ACORD[®] BY THE NUMBERS

50+

Years of
Industry Service

36000+

Participating
Organizations

1200+

Standardized
Transaction Types

Forms & Standards

800+ forms, **400K** elements

Reference Architecture

7 Models & frameworks

Training & Certification

3K Validations & sessions

Idea-Sharing Platforms

350+ Standards events

Research & Development

20+ Market studies

6K+ Regulatory Submissions

7K+ Core systems

400M+ Annual transactions

20-Year Outlook: Technology Predictions

Sensor Capability

- Acceleration & Velocity
- Chemical & Gas
- Gyroscopic
- Humidity & Hygroscopic
- Image & Trace
- Infrared & UV
- Level & Altitude
- Location & Motion
- Optical
- Pressure & Density
- Smoke
- Temperature
- Vitals
- Water Quality

>45 Billion Devices
~6 devices/person

Decreasing Cost
<\$0.40 in 2023 to
~\$0.01

Data Generation
80 ZB annually in
2023 to 100EB

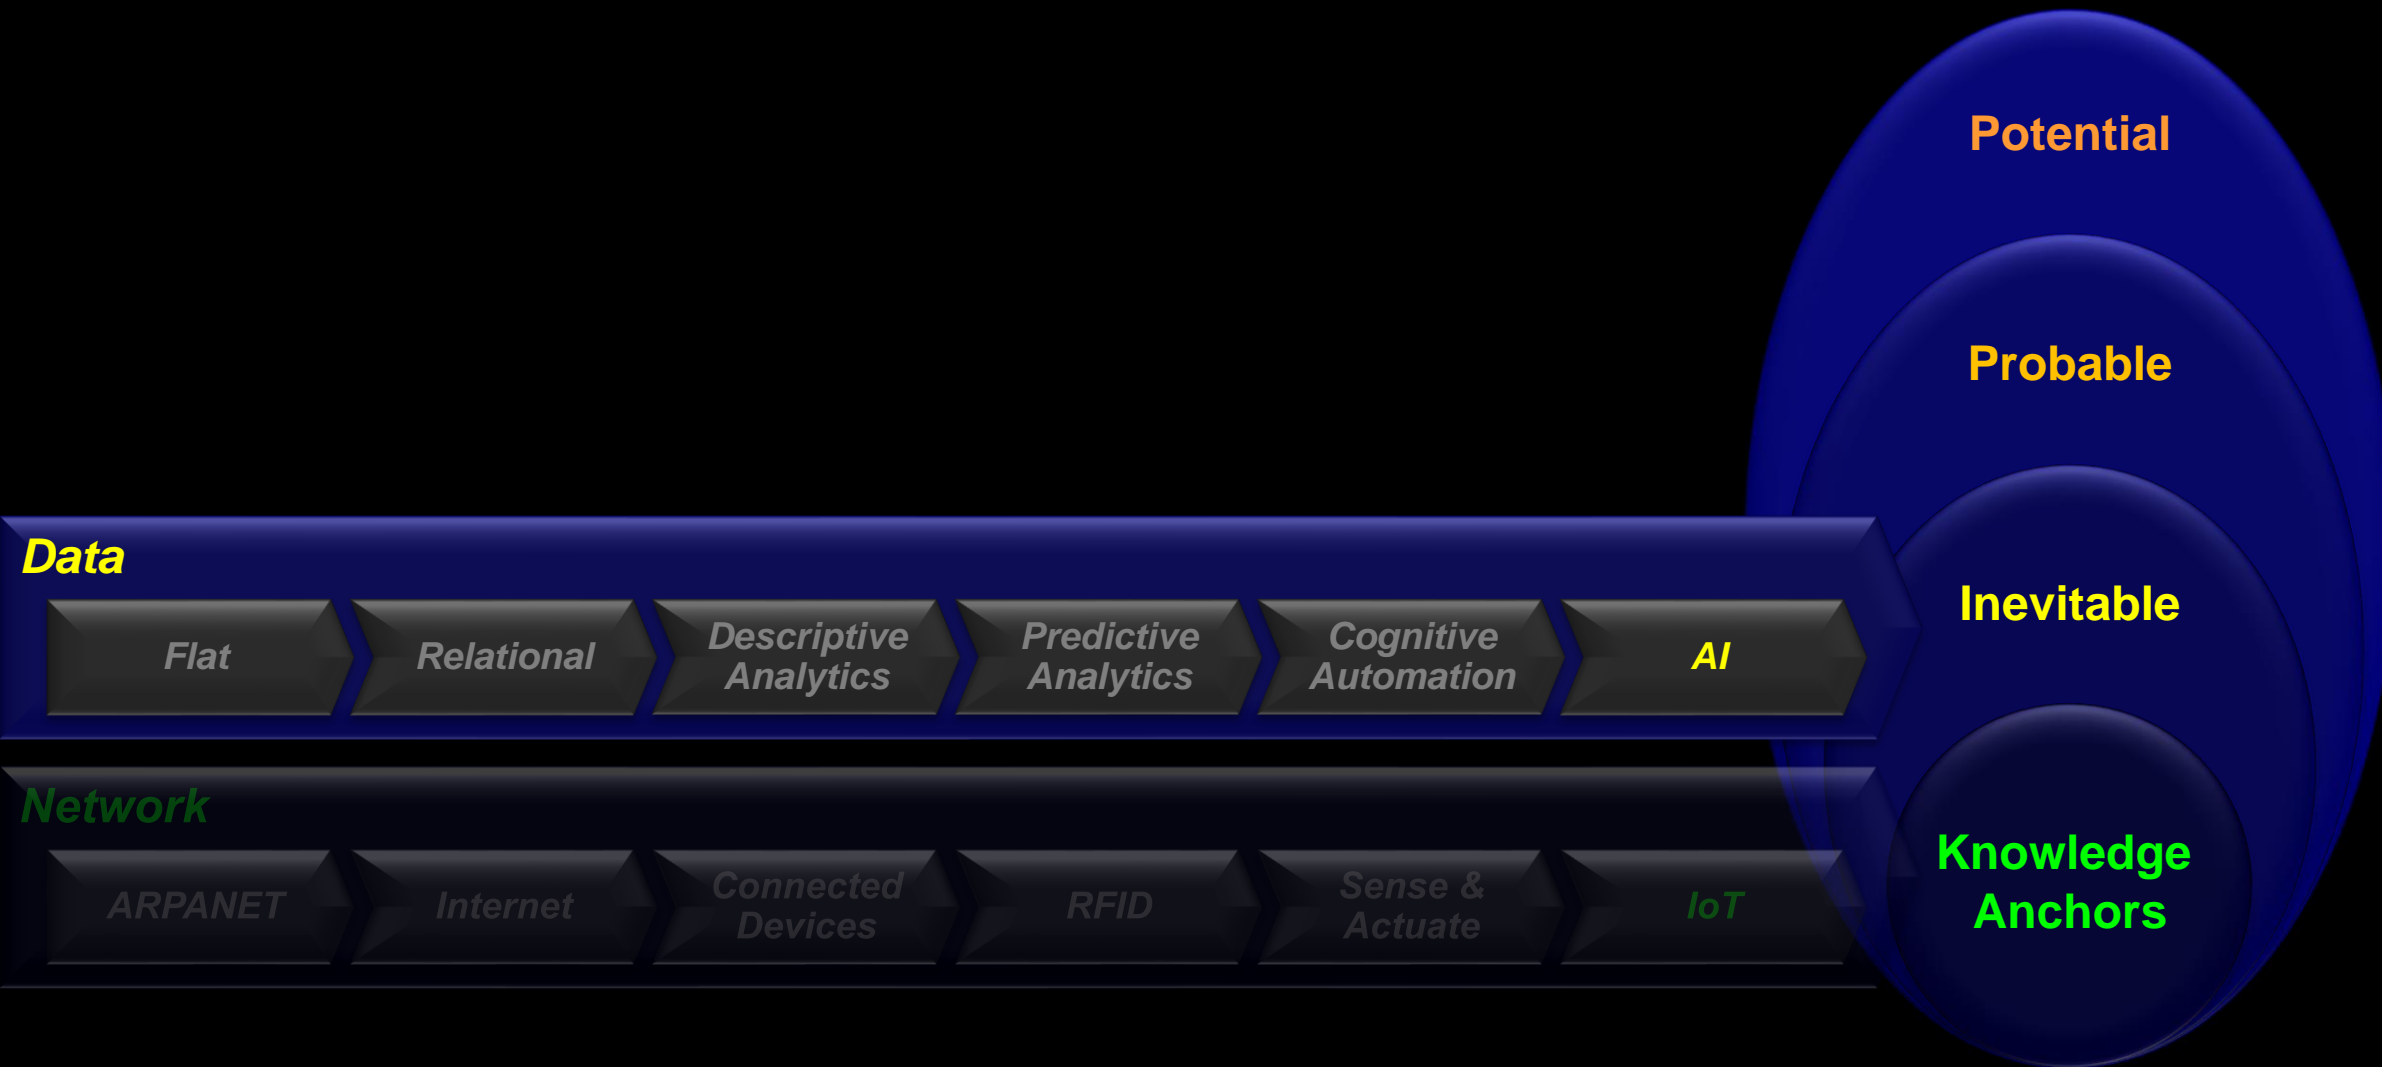

\$20T+ Connected Economy
Enabled cross-sector
Economic value

ACORD Presentation

20-Year Outlook: Technology Predictions

DL

*ML subset using **neural networks** to extract higher-level data features*

ML

*AI subset involving **algorithms** to analyze, learn, predict, decide*

