all requestors were first and last name, email address and requestor category (commercial use requesters; educational and noncommercial scientific institutions; representatives of the news media, and all other requestors). The optional data fields (address [street, state, zip code, country], phone number [home or business option available], organization name, and job title are contained in the form for contact purposes. Every time this PCLIA is updated, this ongoing assessment will be revisited. If it is determined at any time that certain PII data elements are no longer relevant or necessary, the system owner will update this PCLIA to discuss how the data element was removed from the system and is no longer collected.
4. ☒ With respect to PII currently maintained (as of the time this PCLIA is being done) in the system or by the project, the PII is limited to only that which is relevant and necessary to meet the system’s or project’s mission requirements. During the PCLIA process, the system always undergoes a review to ensure the continuing relevance and necessity of the PII in the system.

5. ☒ With respect to PII maintained in the system or by the project, there is a process in place to continuously reevaluate and ensure that the PII remains relevant and necessary. During the PCLIA process, the system always undergoes a review to ensure the continuing relevance and necessity of the PII on the system. If a determination is made that particular PII is no longer relevant and necessary in between PCLIA updates, this PCLIA will be updated at that time.

Section 3.2: PII and/or information types or groupings

The checked boxes below represent the types of information maintained in the system or by the project that are relevant and necessary for the information system or project to fulfill its mission. PII identified below is used by the system or project to fulfill the purpose stated in Section 2.2 above—Authority to Collect.

Biographical/general information

☒ Name (First and Last) ☐ Nationality
☐ Age ☐ Citizenship
☐ Date of birth ☐ Ethnicity
☒ Home/Business physical/postal mailing address ☐ Gender
☒ Zip Code ☐ Race
☒ Personal home/Business phone, cell phone, or fax number ☒ Personal/Business e-mail address
☒ Other: unredacted documents from other systems stored in FOIAXpress that will be used to support FOIA requests may contain PII.

Other information

☐ Resume or curriculum vitae ☐ Cubical or office number
☐ Religion/Religious Preference ☐ Education Information [please describe]
☐ Professional/personal references or other information about an individual’s friends, associates or acquaintances. ☐ Contact lists and directories (known to contain at least some personal information).
☐ Sexual Orientation ☐ Marital Status
☒ Group/Organization Membership ☐ Job title
(whether the requestor [if an individual’s name is provided] is a representative of the news media or associated with a commercial; educational or noncommercial scientific institution).

☐ Other: unredacted documents; written correspondence received from requesters and responses made to such requests; internal processing documents and memoranda; referrals and copies of records provided or withheld; and may include

☐ Country of Birth ☐ Immigration Status
☐ Alien (including nickname) ☐ City or County of Birth
☐ Military Service Information ☐ Other: Country of city of residence
☒ Other: Country in which the requestor is located.

☐ Veteran’s preference ☐ Spouse Information
☐ Retirement eligibility information ☒ Information about other relatives.
☒ Other: Redacted documents; written correspondence received from requesters and responses made to such requests; internal processing documents and memoranda; referrals and copies of records provided or withheld; and may include
Identifying numbers assigned to individuals

☐ Full Social Security number
☐ Truncated Social Security Number (e.g., last 4 digits)
☐ Employee Identification Number
☐ Taxpayer Identification Number
☐ File/Case ID Number
☐ Alien Registration Number

☐ Employee Identification Number
☐ Taxpayer Identification Number
☐ File/Case ID Number
☐ Alien Registration Number

Specific Information/File Types

☐ Taxpayer Information/Tax Return Information
☐ Civil/Criminal History Information/Police Records (obtained from government source)
☐ Protected Information (as defined in Treasury Directive 25-10)
☐ Information provided under a confidentiality agreement
☐ Business Financial Information (including loan information)
☐ Passport information (state which passport data elements are collected if not all)

☐ Law Enforcement Information
☐ Civil/Criminal History Information/Police Records (obtained from commercial source)
☐ Credit History Information (commercial source)
☐ Case files
☐ Personal Financial Information (e.g., loan information)
☐ Other: (please describe)

Audit Log and Security Monitoring Information

☒ User ID assigned to or generated by a user of Treasury IT
☒ Passwords generated by or assigned to a user of Treasury IT
☒ Files accessed by a user of Treasury IT (e.g., web navigation habits)
☐ Public Key Information (PKI).
☐ Internet Protocol (IP) Address
☐ Global Positioning System (GPS)/Location Data

