

Daily TARP Update

July 2, 2012

The Office of Financial Stability (OFS) has updated the format of the Daily TARP Update (DTU) report. These changes are identified below. The updated format is designed to make the report easier to read and better represent some of the transactions that have occurred in the TARP program. The major changes are highlighted below using a copy of each version of the DTU for the same day. Transaction-level detail is available at: <http://www.treasury.gov/initiatives/financial-stability/briefing-room/reports/tarp-transactions/Pages/default.aspx>.

Daily TARP Update for 7/2/2012														
(*Dollars in Billions*)		Principal/Investment						Income/Revenue

Write-offs and realized losses have been combined. Disposition expenses are no longer included in realized losses – they were moved to the [Other Income (Expenses)] column.

[CPP Exchanges Into CDCI] column added to show non-cash repayments from exchanges out of CPP, into CDCI. Disbursements for exchanges into CDCI from CPP are represented as negative numbers in this column.

[Outstanding] = [Disbursed] - [Repayments] – [Exchanges] – [Write-offs & Realized Losses]

[Other Income (Expenses)] includes gains on sales, investment income, fees collected, and disposition expenses.

Disposition expenses are included in [Other Income (Expenses)], reducing the previous amount in all three columns by these expenses.

Section added for Additional Treasury Holdings to show additional AIG Common Shares Held by Treasury. A total with TARP Programs and Additional AIG Shares was also added. This presentation is similar to that used for the cost estimates in the monthly 105(a) report to Congress.

Notes

All figures are as of prior business day and are subject to adjustment(s)

- This row represents the portion of CPP repayments that were received from refinancing to the Small Business Lending Fund (SBLF), which is not a TARP program. The law creating the SBLF provided that banks could refinance securities issued under the CPP and CDCI programs with securities issued under the SBLF. A total of 137 CPP banks refinanced under the SBLF resulting in repayments of \$2.21 billion in CPP investments. This amount is included in total repayments and therefore, this column is not used to calculate the "Outstanding" amount.
- This column represents non-cash exchanges out of CPP into CDCI. A total of 28 CPP banks, representing \$355.7 million, converted from CPP to CDCI. The total amount exchanged into CDCI, with converted warrants, was \$363.3 million.
- For equity programs, all dividend and interest payments are classified in the “Dividends” category. For direct loan programs, all dividend and interest payments are classified in the “Interest” category. These classifications are consistent with the accounting treatment used to produce OFS’ financial statements.
- Amount of "Warrants Sold" reflects net cash receipts.

Notes (continued)

- ⁵ "Other Income (Expenses)" includes gains on sales, investment income, fees collected, and disposition expenses. "Other Income (Expenses)" does not include the Citigroup AGP receivable for up to \$800 million in trust preferred securities from the Federal Deposit Insurance Corporation (FDIC).
- ⁶ This column represents the sum of repayments plus income/revenue. All returned TARP funds are paid into the general fund of the Treasury for the reduction of the public debt. These amounts do not represent lifetime cost estimates, which OFS provides in its monthly 105(a) report to Congress.
- ⁷ Citigroup CPP investment was originally in the form of preferred shares and was converted to common stock in September 2009.
- ⁸ Allocation of PPIP Equity receipts between repayments and income are subject to reclassification.
- ⁹ Treasury's investment in AIG common shares consists of shares acquired in exchange for preferred stock purchased with TARP funds (TARP shares) and shares received from the trust created by the FRBNY for the benefit of Treasury as a result of its loan to AIG (non-TARP shares). Treasury manages the TARP shares and non-TARP shares together, and disposes of them pro-rata in proportion to its holdings. Only the TARP shares are included under "Other Programs—AIG" and the "Write-offs & Realized Losses" column shows a loss based on Treasury's cost basis of \$43.53 in the TARP shares alone. The non-TARP shares are shown at the bottom of the page after the TARP Total under "Additional AIG Common Shares Held by Treasury." A gain in the "Other Income (Expenses)" column is shown for the non-TARP shares because Treasury's cost basis in such shares is deemed to be zero. When the TARP shares and non-TARP shares are considered together, Treasury's cost on a cash basis is \$28.73 per share. Treasury currently holds a total of 1.06 billion AIG common shares, consisting of 699,247,745 TARP shares and 360,369,076 non-TARP shares.
- ¹⁰ Treasury's investment in GM was originally made primarily in the form of loans, some of which were subsequently converted into common and preferred stock. Treasury currently holds only common stock. The realized loss reflects the difference between the price at which Treasury sold common shares in GM's initial public offering and the Treasury's cost basis (\$43.52 per common share) for such shares. Treasury currently holds 500,065,254 in remaining shares of GM common stock.
- ¹¹ Treasury has entered into a letter of credit (L/C) to fund the FHA Short Refinance Program. Pursuant to this L/C, a reserve account has been pre-funded with \$50 million in funds for any future loss claim payments. Treasury will be reimbursed for all unused amounts from this account. As of the date hereof, no disbursements for loss claim payments under the FHA Short Refinance Program have been made.
