

Alcohol and Tobacco Tax and
Trade Bureau

FY 2014
Capital Investment Plan

Summary of Capital Investments

Information Technology

TTB's Strategic Plan establishes the vision and objectives for the bureau in the business context. TTB's Information Technology (IT) Strategic Plan is a five-year plan based on the business strategy, which includes the bureau's mission, vision, goals, and objectives from the IT perspective. This plan charts the course the bureau will follow in the coming years to develop and implement IT solutions that are aimed at streamlining the collection of data, leveraging web technologies, and making the Internet the method of choice for the reporting and exchanging of information. By aligning business and technical strategy, TTB is able to leverage technology to enable the bureau to meet its objectives in the most efficient and cost-effective manner while identifying ways to minimize system redundancy.

TTB has no major IT investments based on the OMB and the Department of Treasury criteria. Several non-major investments, however, directly support the mission, strategy, and day-to-day operations of the bureau. These include:

TTB Tax System: This investment consists of several component applications that ensure fair and proper collection of revenue from the industry members for alcohol, tobacco, firearms, and ammunition excise taxes and to ensure compliance with the excise tax regulations.

TTB Regulatory System: This investment includes applications that streamline the beverage and nonbeverage alcohol formula approval process and COLA issuance for tax and regulatory compliance.

TTB General Support Services: This investment provides TTB users with the infrastructure applications necessary to conduct daily business.

TTB Enterprise Architecture: This investment supports strategic management of IT operations (e.g., business process redesign efforts not part of an individual investment, enterprise architecture development, capital planning and investment control processes, procurement management, and IT policy development and implementation) and costs for Chief Information Officer functions.

In addition to leveraging IT to support the mission, strategy, and day-to-day operations of the bureau, TTB supports and maintains strategy alignment with OMB and Treasury through enterprise-wide IT initiatives. These include: Cyber Security; IT Infrastructure; Electronic Identity and Access Management (HSPD-12); Enterprise-wide Contracts and Services; and Program Metrics and Milestones.

Scientific Equipment for Laboratories

This investment will enable chemists to provide accurate and reproducible scientific data and laboratory results to support regulatory compliance, tax enforcement, tax classification, rulemaking, and investigations for both the alcohol and tobacco commodities. Laboratory instruments require periodic replacement, as they have finite lifecycles due to use and as scientific advances continue to evolve. Technologies applied at these laboratories eventually become obsolete and the instruments are not serviceable as vendors stop carrying parts and

software. Periodic replacement of the existing technologies is essential for TTB laboratories to remain state-of-the-art and effective to support the bureau's mission, strategy, and day-to-day operations.