☒ Files and folders accessed by a user of Treasury IT
☒ Internet or other queries run by a user of Treasury IT
☒ Date and time an individual accesses a facility, system, or other IT
☐ Still photos of individuals derived from security cameras.
☐ Video of individuals derived from security cameras
☐ Secure Digital (SD) Card or Other Data stored on a card or other technology

☐ Other (please describe)

Security Clearance/Background Check Information
☐ Credit History Information (government source)
☐ Bank Secrecy Act Information
☐ Personnel Files
☐ Information subject to the terms of an international or other agreement

Biometric information used to access Treasury facilities or IT
☐ Contents of files accessed by a user of Treasury IT
☐ Information revealing an individual’s presence in a particular location as derived from security token/key fob, employee identification card scanners or other IT.
☐ Purchasing habits or preferences
☐ Commercially obtained internet navigation/purchasing habits of individuals
☐ Device settings or preferences (e.g., security
3.3 Sources from which PII is obtained

Focusing on the context in which the data was collected and used (i.e., why it is collected and how it is used), check **ALL** sources from which PII is collected/received and stored in the system or used in the project.

1. **Members of the Public**

   ✓ Members of the Public (i.e., including individuals who are current federal employees who are providing the information in their “personal” capacity (unrelated to federal work/employment). All of the following are members of the public. Please check relevant boxes (based on the context of collection and use in this system) for members of the public whose information is maintained in the system (only check if relevant to the purpose for collecting and using the information):

   ✓ Members of the general public (current association with the federal government, if any, is irrelevant to the collection and use of the information by the system or project). The information is submitted to Treasury by the
requesters (members of the public) via EFPALP and maintained in FOLAXpress.
☒ Retired federal employees.
☒ Former Treasury employees.
☒ Federal contractors, grantees, interns, detailees etc.
☒ Federal job applicants.
☐ Other: [Explain here].

2. Current Federal Employees, Interns, and Detailees
☒ Current Federal employees providing information in their capacity as private citizen.
☒ Interns.
☒ Detailees.
☐ Other employment-related positions. [name the position here and discuss how/why PII is collected from this source.].

3. Treasury Bureaus (including Departmental Offices)
☐ Other Treasury Bureaus: (name the bureau(s) here and identify the bureau/office information system from which the PII originated) and (how/why PII is collected from this source.).

4. Other Federal Agencies
☐ Other federal agencies: (name each agency here and explain how/why PII is collected from this source.).

5. State and Local Agencies
☒ State and local agencies

6. Private Sector
☒ Private sector organizations (for example, news organizations, banks and financial organizations, data brokers or other commercial sources).

7. Other Sources
☐ Other sources not covered above (for example, foreign governments).
(Name the other sources here and explain how/why PII is collected from this source).

Section 3.3: Privacy and/or civil liberties risks related to collection
When Federal agencies request information from an individual that will be maintained in a system of records, they must inform the individual of the following: “(A) the authority (whether granted by statute, or by executive order of the President) which authorizes the solicitation of the information and whether disclosure of such information is mandatory or voluntary; (B) the principal purpose or purposes for which the information is intended to be used; (C) the routine uses which may be made of the information, as published pursuant to paragraph (4)(D) of this subsection; and (D) the effects on [the individual], if any, of not providing all or any part of the requested information.” 5 U.S.C § 522a(e)(3). This is commonly called a Privacy Act Statement.
Section 3.3(a) Collection Directly from the Individual to whom the PII pertains

1. ☐ None of the PII in the system was collected directly from an individual to whom it pertains. [Explanation here.]
2. ☐ Some or ☒ all of the information in this system was collected directly from an individual to whom it pertains. This includes information collected from FOIA/Privacy Act requestors (via PAL) and Treasury FOIAXpress system users only. Records maintained in Internal FOIAXpress typically originate in other Treasury systems of records (in those situations where the Privacy Act is applicable to the records).

Section 3.3(b) Privacy Act Statements.

1. ☐ None of the PII in the system was collected directly from the individuals to whom it pertains. Therefore, a Privacy Act Statement is not required.
2. ☐ Some ☒ All of the PII in the PAL component of FOIAXpress was collected directly from the individual to whom it pertains. Therefore, a Privacy Act Statement was posted at the point where the PII was collected directly from the individual. That Privacy Act Statement was provided to the individual ☒ on the web form on which the PII was collected ☐ on a separate sheet of paper that the individual could retain; or ☐ in an audio recording or verbally at the point where the information was collected (e.g., on the phone) or ☐ other [please explain].
3. The Privacy Act Statement contained the following:
   a. ☒ The authority (whether granted by statute, or by Executive order of the President) which authorizes the solicitation of the information.
   b. ☒ Whether disclosure of such information is mandatory or voluntary.
   c. ☒ The principal purpose or purposes for which the information is intended to be used.
   d. ☒ The individuals or organizations outside of Treasury with whom the information may be/will be shared.
   e. ☒ The effects on the individual, if any, if they decide not to provide all or any part of the requested information.