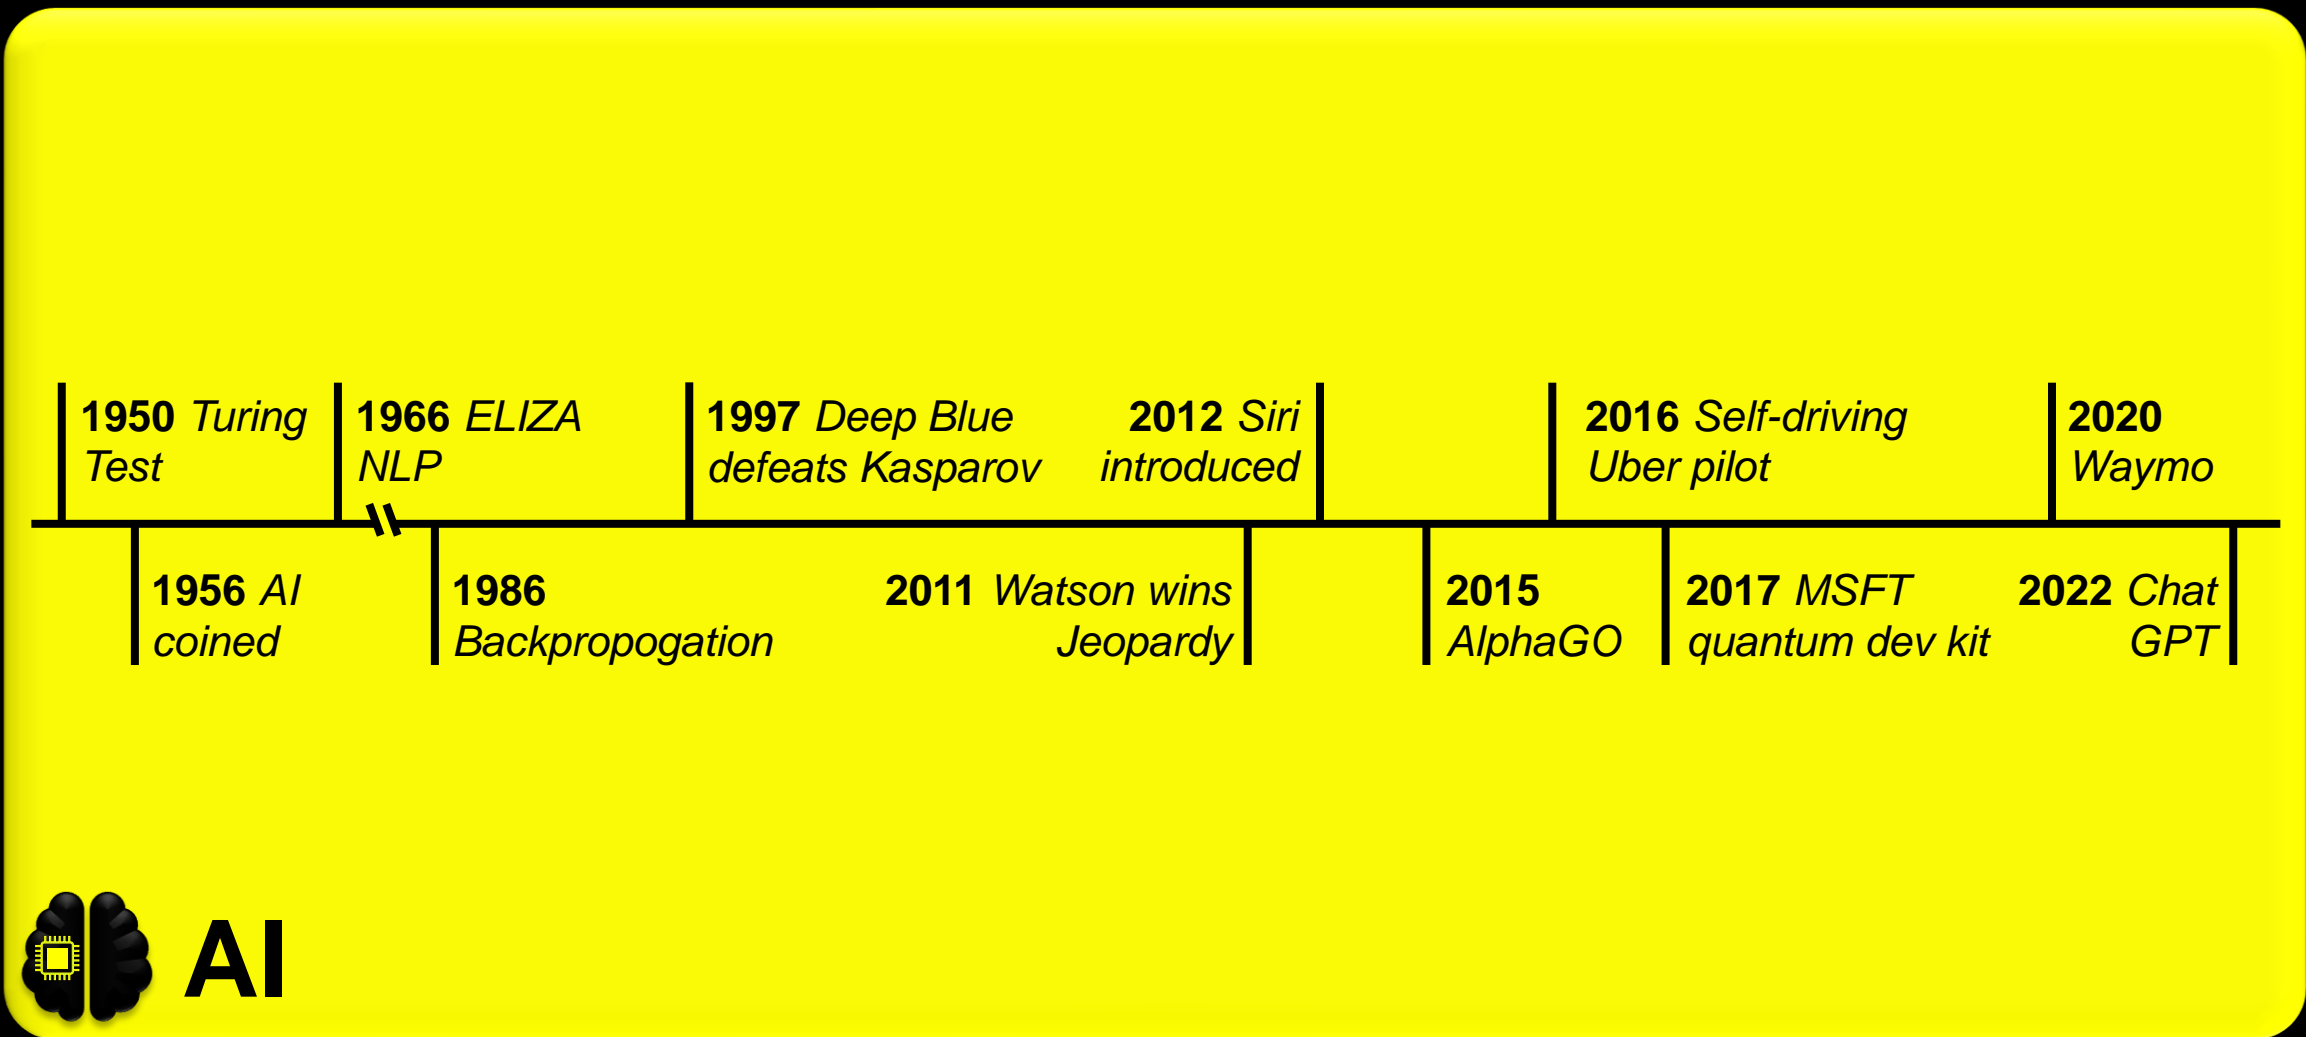

AI

*Computer science field focused on **learning, problem-solving, and decision-making***

ACORD Presentation

20-Year Outlook: *AI Evolution*

High-performance **computing power** at scale – *hardware, software, architecture*

Large, diverse, high-quality **data** sets – *text, image, audio, video, sensor*

Recognition, prediction, decision **learning algorithms** – *supervised, unsupervised, reinforcement*

Advanced **computer & human language** interaction– *understand, interpret, generate*

