**TERRORISM RISK INSURANCE PROGRAM 2026 DATA CALL: ALIEN SURPLUS LINES INSURERS  
REINSURANCE (NATIONWIDE)**

Using the following defined terrorism event (which should be considered to be a single event, loss, or occurrence for purpose of calculating applicable deductibles and policy limits), calculate and report the total projected loss of this consolidated physical and cyber attack under (1) property and workers' compensation policies and (2) cyber policies containing terrorism risk insurance subject to TRIP issued by the Group (or Company, if not part of a Group), and then within that loss figure report the following:

- (1) the deductible or retention obligations of insureds under triggered policies for the Group or Company;
- (2) the projected amount of net loss the insurer Group or Company will sustain within its TRIP deductible, net of policyholder obligations or private reinsurance;
- (3) any private reinsurance recovery available to the Group or Company within the TRIP deductible;
- (4) the amount of the Group or Company's claim under TRIP;
- (5) the amount of the Group or Company's continuing net co-pay obligation under TRIP; and
- (6) any private reinsurance recovery available to the Group or Company within the Co-Pay Layer.

As per the template, please report the requested figures separately, in the separate cells, as indicated below, depending upon whether the losses arise under (1) property and workers' compensation policies, on the one hand, or (2) cyber policies, on the other hand. Within the total cell, combine figures from all types of policies as would be the case in connection with a single event or loss under TRIA. Further information on the reporting of figures is provided in the Instructions.

27

On June 10, 2025 (a Tuesday), at 11:00 a.m. (Eastern Time), a terrorist organization infiltrates and takes control of a large cargo jet, similar to the Boeing 747-400BCF, fully loaded with fuel and taking off from Dulles International Airport. The terrorists direct the plane to an area in Ashburn, Virginia that is heavily populated with data centers – the so-called “Data Center Alley,” containing the largest concentration of data centers in the world and housing cloud technologies operated by all of the major cloud providers. The terrorists, using explosives that they have smuggled on board the plane, cause it to explode approximately 70 meters off the ground at the coordinates 39.001899, -77.481286, and the explosion, the equivalent of 10 tons of TNT, has catastrophic impacts upon all structures within 500 meters of the explosion epicenter, including eleven (11) data centers and a nearby energy substation. You can assume the following structural damage within the impact zone:

- Zone 1 (100 meters from site): Collapse and fire following, 100% property damage, 10% fire loss
- Zone 2 (between 100 and 300 meters from site): Massive structural damage to surrounding properties, including 50% property damage, 5% fire loss
- Zone 3 (between 300 and 500 meters from site): Heavy debris damage to surrounding properties, 25% property damage, 2.5% fire loss

In addition to these physical damage impacts, all building operations within the entire zone are knocked out of operation, even where structural damage to the building itself is not 100 percent.

**TERRORISM RISK INSURANCE PROGRAM 2026 DATA CALL: ALIEN SURPLUS LINES INSURERS  
 REINSURANCE (NATIONWIDE)**

Simultaneously with the plane crash, the same terrorist group unleashes a cyber attack (unaccompanied by any efforts to seek ransom payments) using previously implanted malicious malware that is directed against a large cloud provider by US market share (for the purposes of this exercise choose the cloud provider that results in the largest loss given your portfolio). Because of the significant role of Data Center Alley in routing worldwide internet traffic, the physical attack on data centers in Ashburn, coupled with the malware attack, results in the temporary disabling of all operations of the cloud provider in the U.S. market. While services are gradually restored over a week via rerouting and backups, it takes considerable time (exacerbated by the effects simultaneously addressing the malicious malware attack) before all customers are back up to full capacity. For purposes of the scenario, assume that 25 percent of cloud services are restored after 18 hours, another 25 percent of cloud services are restored in 36 hours, the next 25 percent of cloud services are restored in three days (72 hours), and the remaining 25 percent of cloud services in seven days (168 hours).

A non-state associated terrorist organization claims responsibility for the attack, and the event is quickly certified as an act of terrorism by the Secretary of the Treasury. Furthermore, assume that any impact on critical infrastructure (either on account of the plane attack or the cyber attack) is found not to be the cause of the vast bulk of the associated damages (including second-order damages), such that any critical infrastructure exclusions that may appear in any responsive policies are found to be inapplicable.

28

The broadest impact on TRIP-eligible lines cyber policies will be contingent business interruption associated with direct loss in profits and/or revenue (as covered by the policies) to all U.S. commercial policyholders that rely on the disrupted cloud operations (i.e., the profits and/or revenue that a business would have received if the cloud had not failed) that have responsive coverage, including coverage for terrorism risk subject to TRIP. This should include disruption of consumption (e.g. retail and entertainment), transportation (e.g., air and rail), tourism and trade (e.g., ports), and losses sustained by all other industries dependent on the cloud. Responding companies should also consider the mitigating impact for those policyholders with effective backup systems independent of the cloud and who thus do not sustain significant losses. Estimates should include covered losses under cyber policies but, given the nature of the event, should not include any losses for extortion (ransomware) payments. Similarly, do not attempt to model potential losses for legal liability or regulatory fines. Direct business interruption losses for the cloud provider under any responsive insurance should be reported.

Finally, reporters should also consider local physical property (based upon the zone impacts identified above) and workers' compensation losses that result from the plane explosion. For workers' compensation losses, assume that 40 percent of any workers you cover under workers' compensation policies within the impact zone are killed, and that the following further assumptions can be applied as to the level of injuries sustained among any other workers in the impact zone: 5 percent permanent total disability; 20 percent permanent partial disability; and 35 percent temporary disability.

	Property and WC Loss	Cyber Loss	Total (All Types of Policy Losses)
<b>32</b> Total Projected Loss	\$ -	\$ -	\$ -
<b>33</b> Deductible/Retention of Insureds under Policies issued by Group or Company			
<b>34</b> Net Loss to Group or Company within TRIP Deductible			
<b>35</b> Private Reinsurance Recovery within Deductible Layer			
<b>36</b> Claim under TRIP			
<b>37</b> Net Loss to Group or Company within Co-Pay Layer			
<b>38</b> Private Reinsurance Recovery within Co-Pay Layer			

**Notice under the Paperwork Reduction Act**

We estimate it will take you about 57 hours to complete this form. However, you are not required to provide the information requested unless a valid OMB control number is displayed on the form. Any comments or suggestions regarding this form should be sent to the Terrorism Risk Insurance Program Office, Department of the Treasury, 1500 Pennsylvania Avenue NW, Room 1410 MT, Washington, DC 20220. Do not send completed forms to this address. Submit forms according to instructions provided at [www.tripsection111data.com](http://www.tripsection111data.com).