Section 3.3(c) Use of Full Social Security Numbers

The OMB Guidelines also note that subsection (e)(3) is applicable to both written and oral (i.e., interview) solicitations of personal information. Therefore, even if a federal employee or contractor has a fixed list of questions that they orally ask the individual in order to collect their information, this requirement applies.

Treasury is committed to eliminating unnecessary collection, use, and display of full Social Security numbers (“SSN”) and redacting, truncating, and anonymizing SSNs in systems and documents to limit their accessibility to individuals who do not have a need to access the full SSN in order to perform their official duties. Moreover, the Privacy Act provides that: “It shall be unlawful for any Federal, State or local government agency to deny to any individual any right, benefit, or privilege provided by law because of such individual’s refusal to disclose his social security account number.” Pub. L. No. 93–579, § 7. This provision does not apply to: (1) any
disclosure which is required by federal statute; or (2) any disclosure of an SSN to any federal, state, or local agency maintaining a system of records in existence and operating before January 1, 1975, if such disclosure was required under statute or regulation adopted prior to such date to verify the identity of an individual. Id. at § 7(a)(2)(A)-(B).

Section 3.3(d) Justification of Social Security Numbers

1. ☒ N/A No full SSNs are maintained in the system or by the project. [Explain if any portion of the SSN short of the full 9 digits is used in the system: Explain]; if the full SSN is located anywhere in the system (even if it is redacted, truncated or anonymized when viewed by users, please check number 2 below)].

2. ☐ Full SSNs are maintained in the system or by the project and the following approved Treasury uses of SSNs apply:
   - ☐ security background investigations;
   - ☐ interfaces with external entities that require the SSN;
   - ☐ a legal/statutory basis (e.g. where collection is expressly required by statute);
   - ☐ when there is no reasonable, alternative means for meeting business requirements;
   - ☐ statistical and other research purposes;
   - ☐ delivery of government benefits, privileges, and services;
   - ☐ for law enforcement and intelligence purposes;
   - ☐ aging systems with technological limitations combined with funding limitations render impracticable system modifications or replacements to add privacy risk reduction tools (partial/truncated/reduced or masked SSNs); and
   - ☐ as a unique identifier for identity verification purposes.

Section 3.3(e) Controls implemented to limit access to and or improper disclosure of full Social Security Numbers

1. ☒ Full SSNs are not maintained in the system or by the project.

2. ☐ Full SSNs are maintained in the system or by the project and the following controls are put in place to reduce the risk that the SSN will be seen or used by someone who does not have a need to use the SSN in order to perform their official duties (check ALL that apply):
   a. ☐ The entire SSN data field is capable of suppression (i.e., being turned off) and the data field is suppressed when the SSN is not required for particular system users to perform their official duties.
   b. ☐ Do not require the SSN to perform their official duties. ☐ Within the system, an alternative number (e.g., an Employee ID) is displayed to all system users who do not require the SSN to perform their official duties. The SSN is only linked to the alternative number within the system and when reporting outside the system (to an agency that requires the full SSN). The SSN is not visible to system users (other than administrators).
d. ☐ The SSN is truncated (i.e., shortened to the last 4 digits of the SSN) when displayed to all system users for whom the last four digits (but not the full) SSN are necessary to perform their official duties.

e. ☐ Full or truncated SSNs are only downloaded to spreadsheets or other documents for sharing within the bureau or agency when disclosed to staff whose official duties require access to the full or truncated SSNs for the particular individuals to whom they pertain. No SSNs (full or truncated) are included in spreadsheets or documents unless required by each recipient to whom it is disclosed in order to perform their official duties (e.g., all recipients have a need to see the SSN for each employee in the spreadsheet).

f. ☐ Other: [Please describe].

Section 3.3(f) Denial of rights, benefits, or privileges for refusing to disclose Social Security Number

1. ☒ N/A No SSNs are maintained in the system or by the project.

