 REINSURANCE (NATIONWIDE)**

27 Using the following defined terrorism event, calculate and report the total projected loss under property, workers' compensation, and liability policies containing terrorism risk insurance subject to TRIP issued by the Group or Company, and then within that figure report the following:

- (1) the deductible or retention obligations of insureds under triggered policies for the insurer group (or single company that is not part of a group);
- (2) the projected amount of net loss the insurer group (or single company that is not part of a group) will sustain within its TRIP deductible, net of policyholder obligations or private reinsurance;
- (3) any private reinsurance recovery available to the group or company within the TRIP deductible;
- (4) the amount of the group or company's claim under TRIP;
- (5) the amount of the group or company's continuing net co-pay obligation under TRIP; and
- (6) any private reinsurance recovery available to the group or company within the Co-Pay Layer.

On September 19, 2023 (a Tuesday), at 11:00 a.m., a car bomb explodes at the corner of Central Avenue SW and Upper Alabama Street, in Atlanta, Georgia 30303. (The GPS coordinates are 33.75189, -84.3888.) The car contains 15,000 curies of Cesium-137, which is dispersed into the atmosphere by the blast, which is caused by the detonation of 100 pounds of TNT. At the time of the explosion, the prevailing wind is between 5-10 miles per hour and is from the southwest to the northeast. Assume that the Cesium-137 is dispersed by the blast within an area 200 meters from the location of release, and that the wind further disperses the Cesium-137 approximately 10 kilometers from the location of release in the direction of the prevailing wind, in a 90-degree quadrant, in an area generally bounded by Riverside to the northwest, Buckhead to the north, and North Druid Hills to the northeast, with concentrations diminishing at properties further away from the location of release. Please provide estimates of your likely property damage losses from the bomb blast and contamination, as well as associated business interruption losses, within the dispersal zone, as well as losses associated with workers' compensation claims for workers within the dispersal zone at the time of the incident. For purposes of the workers' compensation exposure, you can assume that losses are limited to medical expense for 100 percent of the employees within the exposure footprint.

30	Total Projected Loss	\$	-
31	Deductible/Retention of Insureds under Policies issued by Group or Company		
32	Net Loss to Group or Company within TRIP Deductible		
33	Private Reinsurance Recovery within Deductible Layer