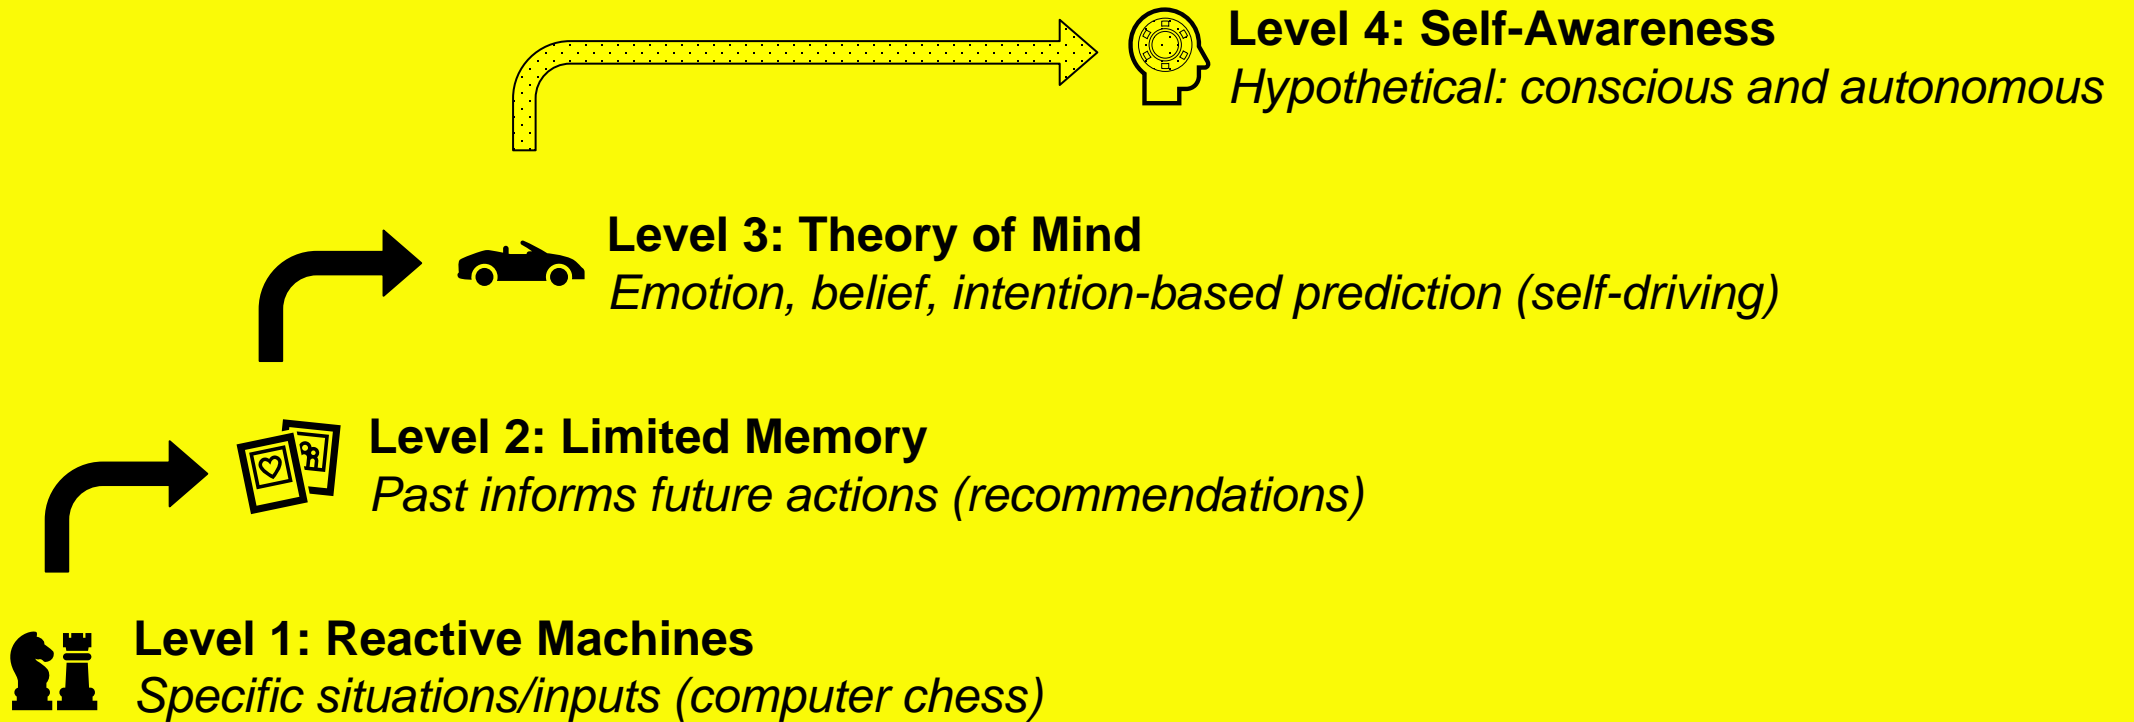

Human expertise across domains – *design, refine, interpret, decide*