2. ☐ Full SSNs are collected, but no individual will be denied any right, benefit, or privilege provided by law if the individual refuses to disclose their SSN for use in the system or project. If the individual chooses not to provide their SSN [please describe here what will happen (something less than denial of a privilege etc.) if the individual chooses not to provide their SSN].

3. ☐ Full SSNs are collected, and the individual will be denied the following right, benefit, or privilege provided by law if they refuse to disclose their SSN: [please identify the right, benefit, or privilege if the individual will be denied if they choose not to provide their SSN: Identify here]. Denial of this right, benefit or privilege does not violate the law because: [choose one of the two boxes below]:
   a. ☐ SSN disclosure is required by the following Federal statute or Executive Order; OR
   b. ☐ The SSN is disclosed to a Federal, state, or local agency that maintains a system of records that was in existence and operating before January 1, 1975, and disclosure was required under statute or regulation adopted prior to such date to verify the identity of an individual.

Section 3.3(g) Records describing how individuals exercise First Amendment rights

The Privacy Act requires that Federal agencies “maintain no record describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual about whom the record is maintained or unless pertinent to and within the scope of an authorized law enforcement activity.” 5 U.S.C. § 552a(e)(7).

1. ☒ N/A. The system or project does not maintain information describing how an individual exercises their rights guaranteed by the First Amendment. The system does give the requestor the option of identifying themselves as a representative of the news media or their association with a commercial, educational or noncommercial scientific institution. This information is provided voluntarily in order to assess the fees associated with the request.
Section 4: Maintenance, use, and sharing of the information

Section 4.1: Ensuring accuracy, completeness, and timeliness of information collected, maintained, and shared when it is used to make determinations about individuals

The Privacy Act and Treasury policy require that Treasury bureaus and offices take additional care when collecting and maintaining information about individuals when it will be used to make determinations about those individuals (e.g., whether they will receive a federal benefit). This includes collecting information directly from the individual where practicable and ensuring that the information is accurate, relevant, timely and complete to assure fairness to the individual when making a determination about them. This section addresses the controls/protections put in place to address these issues.

The Privacy Act requires that Federal agencies “maintain all records which are used by the agency in making any determination about any individual with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the determination.” 5 U.S.C § 552a(e)(5). If a particular system of records meets certain requirements (including the NPRM process defined in Section 3.1 above), an agency may exempt the system of records (or a portion of the records) from this requirement. Exemptions may be found at the bottom of the relevant SORN next to the heading: “Exemptions Claimed for this System.”

Section 4.1(a). Exemption from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act

1. ☒ None of the information maintained in the system or by the project that is part of a system of records is exempt from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act. Records included in the Internal
FOIAXpress component that are under review for possible disclosure under FOIA or the Privacy Act may also be exempt from this Privacy Act requirement, depending on the exemptions claimed in the notice for the applicable system of records from which the records originated.

2. □ All □ Some of the PII maintained in the system or by the project is part of a system of records and is exempt from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act. The exemption claimed for these records is appropriate because [please see Appendix B which contains sample justifications for this exemption and provide the appropriate bases here [more than one bases may apply].

3. □ The PII maintained in the system or by the project is not: (a) part of a system of records as defined in section (e)(5) of the Privacy Act; or (b) used to make adverse determinations about individuals (defined in the Privacy Act as U.S. Citizens and legal permanent residents). Instead, the information is used to [describe how the information is used and why this use does not involve adverse determinations].

4. □ None of the information maintained in the system or by the project is part of a system of records as defined in section (e)(5) of the Privacy Act, but the information in the system is used to make adverse determinations about individuals (defined in the Privacy Act as U.S. Citizens and legal permanent residents). Despite the fact that the Privacy Act does not apply, the following protections are in place to ensure fairness to the individual: explain here.

Section 4.1(b) Protections in place despite exemption from the accuracy, relevance, timeliness, and completeness requirements

1. ☒ None of the information maintained in the system or by the project that is part of a system of records is exempt from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act. Records included in the Internal FOIAXpress component that are under review for possible disclosure under FOIA or the Privacy Act may also be exempt from this Privacy Act requirement, depending on the exemptions claimed in the notice for the applicable system of records from which the records originated.

2.

3. □ For all information maintained in the system or by the project that is part of a system of records that is exempt from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act, the following efforts are made to ensure accuracy, relevance, timeliness, and completeness to the extent possible without interfering with the (check one) □ law enforcement □ intelligence □ other [describe here] mission requirements for which the system or project was created [choose ALL that apply]:
   a. □ The exempt information is not actually used to make any adverse determinations about individuals.
   b. □ The exempt information is not actually used to make any adverse determinations about individuals without additional research and investigation to ensure accuracy, relevance, timeliness, and completeness.
Section 4.1(c) Collecting information directly from the individual when using it to make adverse determinations about them.

