| **Strategic Goal 4** – Promote data transparency and usefulness as a public good. | - Establish the Fiscal Service as the single authoritative source for federal financial data  
- Manage data and information as an asset  
- Lead government-wide effort to adopt data standards for financial management  
- Architect for unpredictability  
- Deliver data that is timely, comprehensive, and accurate  
- Model the principle of data being easy to find, accessible, useable and understandable to the public  
- Promote linkage between financial data and performance measurements of the government  
- Protect individual privacy and confidentiality and national security  
- Take a lead role in providing access to detailed financial spending data that is accurate, timely and informative to interested parties. | - Fuel entrepreneurship, innovation and scientific discovery  
- Facilitate better decision making  
- Meet the demand for open data to generate insight, ideas, and services to create a better world  
- Benefit from a shared service model  
- Improved transparency and accountability |
| **Strategic Goal 5** – Move federal financial management and administrative services to an affordable, sustainable service provider. | - Design and lead the effort to move federal agencies to approved shared services providers for core accounting and financial management services  
- Expand business lines  
- Deliver a strong governance process | - Rapidly implement statutory and regulatory requirements through shared services  
- Improve consistency and overall quality of Government-wide administrative services  
- Leverage Economies of Scale for cost-savings government-wide  
- Allow agencies to focus on mission |