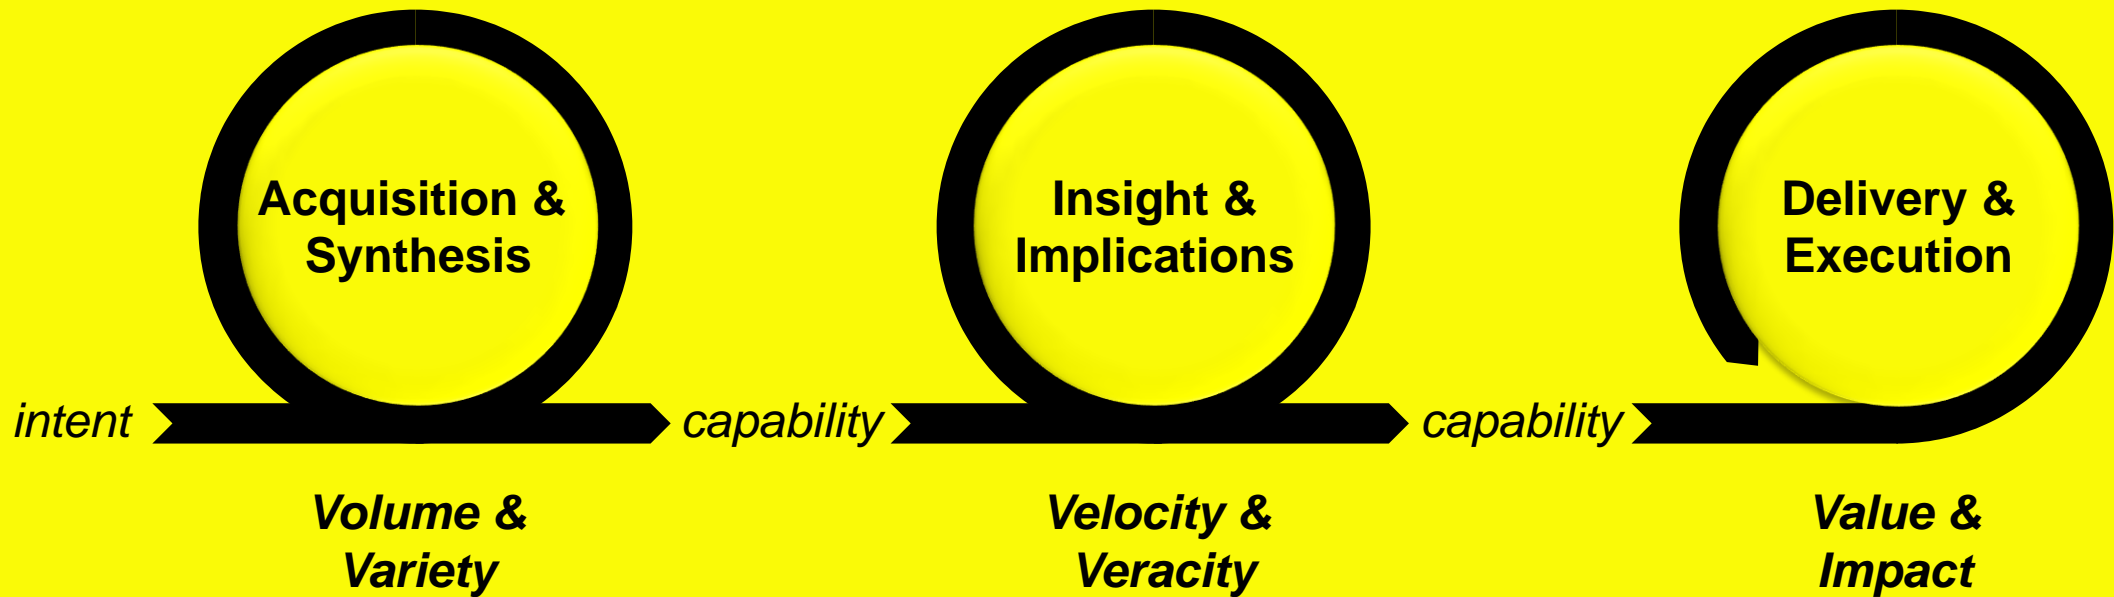

Regulatory & ethical support – *privacy, security, transparency, accountability, impact*