Section 552a(e)(2) of the Privacy Act requires that Federal agencies that maintain records in a system of records are required to collect information to the greatest extent practicable directly from the individual when the information about them may result in adverse determinations about their rights, benefits, and privileges under Federal programs. Agencies may exempt a system of records from this requirement under certain circumstances and if certain conditions are met.

1. ☒ The records maintained by this system or project are **not** used to make any adverse determinations about individuals.

2. ☐ The records maintained by this system or project **are** used to make adverse determinations about individuals and [check all that apply]:
   a. ☐ These records **were** exempted from the Privacy Act provision that requires collection directly from the subject individual to the greatest extent practicable. Exemption of these records is proper because [explain here why the records were exempted; sample responses are provided in Appendix B of this template].
   b. ☐ These records were **not** exempted from the requirement to collect information directly from the individual to the greatest extent practicable and [check the relevant box below and provide the information requested].
      i. ☐ All records used to make an adverse determination are collected directly from the individual about whom the decision is made.
      ii. ☐ A combination of records collected from third parties and directly from the individual about whom the determination is made are used to make the determination because [please explain here why third-party data is required to make this determination; e.g., third-party data is required to verify the accuracy of the information provided by the individual seeking a privilege or benefit].
      iii. ☐ None of the records used to make adverse determinations are collected directly from the individual about whom determinations are made because seeking the information directly from the individual might [select ALL that apply]:

4. ☐ No additional efforts are made to ensure accuracy, relevance, timeliness, and completeness to the extent possible because it would interfere with mission requirements.
Section 4.1(d) Additional controls designed to ensure accuracy, completeness, timeliness and fairness to individuals in making adverse determinations

1. Administrative Controls. Individuals about whom information is collected are given the following opportunities to amend/correct/update their information to ensure it is accurate, timely and complete to the extent reasonably necessary to assure fairness when it is used to make a determination about them:

   a. ☒ The PII collected for use in the system or project is NOT used to make adverse determinations about an individual’s rights, benefits, and privileges under federal programs. Requestor information provided when filing FOIA/Privacy Act requests may be used to determine if the person or organization is entitled to certain fee waivers, but the information used to make those determinations is provided directly by the requestor and the requestor may update their information at any time. Treasury does not alter the information the requestor provides.

      Requestors may not receive all of the information they request under FOIA or the Privacy Act, but that is typically because of statutory exemptions that limit disclosure of certain records. Records included in the Internal FIOIXpress component that are under review for possible disclosure under FOIA or the Privacy Act may also be exempt from this Privacy Act requirement, depending on the exemptions claimed in the notice for the applicable system of records from which the records originated.

   b. ☐ The records maintained in the system or by the project are used to make adverse determinations and (select one) ☐ are ☐ are not exempt from the access provisions in the Privacy Act, 5 U.S.C. 552a(d).

   c. ☒ Treasury has published regulations in place describing how individuals may seek access to and amendment of their records under the Privacy Act. The Treasury/bureaus FOIA and Privacy Act disclosure regulations can be found at 31 C.F.R. Part 1, Subtitle A, Subparts A and C.

   d. ☐ Individuals who provide their information directly to Treasury for use in the system or by the project are provided notice of the adverse determination and an opportunity to amend/correct/update their information [choose one] ☐ before ☐ after it is used to make a final, adverse determination about them. This is accomplished by [describe here how this process works and the protections in place, including redress/appeals processes; if notice is provided after an adverse
determination is made, explain here why notice could not be provided before a determination was made, and the protections in place]: Descriptions.

e. □ Individuals who provide their information directly to Treasury for use in the system or by the project are expressly told at the point where the information is collected that they need to keep their information accurate, current and complete because it could be used to make adverse determinations about them. This is accomplished by [describe here how/where/when individuals are told they need to keep their information updated before it is used to make adverse decisions about them; include the exact language provided to the individuals]: Description.

f. □ All manual PII data entry by federal employees/contractors is verified by a supervisor or other data entry personnel before it is uploaded to the system (e.g., PII entered into the system from paper records is double-checked by someone else before it’s uploaded to the system). This is accomplished by: [describe here how this process works].

g. □ Other: [please describe here].

