FACI in-person attendance Registration Instructions

Registrants should use the Login.gov option to register.

When using the Login.gov option, the registrant must create a user ID by entering their name and email address. Registrants will have to enter a 2-step authentication source. Once verified, that information will be saved in the system and they will use that user information to register for all Treasury registration sites going forward. The information will also automatically populate in the registration.