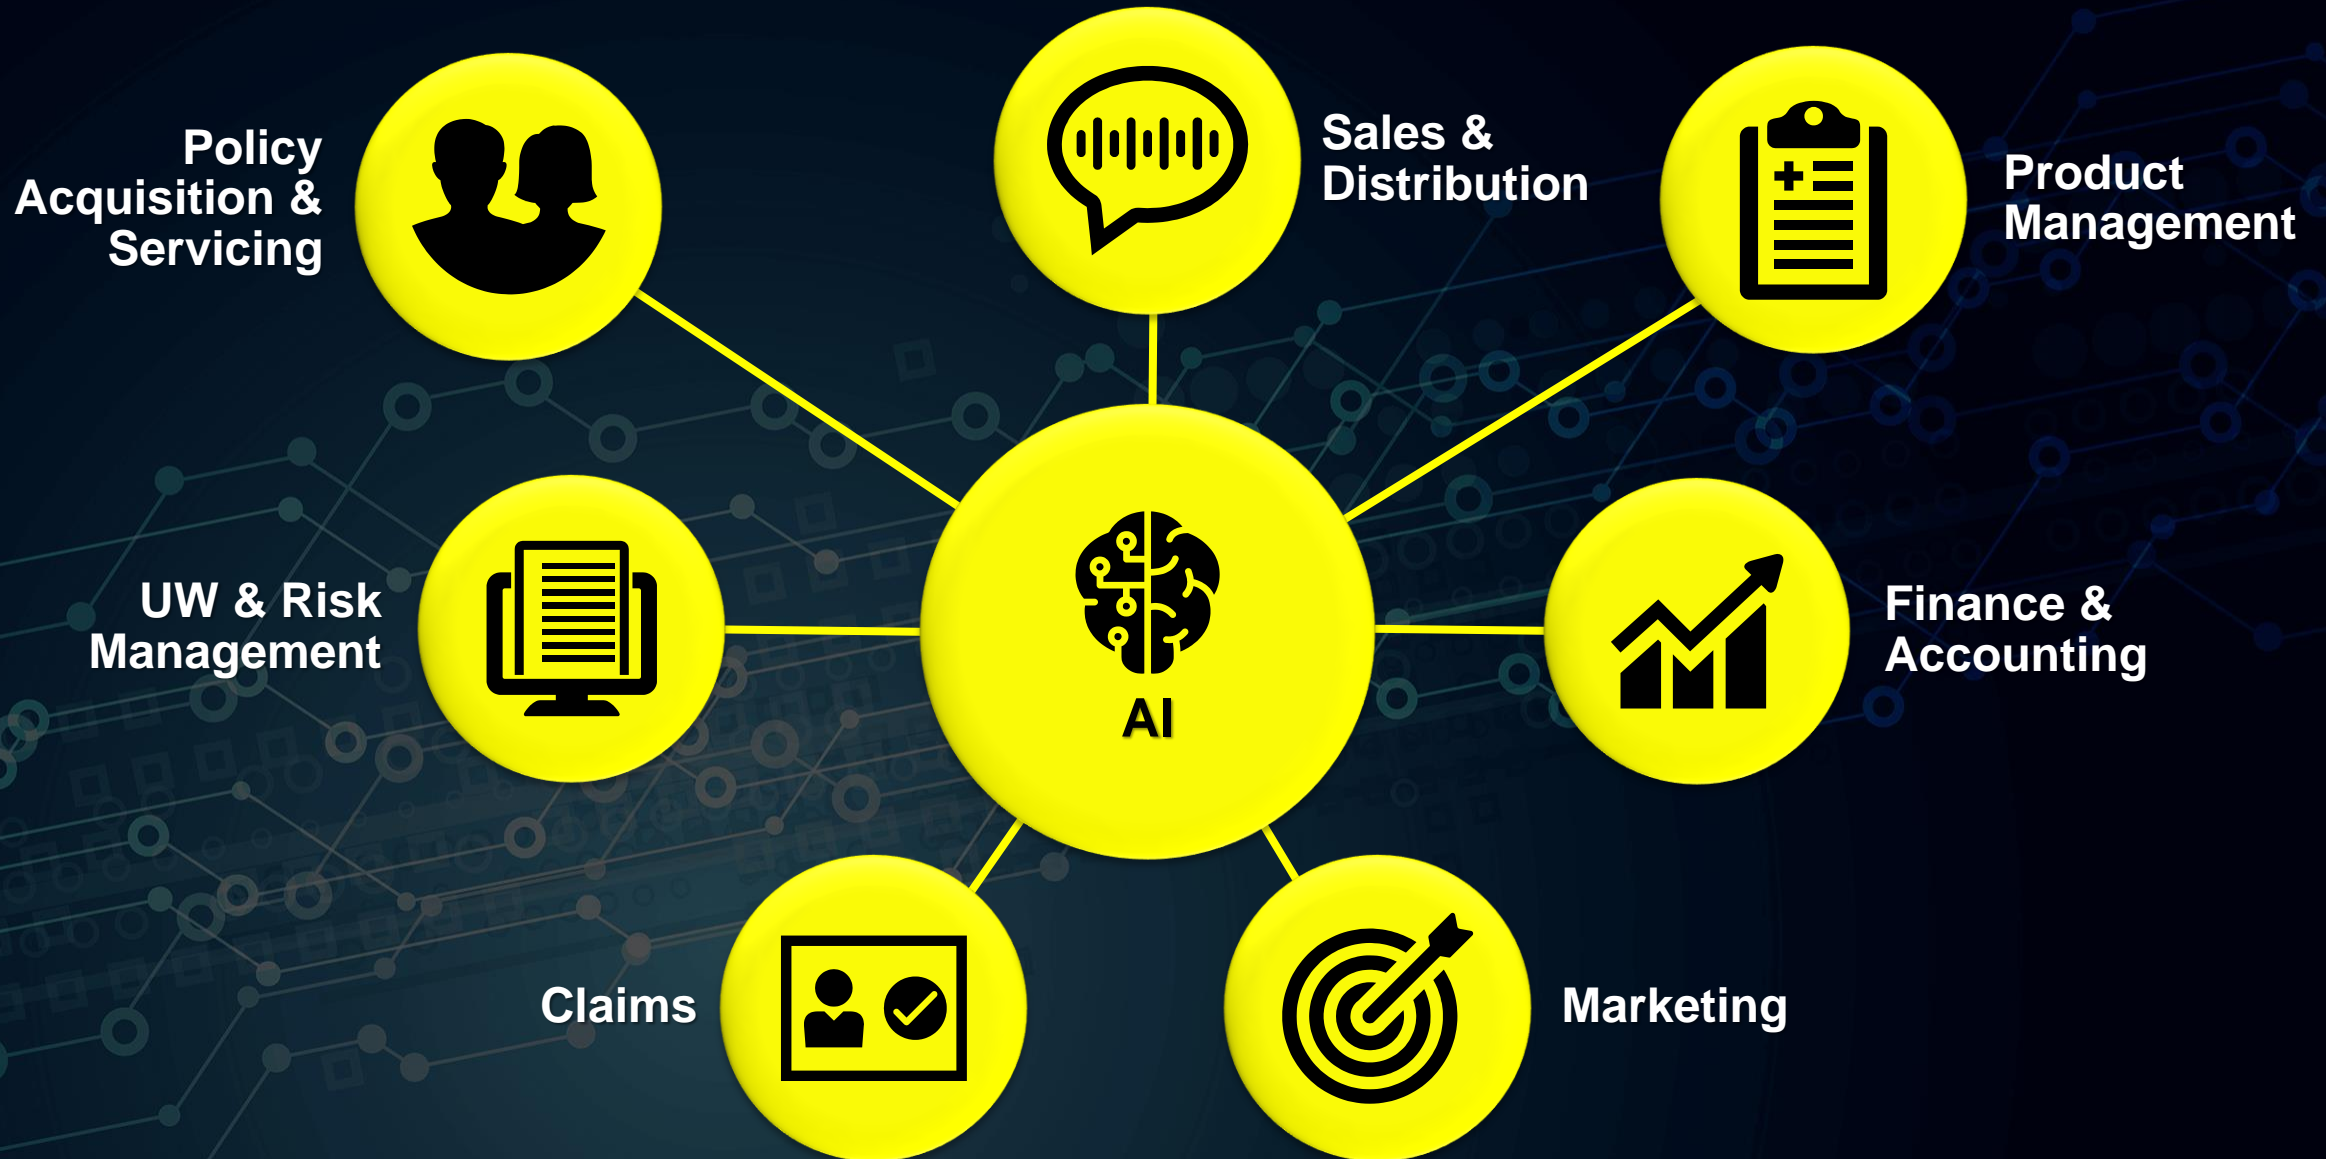