2. Technical controls. The system or project also includes additional technical controls to ensure that PII is maintained with such accuracy, relevance, timeliness and completeness as is reasonably necessary to assure fairness to the individual when it is used to make a determination about them. The following additional protections are relevant to this system or project

a. ☒ No additional technical controls are available to ensure accuracy, relevance, timeliness and completeness. The system collects information from the individual via a web-based form. Validations are in place to ensure the user has completed all required fields and provided reasonable values for those fields. The individual or requester is able to login to the EFPALP and update those field values if necessary. The requester may also directly contact the Treasury via mail, or email with the information necessary to create a requester profile in the Internal FOIAxpress.

b. □ Automated data feeds are used to refresh/update the information in the system (where the system is reliant on updates from another system). These automated data feeds occur: [state here the frequency of updates] and [state here what happens when the data is updated and why the system is reliant on another system for its data].

c. □ Technical and/or administrative controls put are in place to ensure that when information about an individual is acquired from multiple sources for maintenance in a single file about a particular individual, it all relates to the same individual. This is accomplished by: [describe here the method or process used to ensure that information merged about an individual from multiple sources for inclusion in a single file, all relates to the same person].

d. □ Address verification and correction software (software that validates, updates and standardizes the postal addresses in a database).

e. □ Other: [please describe here]

Section 4.2 Data-Mining
As required by Section 804 of the Implementing Recommendation of the 9/11 Commission Act of 2007 ("9-11 Commission Act"), Treasury reports annually to Congress on its data mining activities. For a comprehensive overview of Treasury’s data mining activities, please review the Department’s Annual Privacy Act and Data Mining reports available at: http://www.treasury.gov/privacy/annual-reports.

Section 4.2(a)  Is the PII maintained in the system used to conduct data-mining?

1. ☒ The information maintained in this system or by this project is not used to conduct “data-mining” activities as that term is defined in the 9-11 Commission Act. Therefore, no privacy or civil liberties issues were identified in responding to this question.

2. ☐ The information maintained in this system or by this project is used to conduct “data-mining” activities as that term is defined in the 9-11 Commission Act. This system is included in Treasury’s annual report to Congress which can be found on the external Treasury privacy website.

3. ☐ The information maintained in this system or by this project is used to conduct “data-mining” activities as that term is defined in the 9-11 Commission Act, but this system is not included in Treasury’s annual report to Congress which can be found on the external Treasury privacy website. This system will be added to the next Treasury Data-mining report to Congress.

Section 4.3 Computer Matching

The Computer Matching and Privacy Protection Act (CMPPA) of 1988 amended the Privacy Act by imposing additional requirements when Privacy Act systems of records are used in computer matching programs.

Pursuant to the CMPPA, there are two distinct types of matching programs. The first type of matching program involves the computerized comparison of two or more automated federal personnel or payroll systems of records or a system of federal personnel or payroll records with non-federal records. This type of matching program may be conducted for any purpose. The second type of matching program involves the computerized comparison of two or more automated systems of records or a system of records with non-federal records. The purpose of this type of matching program must be for the purpose of eligibility determinations or compliance requirements for applicants, recipients, beneficiaries, participants, or providers of services for payments or in-kind assistance under federal benefit programs, or recouping payments or delinquent debts under such federal benefit programs. See 5 U.S.C. § 522a(a)(8). Matching programs must be conducted pursuant to a matching agreement between the source (the agency providing the records) and recipient agency (the agency that receives and uses the records to make determinations). The matching agreement describes the purpose and procedures of the matching and establishes protections for matching records.

Section 4.3(a)  Records in the system used in a computer matching program

1. ☐ The PII maintained in the system or by the project is not part of a Privacy Act system of records.

2. ☒ The information maintained in the system or by the project is part of a Privacy Act system of records, but is not used as part of a matching program.
Section 4.3(b) Is there a matching agreement?

1. ☒ N/A
2. ☐ There is a matching agreement in place that contains the information required by Section (o) of the Privacy Act.
3. ☐ There is a matching agreement in place, but it does not contain all of the information required by Section (o) of the Privacy Act. The following actions are underway to amend the agreement to ensure that it is compliant:

Section 4.3(c) What procedures are followed before adverse action is taken against an individual who is the subject of a matching agreement search?

