

Instructions for Terrorism Risk Insurance Program (TRIP) 2023 Data Call Captive Insurers

Form Overview

This reporting form is for use by captive insurers.

- Captive insurers that wrote TRIP-eligible lines of insurance in 2022 but did not provide any terrorism risk insurance subject to TRIP under any policy, are not required to report. This is the case even if the captive insurer provided terrorism risk insurance in years prior to 2022.
- Captive Insurers that are part of a larger group that is subject to reporting on either the Small Insurer template or the Insurer (Non-Small) Groups or Companies template should report on the appropriate template and not use this reporting form.
- Offshore captive insurers that are licensed to write insurance in any U.S. jurisdiction, and which write terrorism risk insurance subject to TRIP are required to report and should identify themselves using their OLC Code.

General Guidelines

- All information should be reported on a consolidated insurer group basis, unless reporting for a single insurer.
- When providing premium on a jurisdictional basis, premium should be allocated in the same fashion that it is for state reporting and premium tax purposes. Accordingly, coverage written by captive insurers may be allocated in full to their state of domicile or licensure.
 - **Note:** This allocation method should not be applied on the Geographic Exposures worksheet, which seeks information based upon the location of the exposure, regardless of the manner in which the premium may have been allocated.
- When providing premium on a jurisdictional basis, for premium which is otherwise not allocable to a particular jurisdiction (e.g.: certain Ocean Marine, Inland Marine, and Aviation coverages; or coverages based upon foreign operations with a U.S. nexus), report this premium under "Other/Not Subject to Allocation in a Particular Jurisdiction."
- DEP should be included in this calculation to the extent that commercial property and casualty coverage is issued for losses occurring at the following locations: (1) Within the United States; (2) With respect to an air carrier (as defined in section 40102 of title 49, United States Code), or a United States flag vessel (or a vessel based principally in the United States, on which United States income tax is paid and whose insurance coverage is subject to regulation in the United States); and (3) At the premises of any U.S. mission.
- TRIP-eligible lines to be included in DEP calculations generally correspond to NAIC lines (as reported on the NAIC Exhibit of Premiums and Losses, commonly known as Statutory Page 14). The information reported on this worksheet should only include TRIP-eligible DEP. Any amounts reported on Statutory Page 14 that are not within the scope of TRIP-eligible lines as defined by the Program regulations should not be reported here [see 31 CFR 50.4(w)]. Specifically:
 - The property line Allied Lines (NAIC Line 2.1) should not include federal crop insurance or any other type of crop insurance privately issued or reinsured.

- Workers' Compensation (NAIC Line 16) data should only include primary workers' compensation coverage written on an admitted basis. Do not include premium associated with workers' compensation deductible reimbursement (reported in Row 13) or excess workers' compensation (reported in Row 14 and identified as sub-type of insurance 16.003 on the NAIC's Uniform Property & Casualty Product Coding Matrix and otherwise reported under 17.3 as indicated).
- The liability line of Other Liability (NAIC Line 17) should not include Professional Errors and Omissions Liability Insurance [see 31 CFR 50.4(t)] or Excess Workers' Compensation Premium (which is entered separately as noted above).
- Deductible reimbursement policies (other than workers' compensation) that fall within a TRIP-eligible line should be reported under that line on the Direct Earned Premium by Jurisdiction Worksheet, the Exposures by Jurisdiction Worksheet, and/or the Geographic Exposures (Nationwide) Worksheets
- Information is sought concerning policies that will or would have responded to "certified acts of terrorism" during the reporting period. The fact that the policy did not in fact make payments for claims associated with any certified acts of terrorism is not relevant to the obligation to report information.
- For purposes of this data collection, reporting insurers do not need to make the premium adjustments in connection with residual market mechanisms provided for under 31 CFR 50.33.
- Policy count should be calculated based on the number of policies incepting in 2022 (or otherwise in effect for the entire year). For reporting other elements apart from DEP, where the reporting of information (e.g., exposures) under policies in effect during 2022 would result in double counting for the year as a whole, utilize a reporting date of December 31, 2022.
- Information subject to reporting under the Standalone Terrorism (Nationwide) Worksheet and Cyber (Nationwide) Worksheet should be considered a subset of an insurer's TRIP-eligible policies, and should also be reported on additional worksheets, as appropriate.
- All exposure information should be reported gross of any private reinsurance, except where otherwise indicated.
- Questions on the Reinsurance (Nationwide) Worksheet are limited to reinsurance purchased from unaffiliated third-party companies, and do not include reinsurance transactions within a group of affiliated insurers.
- Blacked out cells indicate that no data will be reportable for that particular cell.
- Hypothetical policy situations demonstrating proper data completion are available on the TRIP website (<https://home.treasury.gov/policy-issues/financial-markets-financial-institutions-and-fiscal-service/federal-insurance-office/terrorism-risk-insurance-program/annual-data-collection>).

Summary of Changes from 2022 Templates

- Cyber (Nationwide) Worksheet:
 - The 2023 Cyber (Nationwide) Worksheet now permits the reporting of number of policies by policyholder size and cyber premium by policyholder size by using either the policyholder's number of employees or revenue to determine policyholder size, as specified. One method or the other must be selected by a reporting insurer; it is not permitted to use one method for some policyholders and the other method for other policyholders..
- Reinsurance (Nationwide) Worksheet:
 - Replaced modeled loss scenario.

Summary of Changes from 2022 Instructions

- Insurer Group Affiliations Worksheet:
 - The Instructions for Cell H4 have been augmented to include the existing Program rules for reporting of premium by insurers that did not write insurance in CY 2021 or did not have a full year of operations in that year.
- Cyber (Nationwide) Worksheet:
 - The Special Instructions for Completion of Cyber (Nationwide) Worksheet have been deleted. All reporting insurers that write cyber insurance are expected to complete all elements of the Cyber (Nationwide) Worksheet. Further instructions have been provided concerning the reporting of number of policies and cyber premium by policyholder size as measured by either the policyholder’s number of employees or the policyholder’s revenue. Other instructions have been clarified to confirm the intent of certain requests (e.g., total policy limits requested and not just limits of liability) as well as to provide further specifications on what fields should reconcile with other fields.
