Summary

The Office of the Comptroller of the Currency (OCC) was created by Congress in 1863 to charter national banks; oversee banking institutions; and ensure national banks are safe and sound, competitive and profitable, and capable of serving in the best possible manner the banking needs of their customers. As of September 30, 2023, the OCC supervised 765 national bank charters, 49 federal branches and agencies, and 248 federal savings associations. In total, the OCC supervises approximately \$16.2 trillion in financial institution assets.

Effective supervision and a comprehensive regulatory framework are the key tools that the OCC uses to ensure that national banks and federal savings associations operate in a safe and sound manner and that they provide fair access to financial services and fair treatment of their customers. A robust chartering program allows new entrants into the financial services sector while ensuring that they have the necessary capital, managerial, and risk management processes to conduct activities in a safe and sound manner.

The OCC's nationwide staff of bank examiners conducts on-site and off-site reviews of banks and provides sustained supervision of these institutions' operations. Examiners have used enhanced off-site tools and processes during the pandemic to support their supervision responsibilities. Examiners analyze asset quality, capital adequacy, earnings, liquidity, and sensitivity to market risk for all banks, and assess compliance with federal consumer protection laws and regulations. Examiners also evaluate management's ability to identify and control risk and assess banks' performance in meeting the credit needs of the communities in which they operate, pursuant to the Community Reinvestment Act (CRA).

The OCC's operations are funded primarily (approximately 96 percent) from semiannual assessments levied on national banks and federal savings associations. Revenue from investments in Treasury securities and other income comprise the remaining four percent.

Description of Performance

The OCC charters, regulates and supervises all national banks and federal savings associations, as well as supervises federal branches and agencies of foreign banks. The primary goal of the OCC's Supervise Program is to ensure that these institutions operate in a safe and sound manner and in compliance with laws requiring fair treatment of their customers and fair access to credit and financial products. The OCC also monitors risks and threats to the stability of the national banking system through regular examinations of supervised institutions and other monitoring.

Composite Capital Adequacy, Asset Quality, Management, Earnings, Liquidity, and Sensitivity (CAMELS) rating reflects banks' financial condition. As of September 30, 2023, 95 percent of national banks and federal savings associations had composite CAMELS rating of either 1 or 2. The OCC strives for timely and effective approval of corporate applications to complete corporate transactions and introduce new financial products and services. The OCC completed 98 percent of applications and notices within established timeframes as of September 30, 2023.