1. ☒ N/A
2. ☐ The bureau or office that owns the system or project conducted an assessment regarding the accuracy of the records that are used in the matching program and the following additional protections were put in place:
   a. ☐ The results of that assessment were independently verified by [explain how and by whom accuracy is independently verified; include the general activities involved in the verification process].
   b. ☐ Before any information subject to the matching agreement is used to suspend, terminate, reduce, or make a final denial of any financial assistance or payment under a Federal benefit program to an individual:
      i. ☐ The individual receives notice and an opportunity to contest the findings; OR
      ii. ☐ The Data Integrity Board approves the proposed action with respect to the financial assistance or payment in accordance with Section (p) of the Privacy Act before taking adverse action against the individual.
3. ☐ No assessment was made regarding the accuracy of the records that are used in the matching program.

Section 4.4: Information sharing with external (i.e., outside Treasury) organizations and individuals

Section 4.4(a) PII shared with/disclosed to agencies, organizations or individuals outside Treasury

1. ☐ PII maintained in the system or by the project is not shared with agencies, organizations, or individuals external to Treasury.
2. ☐ PII maintained in the system or by the project is shared with the following agencies, organizations, or individuals external to Treasury: [For each recipient, provide the following: (1) name of organization/type of individual; (2) the PII shared; (3) the purpose of the sharing; (4) identify any statutes that limit use or sharing of the information; (5) identity any applicable MOU].
3. ☒ All external disclosures are authorized by the Privacy Act (including routine uses in the applicable SORN(s)).

Section 4.4(b) Accounting of Disclosures

An accounting of disclosures is a log of all external (outside Treasury) disclosures of records made from a system of records that has not been exempted from this accounting requirement. This log must either be maintained regularly or be capable of assembly in a reasonable amount of time after an individual makes a request. Certain system of records may be exempted from releasing an accounting of disclosures (e.g., in law enforcement investigations).

Section 4.4(c) Making the Accounting of Disclosures Available

1. ☐ The records are not maintained in a system of records subject to the Privacy Act so an accounting is not required.
2. ☐ No external disclosures are made from the system.
3. ☐ The Privacy Act system of records maintained in the system or by the project is exempt from the requirement to make the accounting available to the individual named in the record. Exemption from this requirement was claimed because: [please state here why the records in this system of records were exempted from this requirement].
4. ☒ The Privacy Act system of records maintained in the system or by the project is not exempt from the requirement to make the accounting available to the individual named in the record and a log is maintained regularly. The log is maintained for at least five years and includes the date, nature, and purpose of each disclosure of a record to any person or to another agency (outside of Treasury) and the name and address of the person or agency to whom the disclosure is made.
5. ☐ The Privacy Act system of records maintained in the system or by the project is not exempt from the requirement to make the accounting available to the individual named in the record and a log is not maintained regularly, but is capable of being constructed in a reasonable amount of time upon request. The information necessary to reconstruct the log (i.e., date, nature, and purpose of each disclosure) is maintained for at least five years.
Section 4.4(d) Obtaining Consent Prior to New Disclosures Not Authorized by the Privacy Act

Records in a system of records subject to the Privacy Act may not be disclosed by "any means of communication to any person or to another agency" without the prior written request or consent of the individuals to whom the records pertain. 5 U.S.C. Sec. 552a(b). However, the Act also sets forth twelve exceptions to this general restriction. These 12 exceptions may be viewed at: https://www.justice.gov/usam/eousa-resource-manual-139-routine-uses-and-exemptions

 Unless one of these 12 exceptions applies, the individual to whom a record pertains must provide their consent, where feasible and appropriate, before their records may be disclosed to anyone who is not listed in one of the 12 exceptions. One of these 12 exceptions also allows agencies to include in a notice published in the Federal Register, a list of routine uses. Routines uses are disclosures outside the agency that are compatible with the purpose for which the records were collected.

Section 4.4(e) Obtaining Prior Written Consent

1. ☒ The records maintained in the system of records are only shared in a manner consistent with one of the 12 exceptions in the Privacy Act, including the routine uses published in the Federal Register.

2. ☒ If a situation arises where disclosure (written, oral, electronic, or mechanical) must be made to anyone outside of Treasury who is not listed in one of the 12 exceptions in the Privacy Act (including the published routine uses), the individual’s prior written consent will be obtained where feasible and appropriate.

Section 5: Compliance with federal information management requirements

Responses to the questions below address the practical, policy, and legal consequences of failing to comply with one or more of the following federal information management requirements (to the extent required) and how those risks were or are being mitigated: (1) the Privacy Act System of Records Notice Requirement; (2) the Paperwork Reduction Act; (3) the Federal Records Act; (4) the E-Gov Act security requirements; and (5) Section 508 of the Rehabilitation Act of 1973.