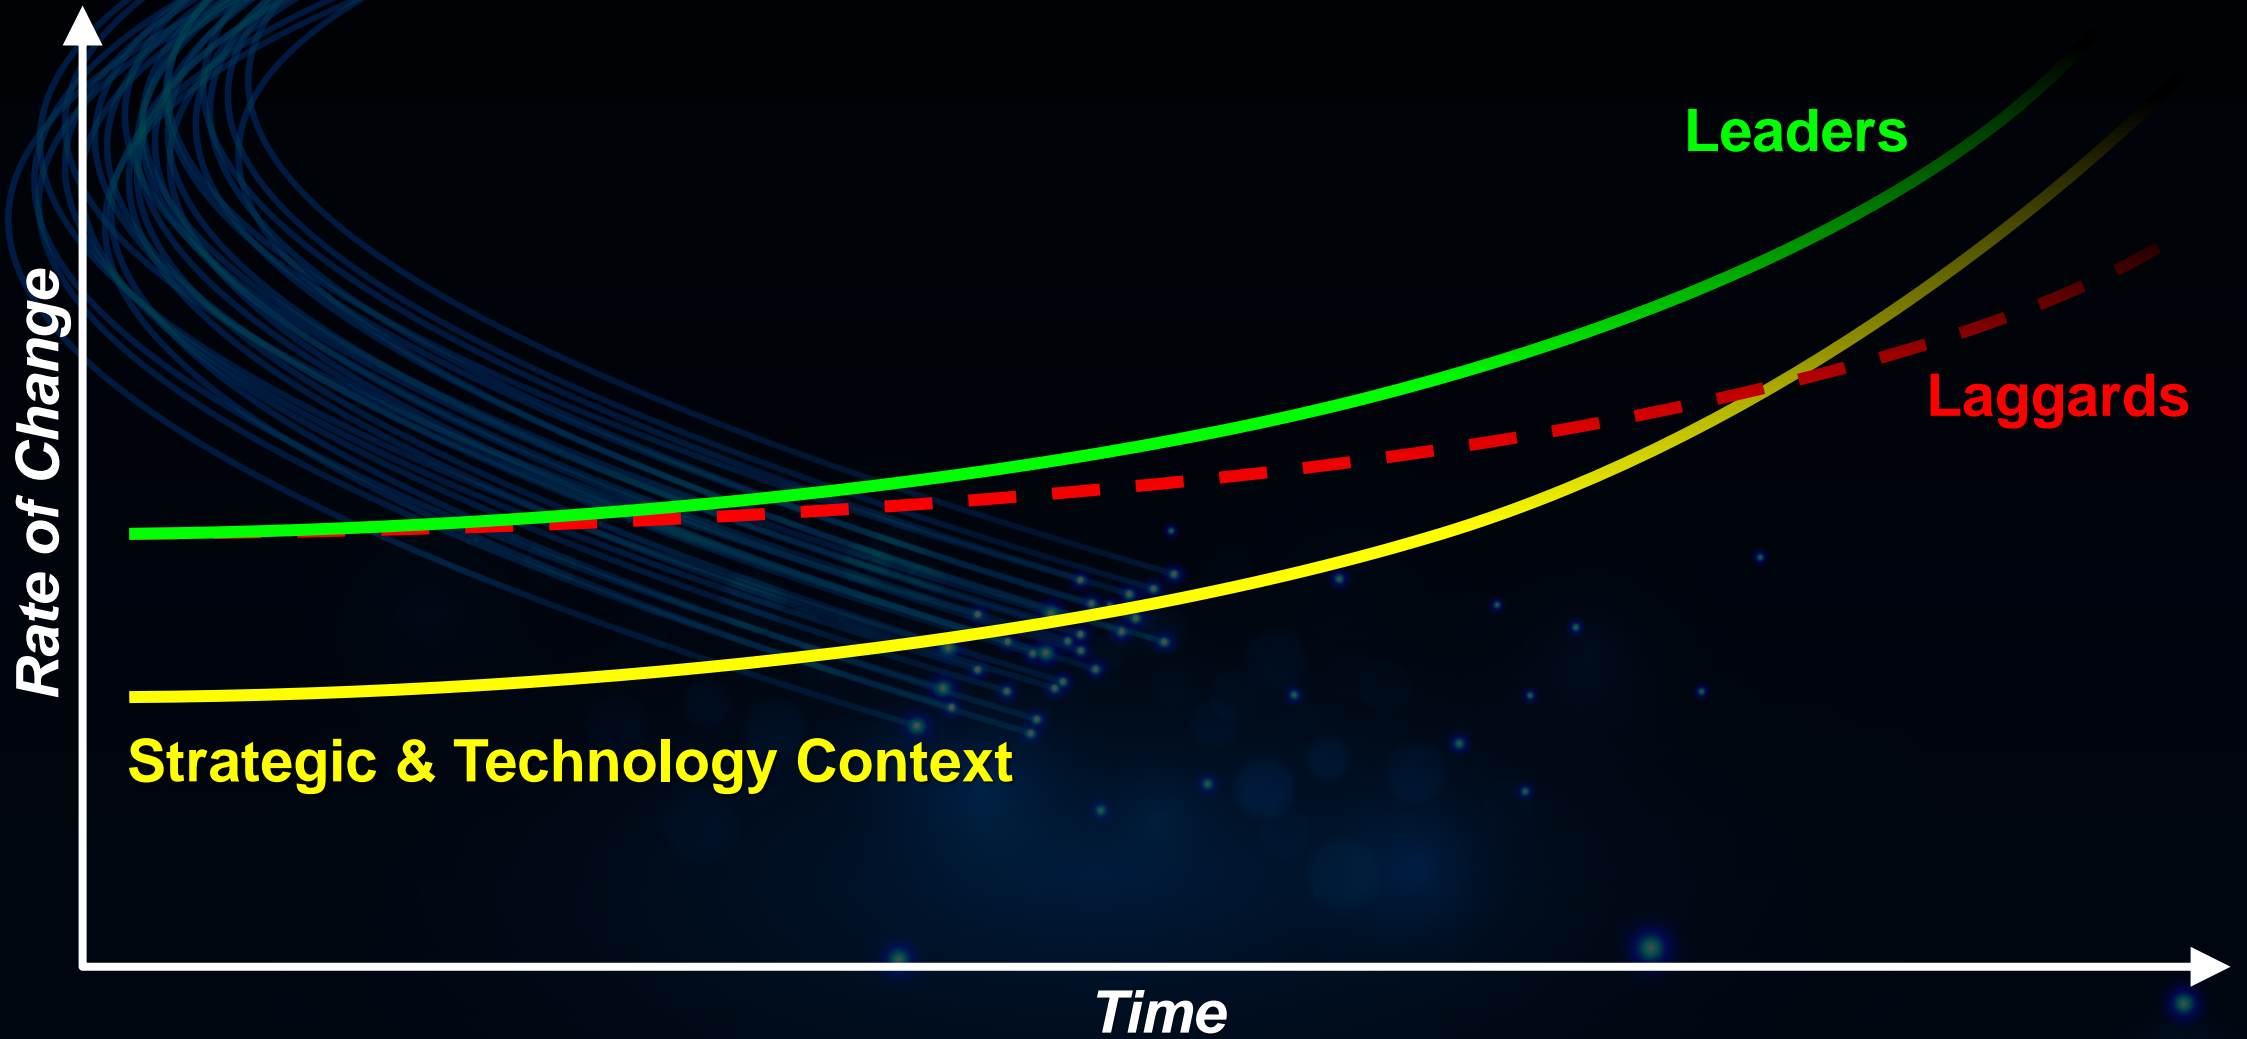

AI