Section 5.1: The Paperwork Reduction Act

The PRA requires OMB approval before a Federal agency may collect standardized data from 10 or more respondents within a 12-month period. OMB also requires agencies to conduct a PIA (a Treasury PCLIA) when initiating, consistent with the PRA, a new electronic collection of PII for 10 or more persons (excluding agencies, instrumentalities, or employees of the federal government).

Section 5.1(a)
1. ☒ The system or project maintains information obtained from individuals and organizations who are not federal personnel or an agency of the federal government (i.e., outside the federal government).

2. ☐ The project or system involves a new collection of information in identifiable form for 10 or more persons from outside the federal government.

3. ☐ The project or system completed an Information Collection Request (“ICR”) and received OMB approval.

4. ☒ The project or system did not complete an Information Collection Request (“ICR”) and receive OMB approval because OMB implementing guidance excludes from the definition of “information” disclosures that require people to provide only facts that “entail no burden other than that necessary to identify the respondent, the date, the respondent’s address, and the nature of the instrument.”

Section 5.2: Records Management - NARA/Federal Records Act Requirements

Records retention schedules determine the maximum amount of time necessary to retain information in order to meet the needs of the project or system. Information is generally either disposed of or sent to the National Archives and Records Administration (NARA) for permanent retention upon expiration of this period. If the system has an applicable SORN(s), check the “Policies and Practices for Retention and Disposal of Records” section.

Section 5.2(a)

1. ☒ The records used in the system or by the project are covered by a NARA’s General Records Schedule (GRS). The GRS is 4.2: Information Access and Protection Records.

2. ☐ The records used in the system or by the project are covered by a NARA approved Treasury bureau Specific Records Schedule (SRS). The SRS [please provide here the specific schedule name and identifying number].

3. ☐ On [please state the date on which NARA approval was sought] the system owner sought approval from NARA for an SRS and is awaiting a response from NARA. [State here the retention periods you proposed to NARA].

4. ☐ The system owner is still in the process of developing a new records schedule to submit to NARA.

Section 5.3: E-Government Act/NIST Compliance

The completion of Federal Information Security Management Act (FISMA) Security Assessment & Authorization (SA&A) process is required before a federal information system may receive Authority to Operate (ATO).

Section 5.3(a)

1. ☒ The system is a federal information system subject to FISMA requirements.

2. ☐ The system last completed an SA&A and received an ATO on: [state the date when the system was last authorized to operate by an Authorizing Official].

3. ☒ This is a new system has not yet been authorized to operate. The expected to date for receiving ATO is August 2020.
4. ☒ The system or project maintains access controls to ensure that access to PII maintained is limited to individuals who have a need to know the information in order to perform their official Treasury duties.

5. ☒ All Treasury/bureau security requirements are met when disclosing and transferring information (e.g., bulk transfer, direct access by recipient, portable disk, paper) from the Treasury system or project to internal or external parties.

6. ☒ This system or project maintains an audit log of system users to ensure they do not violate the system and/or Treasury/bureau rules of behavior.

7. ☐ This system or project has the capability to identify, locate, and monitor individuals or groups of people other than the monitoring of system users to ensure that they do not violate the system’s rules of behavior. [If checked, please describe this capability here, including safeguards put in place to ensure the protection of privacy and civil liberties.]

Section 5.4: Section 508 of the Rehabilitation Act of 1973

When Federal agencies develop, procure, maintain, or use Electronic and Information Technology (EIT), Section 508 of the Rehabilitation Act of 1973 (as amended in 1998) requires that individuals with disabilities (including federal employees) must have access and use (including privacy policies and directives as well as redress opportunities) that is comparable to that which is available to individuals who do not have disabilities.

Section 5.4(a)

1. ☐ The project or system will not involve the development, procurement, maintenance or use of EIT as that term is defined in Section 508 of the Rehabilitation Act of 1973 (as amended in 1998)?

2. ☒ The project or system will involve the development, procurement, maintenance or use of EIT as that term is defined in Section 508 of the Rehabilitation Act of 1973 (as amended in 1998)? If checked:

3. ☒ The system or project complies with all Section 508 requirements, thus ensuring that individuals with disabilities (including federal employees) have access and use (including access to privacy and civil liberties policies) that is comparable to that which is available to individuals who do not have disabilities.

4. ☐ The system or project is not in compliance with all Section 508 requirements. The following actions are in progress to ensure compliance: [please describe here the efforts underway to ensure compliance].
